Capital Budget

Executive Summary *(Amended)*

The capital budget is the Town's financial plan for funding one-time expenditures for major projects mostly including "infrastructure" such as roads, bridges, culverts, vehicles/ equipment, parks, playgrounds, sidewalks, trails, streetlights, and buildings. It includes both the development of new and the rehabilitation of existing infrastructure, and also includes studies related to infrastructure. A capital budget is similar to buying or renovating your house or buying a car, while the actual running of your home and car (like gas, hydro, and general maintenance) would be included in the operating budget.

Budget Process – Strong Mayor Powers

This budget is in accordance with the Strong Mayors, Building Homes Act, 2022 S.O. 2022, c. 18 – Bill 3. This legislation and associated regulations (O. Reg 530/22 and O. Reg 580/22) provides the Mayor with the authority to propose and adopt a budget.

Council approved the following timetable:

Date	Milestone
November 26, 2024	Distribution of 2025 Operating and Capital Budget from Mayor to Council
December 6, 2024	Budgets available to public and posted on Town website
December 13, 2024	Public meeting: ■ 2025 Capital Budget / 2026-2034 Long Range Capital Forecast & 2025 Operating Budget - 9 am start
December 14, 2024	Mayoral Veto Period (1 day)
December 20, 2024	Council Veto Period (6 days)

Considerations in determining the Capital Budget

- Asset Management Plan
- Council's priority list of items
- Prioritization of roads projects based on the Pavement Management System
- Mitigation of risk to decrease liability and increase safety
- Receipt of confirmed grant funding or potential grant funding
- Strategic Plan
- Growth related projects
- Legislative requirements
- Synergies with other organizations (ie. Region, Developers, etc.)
- Funding constraints
- Master Plan, studies, etc.

Overview

The Town has completed a 10 year capital budget and long range forecast. The first year will be the recommendation of the Mayor's Budget and will be deemed adopted once the legislative time expires. The remaining nine-year forecast covers the capital needs estimated for subsequent years for planning and information purposes. The nine-year forecast period is reviewed and revised annually as part of the budget process.

$4.7 million
on design and replacement of Pad 3 & 4 arena slabs and flooring at the Ajax Community Centre

$2.5 million
on other buildings and building improvements

$14.1 million
investment in new and existing road network

$0.7 million
storm water network rehabilitation and maintenance

$3.8 million
for fire vehicles and equipment

$2.2 million
in technology improvements and upgrades

$0.3 million
on studies and other initiatives

$1.8 million
on bridge repairs and rehabilitations

$5.4 million
on other vehicles and equipment

$3.1 million
for Parks and Open Space

Rossland Road Expansion Ongoing

The Town's capital budget is divided into four sections:

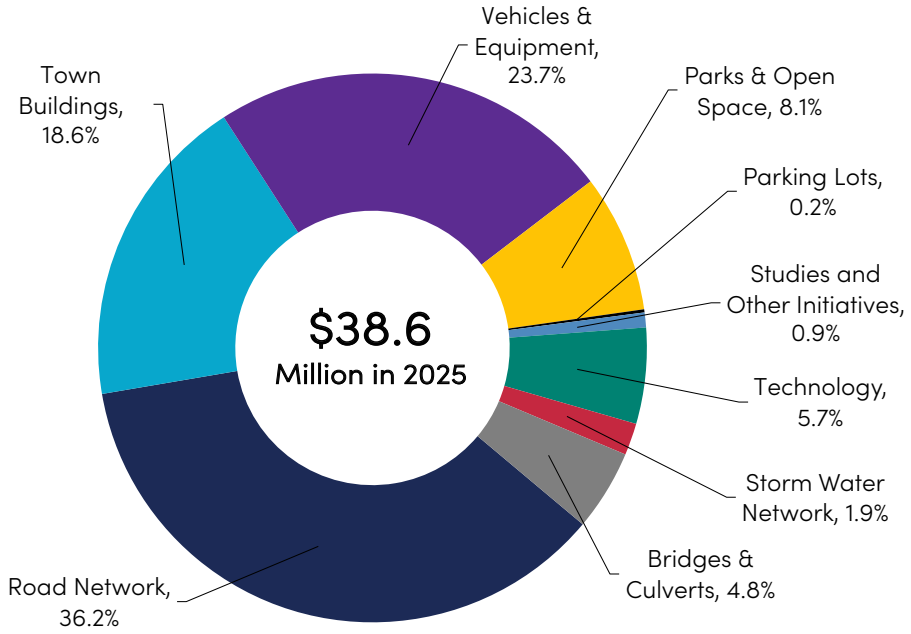

1. Reports

Project List

This section provides a detailed listing of the recommended capital projects for the current year (2025) and the nine year forecast (2026 – 2034). The current year is fully funded, whereby based on the revenue assumptions built into the capital budget, the Town expects there to be sufficient funding available to take on these initiatives. The nine year forecast in this budget is not fully funded due to the high degree of uncertainty surrounding future revenue streams and the growing list of priorities, including asset management related requirements.

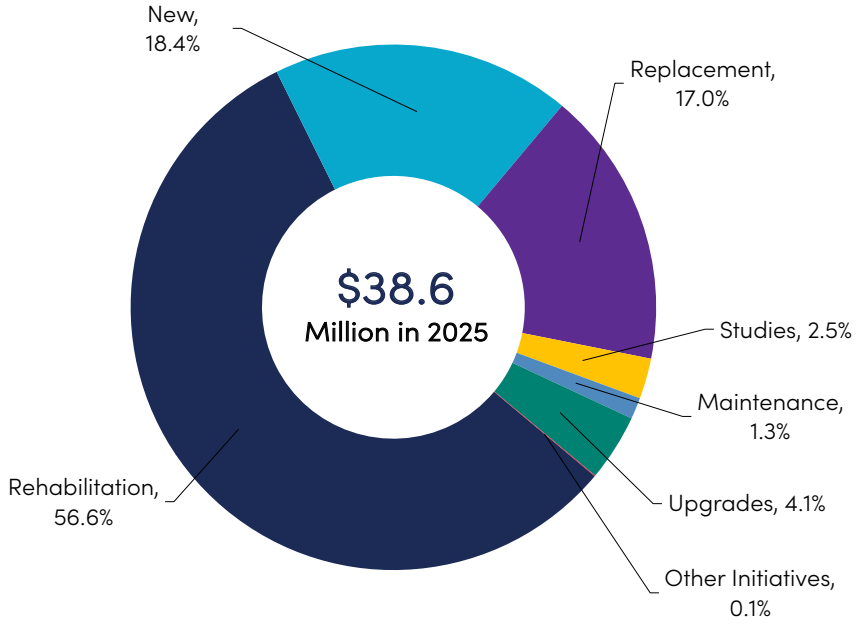

The project listing is segregated by major asset category

2025 Capital Projects by Asset Category

Additionally, each major asset category is further grouped into the following:

2025 Capital Projects by Project Type

The project list includes the numeric project identifier on the left side of the page and the related detail sheet type, in the center of the page.

There are four Program identifiers under the "Type" column in the Project List report. They include:

1. LC (Life Cycle);
2. DC (Development Charge);
3. CBC (Community Benefit Charge);
4. If the type remains blank, this indicates that it is a standalone project.

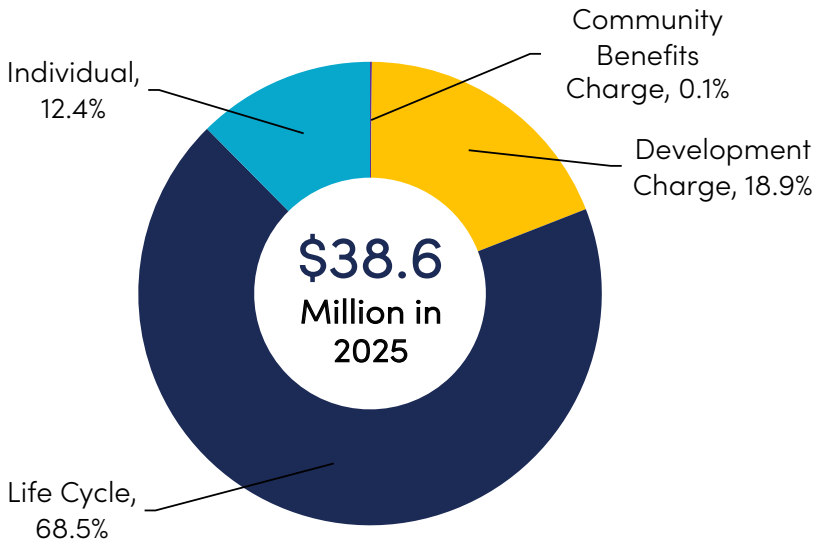

Projects with an asterisk(*) indicates it is a new project introduced to the capital budget.

If the "Type" is identified with LC (Life Cycle), individual project detail sheets for the first 3 years will be included immediately after the project listings. These projects are identified based on planned asset maintenance, rehabilitation, or replacement requirements to maintain existing service levels.

If the "Type" is identified with DC (Development Charge related) or CBC (Community Benefits Charge related) the project will be listed within a summary program detail sheet with a description of the program. Individual project detail sheets for the first 3 years will be included immediately after the project listings. These projects have been identified as growth related.

If the project "Type" is blank, the project detail sheet included is a comprehensive individual sheet with specific details related to that project. These individual sheets typically include projects that impact service levels in part or in whole, result in new assets or infrastructure to maintain, are required due to legislation/ regulations, and are studies or strategies not related to growth.

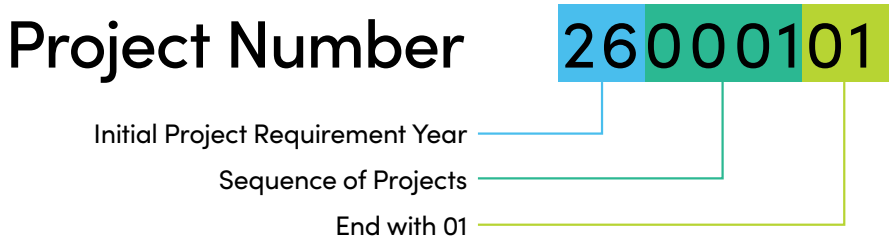

2025 Capital Projects Value by Program

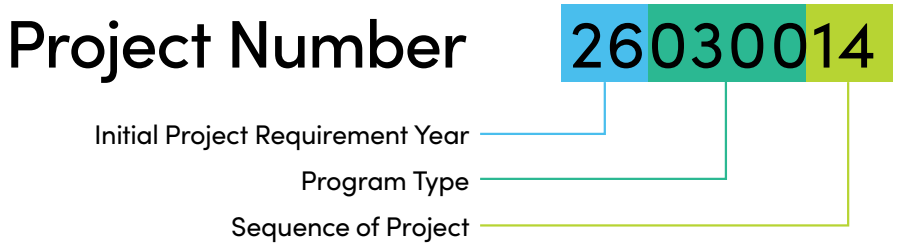

The projects are all assigned numbers by the budget system based on the year the project was initially required to be completed, the type of program and the sequential project number under each year and program.

There are two types of project numbers:

1. For individual projects where the type of project is 'blank' – the project number is identified below where the sequence of projects in any given year will range from 0001 – 0099 and is in the middle of the project number with all of these projects ending in '01'

2. For Asset related program types identified as DC, LC or CBC, the asset program type is identified in the middle of the project number with the sequence of projects at the end.

Tables 1 to 3 below identify the details related to the middle portion of the project number (Program type) and which department is the lead.

Table 1: Life Cycle (LC) Projects

Life Cycle Projects	Program Type Description	Department
0101	Facility Rehabilitation Program – Town Hall	Operations and Environmental Services
0102	Fleet & Equipment Replacement Program – Town Hall / Other	Operations and Environmental Services Ajax Public Library
0103	Hardware and Software Replacement Program	Legislative & Information Services
0104	Facility Maintenance Program - Operations Centre	Operations and Environmental Services
0200	Facility Maintenance Program - Fire Halls	Operations and Environmental Services
0201	Fleet & Equipment Replacement Program – Fire	Operations and Environmental Services Fire & Emergency Services
0230	Fleet & Equipment Replacement Program – Bylaw Services	Operations and Environmental Services
0300	Road Resurfacing Program	Operations and Environmental Services
0301	Road Rehabilitation Program	Operations and Environmental Services
0302	Fleet & Equipment Replacement Program – Roads Maintenance	Operations and Environmental Services
0304	Bridges & Culverts Lifecycle Maintenance Program	Operations and Environmental Services
0306	Roadside Assets Lifecycle Maintenance Program	Operations and Environmental Services
0307	Traffic Signal Lifecycle Maintenance Program	Operations and Environmental Services
0310	Fleet & Equipment Replacement Program – Snow Removal	Operations and Environmental Services
0330	Municipal Parking Lot Lifecycle Maintenance Program	Operations and Environmental Services
0340	Streetlighting Lifecycle Maintenance Program	Operations and Environmental Services
0410	Stormwater Lifecycle Maintenance Program	Operations and Environmental Services
0700	Parks Lifecycle Maintenance Program	Operations and Environmental Services
0701	Fleet & Equipment Replacement Program – Parks Maintenance	Operations and Environmental Services
0702	Fleet & Equipment Replacement – Recreation Facilities	Operations and Environmental Services Recreation & Culture

Life Cycle Projects	Program Type Description	Department
0703	Facility Rehabilitation Program - ACC	Operations and Environmental Services
0704	Facility Rehabilitation Program - MCC	Operations and Environmental Services
0705	Facility Rehabilitation Program - ARC	Operations and Environmental Services
0706	Facility Rehabilitation Program - Village Arena	Operations and Environmental Services
0707	Facility Rehabilitation Program - St. Andrews Community Centre	Operations and Environmental Services
0709	Facility Rehabilitation Program - Other Facilities	Operations and Environmental Services
0710	Facility Rehabilitation Program - Libraries	Operations and Environmental Services
0720	Facility Rehabilitation Program - St. Francis	Operations and Environmental Services
0750	Pedestrian Bridges Lifecycle Maintenance Program	Operations and Environmental Services
0800	Fleet & Equipment Replacement Program - Planning and Development Services	Operations and Environmental Services

Table 2: Development Charges (DC) Projects

DC Projects	Program Type Description	Department
0901	Development - Studies	All
0902	Development - Fire & Emergency Services	Fire & Emergency Services Operations and Environmental Services
0903	Development - Transportation Services	Operations and Environmental Services Planning & Development Services
0904	Development - Parks & Recreation	Operations and Environmental Services Recreation & Culture
0905	Development - Library Services	Ajax Public Library Operations and Environmental Services

Table 3: Community Benefit Charges (CBC) Projects

CBC Projects	Program Type Description	Department
0950	Community Benefit Charges	Operations and Environmental Services Planning & Development Services Recreation & Culture

The capital project titles contain references to years at times. In some cases, the year in brackets indicates the purchase year of the vehicle being replaced. For example, the 25070101 Stake Truck 16501 (2016) was last replaced in 2016. For all other projects that have a year in the title, the year references the year of planned project completion. Abbreviations are also used in project titles to allow more details to be provided to the reader, especially for projects listed on the LC, DC, and CBC program sheets.

Table 4 below provides a list of abbreviations commonly used throughout the budget document.

Table 4: Abbreviations Used in Budget Document

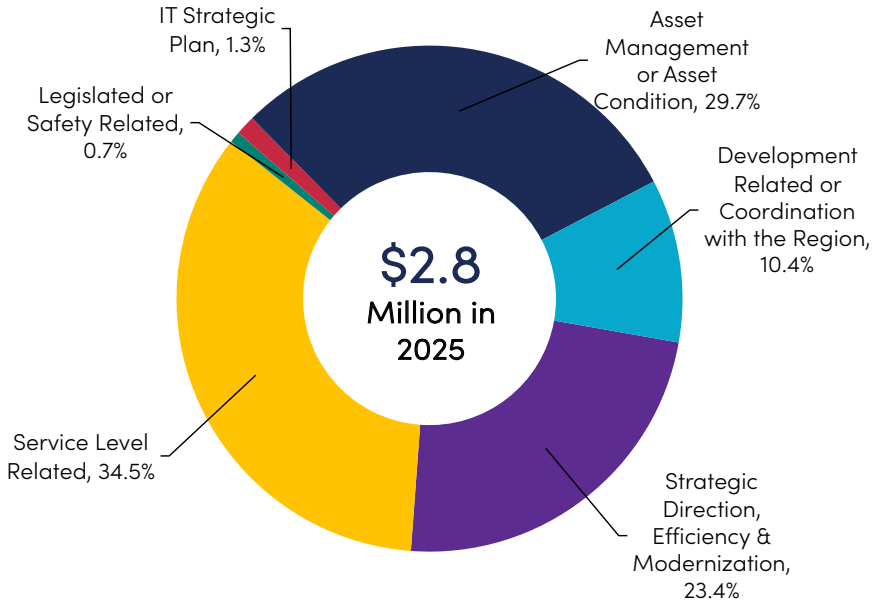

Abbreviation	Meaning
ACC	Ajax Community Centre
AHU	Air Handling Unit
ARC	Audley Recreation Centre
Bdry	Boundary
CC	Community Centre
CCBF	Canada Community-Building Fund
Ext	Extension
FMP	Fire Master Plan
HEPC	Hydro Electric Power Corridor (Canada)
MCC	McLean Community Centre
M&O	Mill and Overlay
MUT	Multi-use Trail
OP	Official Plan
Ped Br	Pedestrian Bridge
Pk(ette)	Park or Parkette
Recon	Reconstruction
Rehab	Rehabilitation
Repl	Replacement
Resurf	Resurfacing
Retro	Retrofit
RPMP	Recreation and Parks Master Plan
SCBA	Self-contained Breathing Apparatus
SL	Streetlight
SWM	Storm Water Management
Tr	Trail
Traf Sig	Traffic Signal
UPS	Uninterruptible Power Supply
Var	Various
VFD	Variable Frequency Drive

Summary of New Capital Projects by Driver

This report identifies the new projects introduced into the capital budget and long range forecast that were not identified in the previous year's forecast. This report only includes new projects added in the first three years of the budget and forecast (2025 – 2027) with a total value of $8,114,700. The project listing is grouped by the main purpose driving the necessity to introduce the project to the budget and forecast. The illustration below shows the new capital projects added for 2025 of $2,778,300:

New Capital Projects by Driver in 2025

Major drivers of new capitals projects introduced in 2025 are:

Service Level Related:

- Additional mobile stage for the newly designed Fairgrounds ($700,000)

Strategic Direction, Efficiency & Modernization:

- Accommodation Upgrade Project Phase 3 ($650,000)

Asset Management or Asset Condition:

- Reconstruction of multi-use trails ($542,300)
- Various building related replacements ($170,000)

2. Capital Detail Sheets

Capital detail sheets have been grouped into four categories: Individual, Life Cycle (LC), Development Charges/Growth Related (DC), and Community Benefits Charges (CBC). The capital detail sheets have specific details about the project including Scope, Rationale, References, and Scheduled timing.

1. Individual projects are one-time projects which typically includes studies, strategies, projects identified through various strategic and new initiatives, legislated requirements, additional/new assets not covered by Development Charges, Community Benefits Charges or any other project that does not fit within the Life Cycle or Development Charges/Growth Related categories.
2. Life cycle (LC) sheets have been categorized into programs. A capital program entails projects that are similar in nature and are grouped together (e.g road reconstruction). The description on the program sheet provides an overview of items included in each capital program and is not specific to any individual project listed.
3. Development Charges/Growth Related (DC) projects are those that are driven by population or employment growth in the Town and result in new or expanded service requirements, for example new parks or extending an arterial road. The projects are classified by the service category they support. The Town collects development charges to support these projects as approved under the DC Bylaw.
4. Community Benefits Charges (CBC) (previously Section 37 Benefit Contributions) projects are those that are driven by development and are funded in whole or in part from previous Section 37 Agreements or collections from developments or redevelopments that are at least five stories in height containing at least 10 residential units, in accordance with an approved CBC Bylaw.

Each project on the project listing is hyperlinked to a capital detail sheet or a capital program sheet for reference. The Lifecycle (LC), Development Charge (DC), and Community Benefits Charges (CBC) program sheets include multiple capital projects in the expenditure section as they relate to the general programs. The details for all 2025-2027 projects are included in the capital budget.

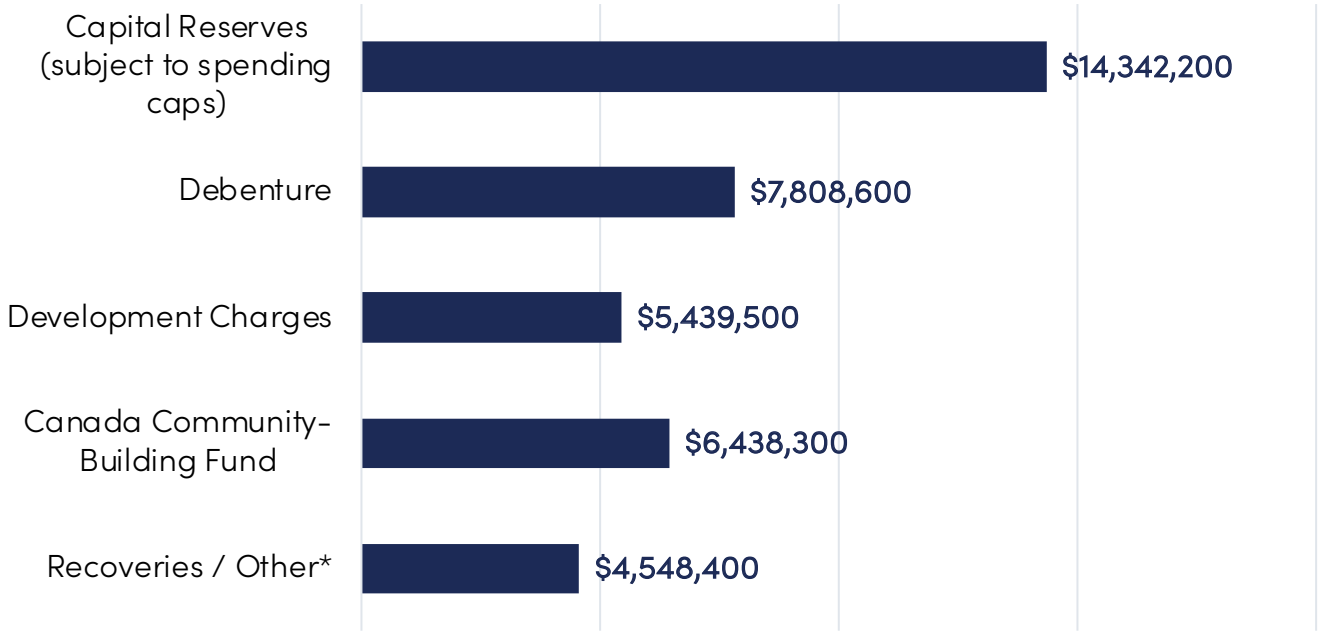

The document has been formatted to group the project detail sheets in each category by year. For example, under the Studies & Other Initiatives project listing the detail sheets are hyperlinked and also grouped by year to enable readers to view projects more easily.

3. Financing Summaries

This section identifies the various funding sources for the capital projects and groups the projects under these various funding sources. The funding for capital projects comes from a wide range of different sources, with most of the common ones listed below:

2025 Capital Budget by Funding Source

*Recoveries/Other consists of other Town reserves (e.g. Parkland Reserve, Building Approvals Reserve, Insurance Reserve, etc.) as well as other grants and external contributions.

Table 5 identifies the Town's capital reserves, the use or purpose of the reserve and the revenue sources that are allocated to the reserve.

Table 5: Capital Reserves Used to Fund Capital Projects

Reserve Name	Capital Budget/LRCF Funding	Revenue Source
Development	1. Town's share (Ineligible & Benefit to Existing) of Development Charge projects 2. New Infrastructure not eligible for Development Charge funding 3. Waterfront and Shoreline Improvements	1. Annual budget allocation 2. 25% of Casino Ajax revenue 3. 20% of Elexicon revenue
Vehicle /Equipment Replacement *	1. Operations – Vehicles and Equipment 2. Fire-SCBA, Hose, Auto Extrication, AED 3. Recreation – Fitness, Floor Care Machines 4. Information Technology-Workstations, Hardware, Servers, Software	1. Annual budget allocation 2. Proceeds from sale of used and surplus vehicles/equipment 3. 15% of Casino Ajax revenue 4. 25% of Elexicon revenue
Roads Maintenance*	Repair/Maintenance/Rehabilitation of roads and related infrastructure, including but not limited to bridges, streetlights, sidewalks, curbs & gutters, traffic signals, multi-use trails within the road allowance and stormwater infrastructure as well as asset conditions assessments	1. Annual budget allocation 2. 10% of Casino Ajax revenue 3. 15% of Elexicon revenue
Building Maintenance *	1. Maintenance/repair/rehabilitation of existing buildings and related facilities, including: • the building itself and all components surrounding campus (e.g. parking lot, front entrance, grounds etc.) • asset conditions assessments 2. Renovations to existing buildings	1. Annual budget allocation 2. 10% of Casino Ajax revenue 3. 20% of Elexicon revenue 4. Portion of the tax room from the debt payments on retired (paid off) long term debt
General Infrastructure*	Maintenance/repair/rehabilitation of all other infrastructure not fundable from Building Maintenance Reserve or Roads Maintenance Reserve as well as asset conditions assessments	1. Annual budget allocation 2. 10% of Casino Ajax revenue 3. 15% of Elexicon revenue
Stormwater Maintenance Reserve*	Maintenance/repair/rehabilitation of all stormwater infrastructure including storm sewers, storm ponds, rain gardens as well as related studies and asset condition assessments	1. Developer contributions 2. Stormwater User Fee

*Denotes an Asset Management reserve intended primarily for asset repair, rehabilitation and replacement

Reserve Name	Capital Budget/LRCF Funding	Revenue Source
Strategic Initiatives	1. Master Plan, Studies, Strategies, EA's not fundable from another source 2. Traffic Calming 3. Capital projects resulting from Community Action Plan (e.g. Customer Polling) 4. New Software 5. Acquisition and Installation of art in public spaces	1. Annual budget allocation 2. 5% of Casino Ajax revenue 3. 5% of Elexicon revenue
Insurance Reserve/Risk Mitigation	Risk management initiatives intended to mitigate against future insurance claims. Such activities may include, but are not limited to infrastructure repairs, maintenance and inspections for slip and fall and general injury prevention, IT initiatives designed to detect and protect against cyber threats, administrative system to manage claims, third party insurance	Surplus payments, recoveries, or other payments received from the Durham Municipal Insurance Pool or other agency specifically related to risk mitigation or claim settlement
Building Approvals Reserve	With respect to capital usage, funds are only to be utilized for assets used in the provision of activities governed by the Building Code Act	Portion of fees collected for the provision of Building Code related activities
Canada Community-Building Fund (CCBF)	Funds only to be utilized for eligible projects as identified in the Municipal Funding Agreement	Federal grant administered by AMO – funds received twice a year
2018 Development Charge Reserve Fund	Utilized for capital growth projects as outlined in the 2018 Development Charge Background Study	Developer Contributions under the Development Charges Act
Parkland Reserve Fund	Utilized to fund park space development	Developer Contributions under the Planning Act
Debt Reduction Reserve	Used to: 1. Reduce the amount of long term debt issued 2. Offset the operating budget impact of existing debt payment	25% of Casino Ajax revenue
Community Benefits Charge Reserve	Utilized for capital growth projects funded from Section 37 agreements	Developer Contributions under the Planning Act
Benefits Claim Reserve	With respect to capital usage, funds are to be utilized for HR and/or Payroll related capital projects	Surplus from Benefits as a result of the Town adopting ASO

4. Continuity Schedules

This section provides a snapshot of the various reserves and reserve funds beginning with the estimated opening balances, the inputs or revenues going into the reserves and the outputs or expenditures (capital funding) being drawn from the reserves. This continuity is completed for the current budget and the forecast to identify the ending balances in each of the reserves based on the revenue assumptions and capital funding. Continuity schedules have been included for each of 2025, 2026 and 2027.

The continuity schedules are only presented for reserves that are utilized in the capital budget. The Revenue Assumptions built into this capital budget include the following:

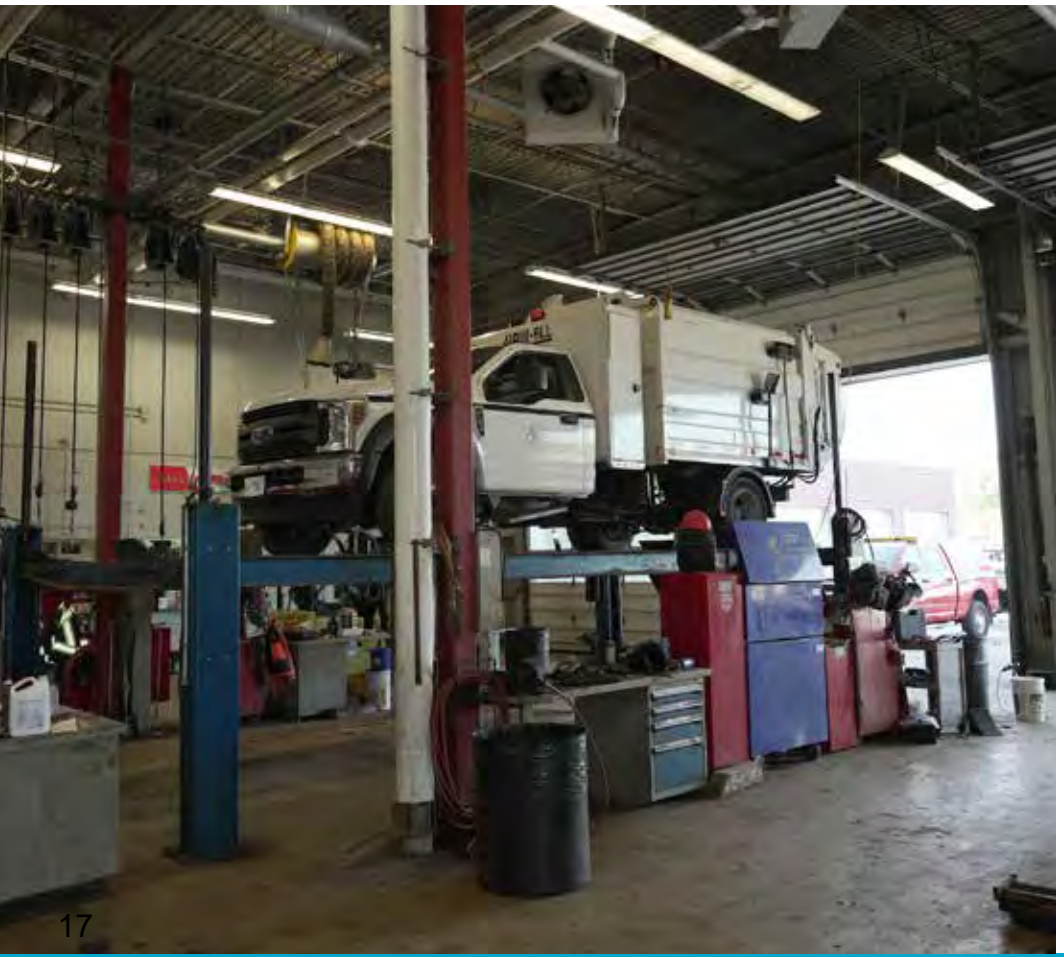

Table 6: Revenue Assumptions

Capital funding	Estimated revenue forecast
Elexicon Corporation Revenue	$2,010,500 in 2025 (interest and dividends).
Casino Ajax revenue	$4,250,000 per year allocated to capital reserves.
Budget allocation	$11,125,800 for 2025 (includes 2% annual infrastructure levy)
One-time budget allocation	$3,920,000 for 2025
Canada Community Building Fund	$4,148,300 for 2025. The CCBF funding agreement was renewed in 2024 to provide allocations from 2024 to 2028.
Subdivider Contributions – Development Charges Reserve Fund	Based on development projections provided by Planning and Development. Revenue is based on the July 1, 2024 DC rate.
Parkland Contributions	Based on average collections over last five years.
Community Benefit Charges	Based on revenue contributions included in executed Section 37 agreements.
Stormwater Maintenance Fee	$3,393,700 per year allocated to the stormwater reserve to fund the capital and operating impacts of the stormwater management program.

5. Asset Management Plan Overview

The Town's 2024 Asset Management Plan (AM Plan) identifies the lifecycle actions needed to sustain current Levels of Service (LOS) for the Town's assets over the next 10 years, while also highlighting risks associated with the current funding levels. The estimated replacement value of the Town's assets is $2.52 billion ($2023).

Assets covered by the AM Plan

$1,454 million
Transportation

$514 million
Stormwater

$387 million
Facilities

$97 million
Parks, Recreation and Culture

$2,520 million
in Replacement Value

$48 million
Fleet

$13 million
Library

$5 million
Information Technology

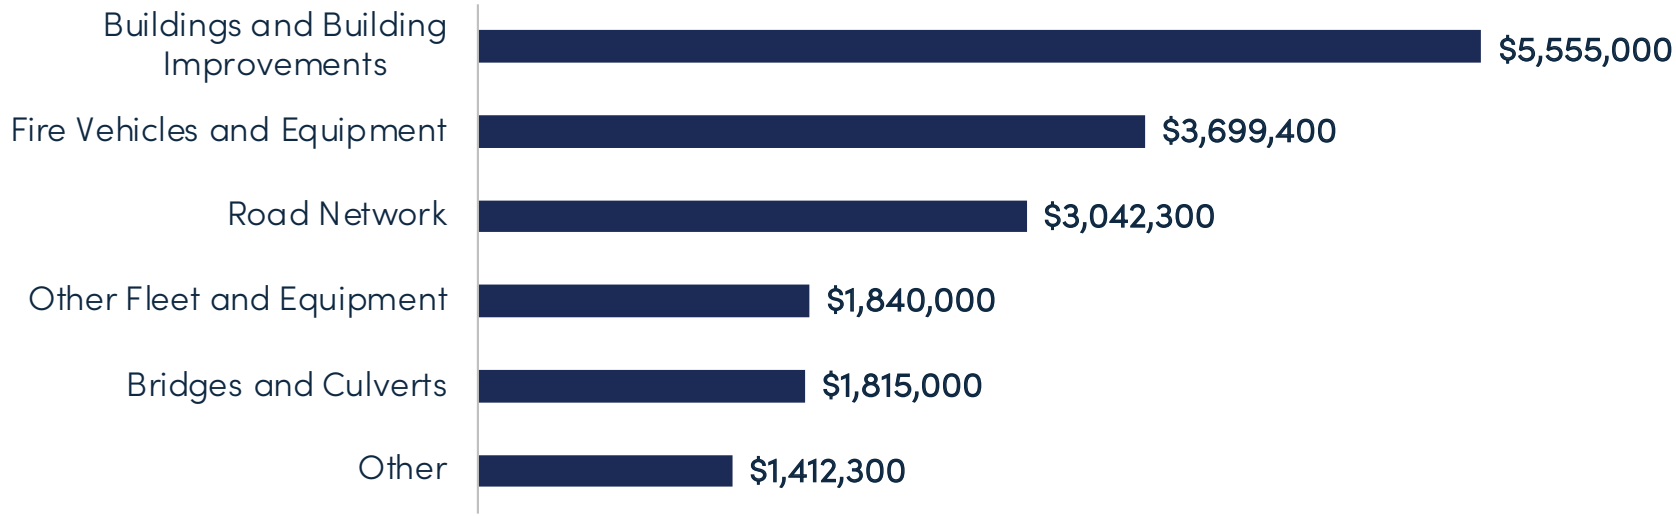

$3 million
Fire

To adequately meet service levels and manage risk while minimizing lifecycle costs, most assets should be preserved in fair or better condition. Assets in poor or very poor condition require increased attention and renewal investment (funding and staff resources) to avoid increased maintenance costs and/or unexpected failure. The assets in poor or very poor condition are typically those that are included in 10-year capital renewal programs and budget forecasts, especially if deemed critical by the Town (i.e. have a high consequence of failure).

The 2024 Corporate Asset Management Plan categorizes assets by levels of risk exposure (from very low to very high risk). The very high risk assets (such as fire apparatus and fire stations) are being addressed in the budgets.

Through time, assets will deteriorate and become more likely to fail if repairs and rehabilitations are not addressed. Given funding and resource constraints, it is typically those assets with a higher risk exposure that are prioritized within the annual Capital Budget and early years of the Long Range Capital Forecast. Of the approximate $27.6 million in asset management related life cycle projects identified in the 2025 Capital Budget, approximately $17.4 million of these assets were identified as having a high or very high risk exposure within the AM Plan. The figure below provides a breakdown of these high-risk assets by type to be addressed through the 2025 Capital Budget.

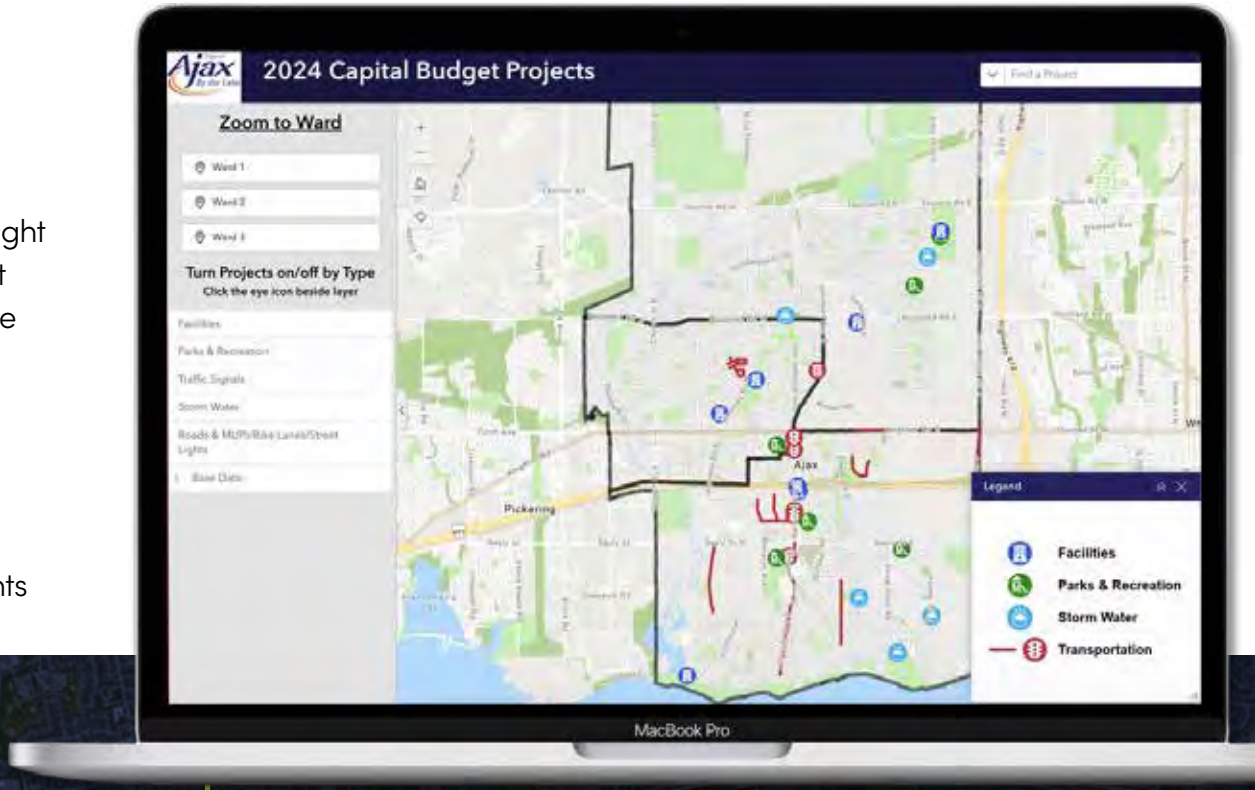

2025 Capital Projects Identified as High-Risk within Asset Management Plan ($17.4 million)

6. Maps of 2025 Construction Activity

Three comprehensive ward maps are included to highlight the location of construction projects occurring in the first year of the budget program. Construction projects in the following categories can be viewed on the maps.

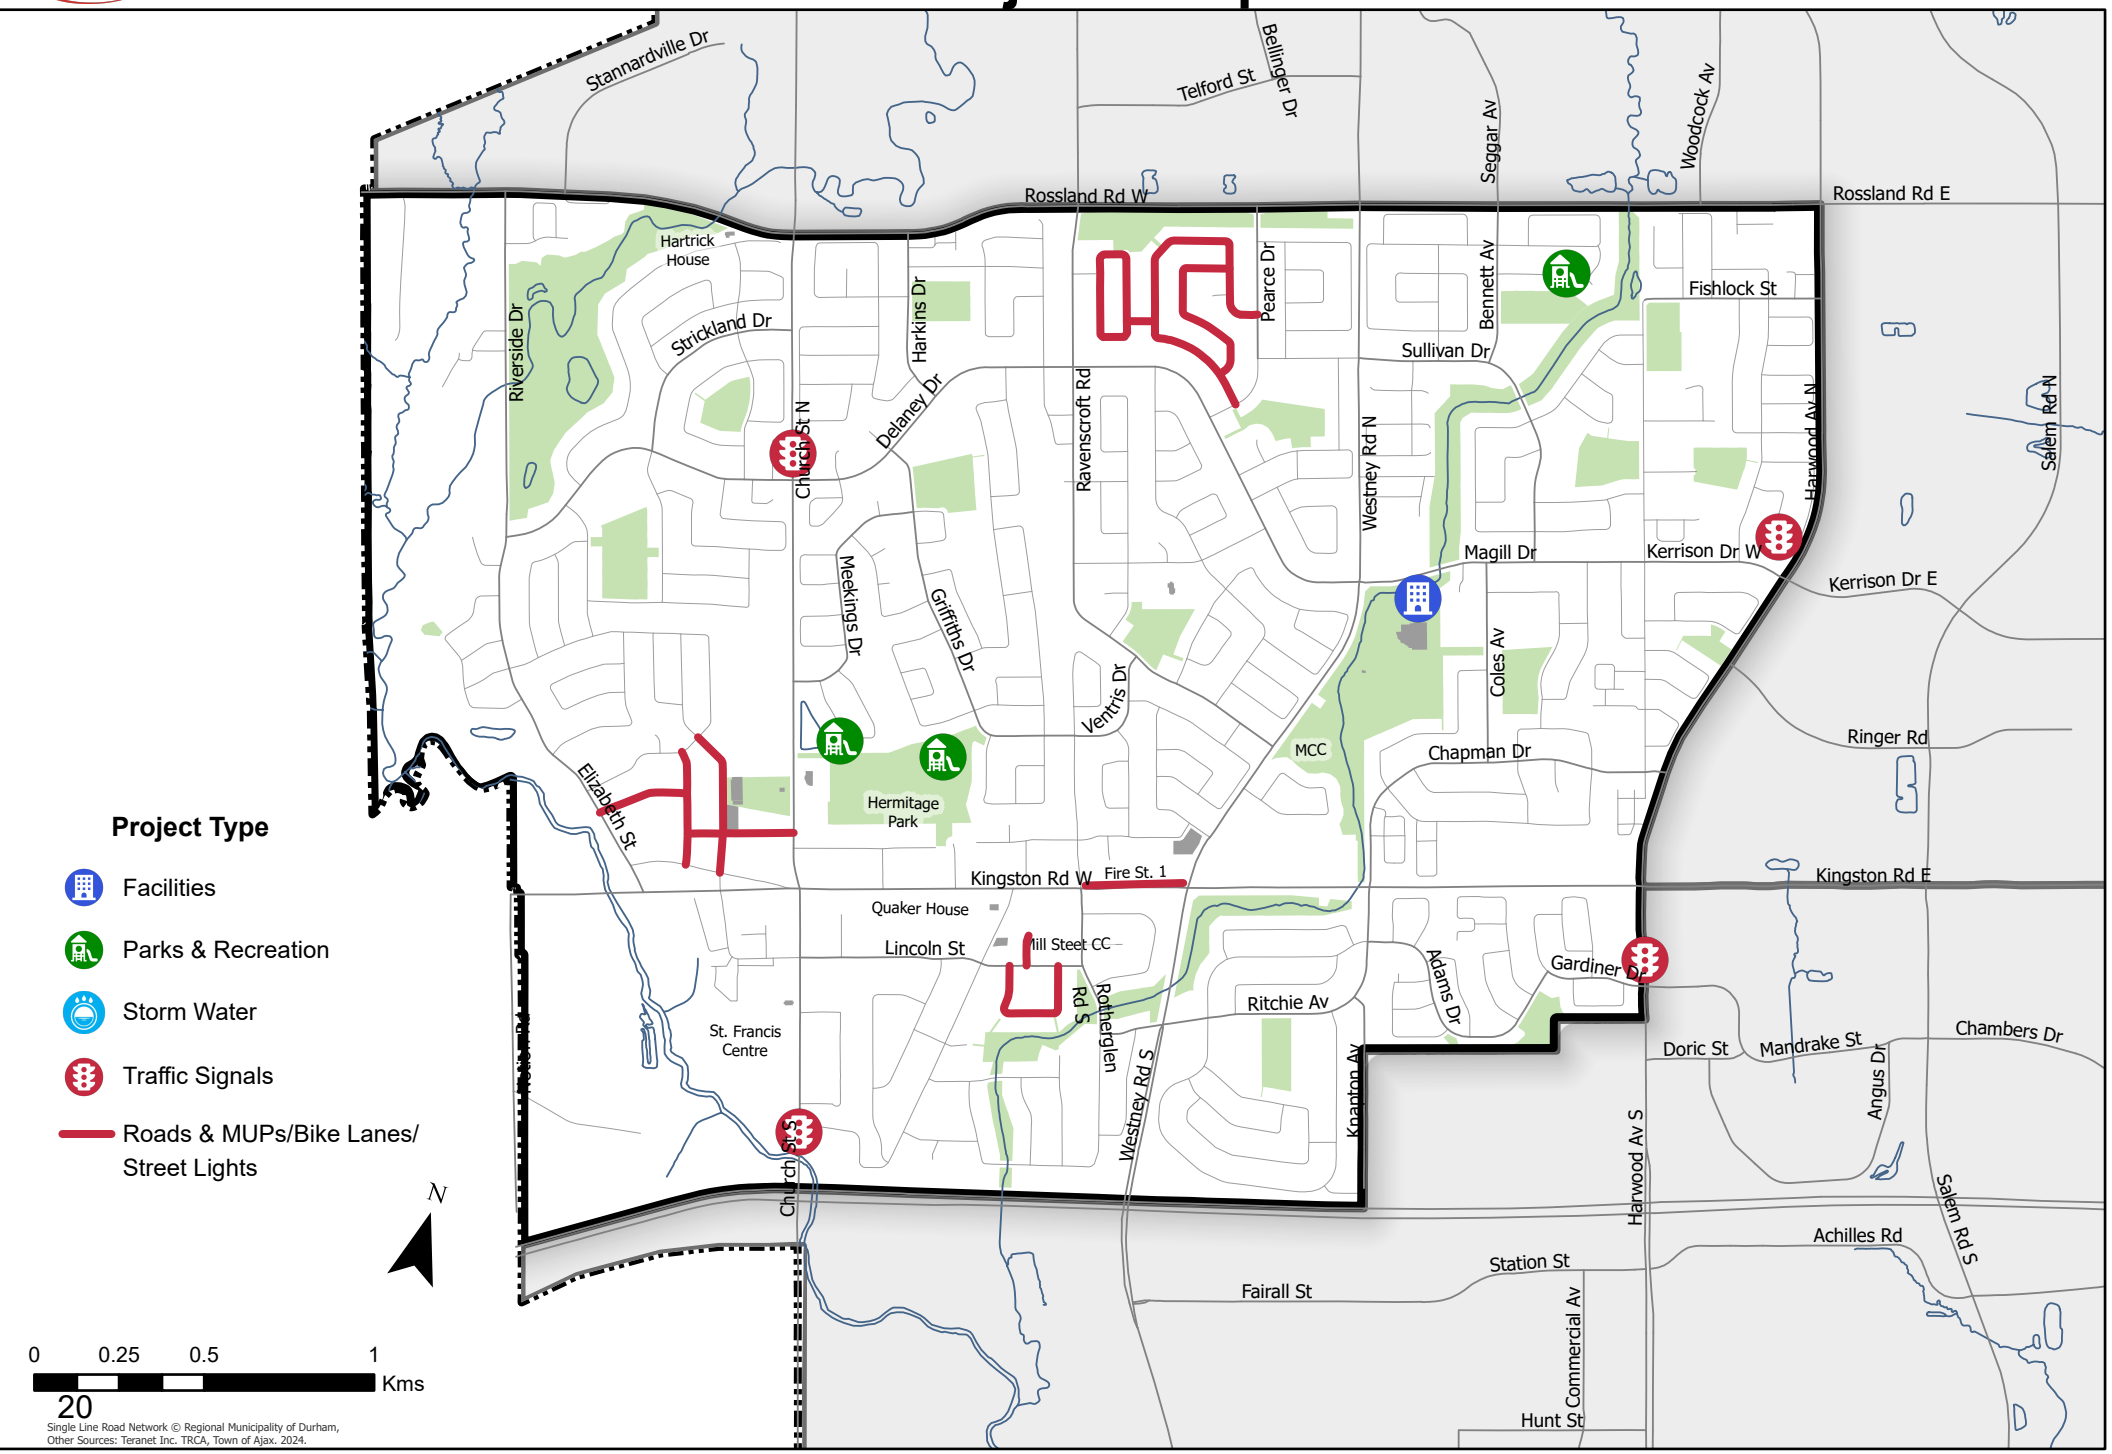

- Facilities
- Parks & Recreation
- Stormwater
- Traffic Signals
- Roads & Multi Use Paths, Bike Lanes and Streetlights

These maps are also available online at **ajax.ca/capitalprojects** where the project names can be viewed by hovering over the location with a cursor.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Community Risk Assessment**		
Project	24000801	**Initially budgeted in**	2022
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2025	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Staff are proposing that a comprehensive study be completed to prepare an updated Community Risk Assessment. The last Community Risk Assessment was completed in 2021.

Rationale: The May 2021 Fire Master Plan Recommendation #5 states that O. Reg. 378/18 requires the completion of a new community risk assessment at least every five years. Community risk assessments allow fire departments to make informed decisions about the types and levels of fire protection services they will provide based on identified risks. By identifying all fire and life safety risks in their community and prioritizing them based on the probability of occurrence and the impact they would have if they occurred, fire departments are able to determine which risks to address and how best to address them. Risk assessments allow fire departments to ensure their levels of service, programs and activities for public fire safety education, Fire Code inspections and enforcement, and emergency response directly address the identified risks and are most effective at preventing and mitigating them.

Reference: Ajax Fire & Emergency Services May 2021 Fire Master Plan, OFMEM-TG-02-2019, O. Reg. 378/18.

Schedule: The work will begin in 2025 with the final report being ready to meet the regulatory requirements of having it prepared for 2026.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Corporate Technology & Digital Strategy**		
Project	25000901	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2025	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: A Corporate Technology & Digital Strategy will help to focus the Town's technology investment into the highest-value activities by realizing benefits such as streamlining internal business processes, and creating a more agile organization that can quickly and effectively meet the needs of the public and end users. A key goal will also be to make it easier and more seamless for customers to interact and transact with the Town and engage in processes that reflect the modern expectations of customers. This project will be corporately driven and led by the Senior Management Team with the strategy being completed by a third-party expert. Input will be obtained from staff at all levels, from members of Council, and from our customers.

Rationale: Technology is critical to the delivery of services being offered by the Town of Ajax. In 2020, the Town undertook a Corporate IT Strategic Plan (ITSP) that identified a number of improvements that were required to be made over the next five years to improve the technology posture and to enable the Town to enhance its service offerings to its customers. The Corporate IT Strategic Plan was successfully implemented with the support of Senior Management and Council and the Town is ready to make improvements to its digital offerings for staff and residents. The current Corporate IT Strategic Plan provided a work plan until the end of 2024. The focus of that plan was to enhance the "base" technology that the Town uses and improve the technology stack before customer facing digital enhancements could be made. With these changes in place, an updated plan is required for the next 4 years to guide the Town's journey towards digitization and technology-supported efficiencies.

Reference: 2020 Information Technology Strategic Plan, 2022-2026 Strategic Plan, Customer Service Strategy, Corporate Records and Information Strategy

Schedule: February 2025 – August 2025

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Incl Zoning Housing Assess Report and OP Amend**		
Project	26000901	**Initially budgeted in**	2023
Submitted By	Stev Andis, Manager of Planning	**Department**	Planning & Development Services
Start Year	2025	**Section**	Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Under the Planning Act, Municipalities are permitted to pass by-laws to implement Inclusionary Zoning within a Protected Major Transit Station Area (Ajax GO Station). Inclusionary Zoning is a tool that allows the municipality to require a minimum number of affordable housing units within new development. The Inclusionary Zoning Housing Assessment Report and Official Plan Amendment will examine and report on the prescribed housing information and assist staff in the preparation of an Official Plan Amendment to authorize Inclusionary Zoning. An implementing by-law will also be prepared.

Rationale: Prior to implementing Inclusionary Zoning, a municipality is required to prepare an Assessment Report that examines the prescribed information relating to affordable housing units and prescribed persons. This report is required to supplement work completed by the Region of Durham to enable Ajax to proceed with requiring Inclusionary Zoning. This is a Housing Accelerator Fund initiative.

References: Planning Act; Town of Ajax Official Plan; Ajax Housing Strategy.

Schedule: The Inclusionary Zoning Housing Assessment Report and Official Plan Amendment will commence in 2024 as this is an initiative under the Housing Accelerator Fund.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Traffic Calming Warrant Update 2026**		
Project	24000701	**Initially budgeted in**	2022
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2026	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: An update to the Town of Ajax Traffic Calming Warrant and Process, taking into account experience since the adoption of the current process in 2020 and applying current best practices.

Rationale: The Town receives numerous public requests for traffic calming on streets throughout the Town in any given year. The Traffic Calming Warrant framework and process which was completed in October 2020 provided an updated approach and framework for scoring and ranking candidate sites based on observed conditions.

In order to ensure the warrant appropriately addresses the complex and intricate traffic issues on local roads it is important to update the warrant every five years. This helps ensure the traffic calming program and warrant process is sufficiently responsive to location conditions and traffic calming priorities.

Reference: Traffic Calming Warrant 2020.

Schedule: The Traffic Calming Warrant Update is anticipated to commence in 2026 and be completed in 2027.

Project Name	**Fire Station Location Study**		
Project	24004301	**Initially budgeted in**	2022
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2026	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Staff are proposing that a comprehensive Fire Station Location study be completed. This study will ensure future fire stations are placed in appropriate locations after considering all the facts and research.

Rationale: The May 2021 Fire Master Plan recommendation #24 states that as the Town continues to grow an in-depth fire station location study should be considered by Council. The Town has developed an changed throughout the years and is continuing to grow and intensify. A comprehensive study should be completed providing various options for fire station locations. The study will identify if there is a need for fire stations to be built , renovated or relocated to achieve the best coverage .

Reference: Ajax Fire & Emergency Services May 2021 Fire Master Plan.

Schedule: This work will begin in 2026 with the final report being ready by 2027.

DETAIL SHEET

Project Name	**Lower Duffins Special Policy Area Review**		
Project	24090101	**Initially budgeted in**	2021
Submitted By	Stev Andis, Manager of Planning	**Department**	Planning & Development Services
Start Year	2026	**Section**	Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: A review of the lands that are susceptible to flooding within the designated Special Policy Area (SPA) along Church Street and Notion Road, south of Kingston Road. The entire SPA extends into the City of Pickering and the study will be undertaken in consultation with Pickering staff and the Toronto Regional Conservation Authority (TRCA). Future development within Seaton may have downstream impacts on this study area. The study will require floodplain modeling to confirm the extent of the area susceptible to flooding and to inform appropriate development restrictions for this area.

Rationale: The study will address the Official Plan policies and designations that were deferred by the Region of Durham, the Ministry of Municipal Affairs and Housing (MMAH), and the Ministry of Natural Resources (MNR) due to the SPA. The Provincial Policy Statement (PPS) requires that the policy changes proposed for Special Policy Areas must be approved by MMAH and MNR prior to being approved by Council. It is necessary to confirm the SPA boundaries and establish appropriate development permissions in order to guide redevelopment.

Reference: 2019 Recreation and Parks Master Plan; Town of Ajax Official Plan (OPA 32); and 2018 DC Background Study Amendment (2020), Item 20A07.

Schedule: This project would commence in 2026.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Municipal Tree Inventory Update and Condition Assmt**		
Project	25004001	**Initially budgeted in**	2025
Submitted By	Tim Field, Manager of Environmental Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Environmental Services

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The needs and condition assessment of the municipal trees will be conducted by an arborist. Through detailed inspections of the urban forest, the arborist will provide an updated inventory and condition assessment provided to the Town of Ajax.

Rationale: Municipal trees need to be assessed, have their condition assessed, and measurements such as DBH, Crown Diameter and Height recorded. The Consultant's assessment provides staff with the understanding of the condition of these assets, the recommended improvements, the recommended timing of the work and the costs associated with the works. The Crown Diameter is important to calculate the tree canopy coverage throughout the Town. Knowing the condition of the individual trees and the location of various species is crucial for determining the effects of diseases and pests such as the Emerald Ash Borer that decimated the Town's Green Ash and White Ash tree populations. There are future pests such as the Long-horned Pine Beetle that are currently being monitored.

References: 2022-2026 Strategic Plan's third pillar, Modernizing our Community - Demonstrate sound financial management Infrastructure Management (Asset Management). This project responds to the Corporate Asset Management Plan Recommendation #9 by updating the condition of the trees and providing more accurate future spending needs.

Schedule: Consultant Inspections 2026/2027. This peer review should be conducted every seven (7) years to reduce the risk of failure of these assets

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Stormwater Capacity Analysis**		
Project	26001301	**Initially budgeted in**	2024
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2026	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Evaluation of the current operating state of the stormwater network in intensification areas of the Town. The project will make recommendations for upgrades in the Town's storm sewer system where required.

Rationale: Intensification and urbanization increases stormwater runoff and decreases water quality. This project is aimed at analyzing the stormwater management system in the areas of the Town with proposed infill intensification and will identify areas at risk of surcharging/flooding and opportunities for improving stormwater quality. These areas include those covered in the Uptown Intensification Study and the Central Ajax Employment Area Intensification Study.

Reference:Town of Ajax 2022-2026 Strategic Plan, Pillar 3: Modernizing Our Community, Priority 1: Preserve and enhance green spaces and water quality ; Town's Official Plan Sections 2.2.4 and 4.2.4. of improving the quality of stormwater discharged to Lake Ontario, our primary source for drinking water; Stormwater Quality Retrofit Study 2011

Schedule: 2026

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Parking Master Plan**		
Project	27000601	**Initially budgeted in**	2025
Submitted By	Planning & Development Services	**Department**	Planning & Development Services
Start Year	2026	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Parking Master Plan (PMP) will provide forward looking long-term vision, plans, policies, guidelines, and implementation strategy for parking management based on the principles of sustainability and affordability. The PMP will provide direction for a coordinated, strategic approach to parking policy, planning, financial sustainability and enforcement for the Town of Ajax that aligns with other town-wide policies related to transportation and land use planning. The key objectives of the Town-wide Parking Master Plan are to strategically connect parking with land use planning, Transportation Demand Management (TDM), Transit and other 'town building' initiatives; create a parking management framework using a 'best practices' approach with a focus on customer service; develop strategies which support business and economic development; provide options for future on-street and off-street parking infrastructure needs; and develop a financial model to ensure sustainability.

Rationale: The Town is receiving numerous high density mixed-use development applications with reduced parking rates. A PMP will review area-specific parking needs and opportunities and recommend potential changes to the Town's Zoning By-law (i.e., parking rates for different precincts such as Downtown/Midtown/ Uptown, Pickering Village, MTSA, Employment Areas, Kingston Road Corridor - Transit Oriented Development, etc.) and the Official Plan.
The PMP recommended plans, policies, guidelines, standards, and implementation strategy will feed into the Town's Comprehensive Zoning By-law, Shared Parking Policy, Official Plan Review, Integrated Transportation Master Plan Update, Cash-in-Lieu Parking Policy, etc. and provide a forward-looking policy planning framework. The PMP will review the current inventory of on-street and off-street parking facilities and provide valuable direction and guidance on future parking infrastructure needs, financial considerations (current sources of revenue, future funding options, future pricing for parking), technology and innovation, payment methods, parking enforcement technology, parking data collection and management, and digital signage and wayfinding. This project will also identify future capital infrastructure needs for on-street and off-street parking facilities, which can be included in the Town's Development Charge Background Study and/or Community Benefit Charge (CBC) By-law and used to fund future parking infrastructure needs

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Waterfront Management Plan**		
Project	24000501	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project involves an update to the existing Waterfront Management Plan. The scope of the project will include a review of the Town's vision for the Waterfront. The vision will incorporate key elements such as the built environment, environmental issues and needs, active and passive transportation and recreation, pedestrian and vehicular connections, economic benefits, Town events, parking, lighting, trail twinning, and other elements found within the current plan that require review. The update will also include public involvement, inclusive of residents, Council, staff, outside agencies, and special interest groups.

Rationale: The current Waterfront Management Plan was completed in 2005 and an update is required to reflect the changing needs of the community. The plan will incorporate contemporary ideas and trends as well as the current and future needs of a changing and dynamic demographic.

Reference: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendation #41 by updating the plan to reflect related pressures attributed to growth within the waterfront area.

Schedule: 2027 to 2028

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Economic Development Strategy Update**		
Project	25000401	**Initially budgeted in**	2021
Submitted By	Kassandra Cruciano, Manager of Strategic Affairs	**Department**	Public & Strategic Affairs
Start Year	2027	**Section**	Public & Strategic Affairs

PROJECT DESCRIPTION / JUSTIFICATION

Scope: An update to the 2021 Economic Development Strategy will provide a tactical action plan for:
- positioning the Town of Ajax as a leader in business retention, expansion and attraction
- furthering the Town of Ajax brand as a home for innovation, business incubation, and workforce development
- advocating for and supporting attractive place development
- ensuring organizational readiness to support growth and development opportunities

Rationale: The update of the Economic Development Strategy is intended to align with Council priorities specific to facilitating job creation and employment opportunities. An updated 5-year plan will provide clear direction and focus, producing effective use of resources, people and funds. It will require updated 2025 data from Statistics Canada and will incorporate Council direction following the 2022 municipal election.

Reference: 2021-2025 Economic Development Strategy

Schedule: Research and consultation with internal and external stakeholders will begin in the first quarter of 2027, followed by completion of a draft document that will be submitted to stakeholders for comment in late summer/early fall. The final 5-year strategy covering 2028-2032 is anticipated to be presented to Council in early 2028.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Complete Street Design Guidelines**		
Project	25001701	**Initially budgeted in**	2024
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2027	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Develop a Complete Streets Design Guidelines specifically for the Town of Ajax that serves as a guide to staff for planning, designing and implementing multi-modal supportive transportation corridors, including adopting a Multi-Modal Level of Service (MMLOS) evaluation framework for transportation planning.

Rationale: The importance of complete streets is recognized by the Town and addressed in several planning documents including the 2010 Pedestrian and Bicycle Master Plan, 2013 Transportation Master Plan, 2016 Official Plan, 2019 Integrated Transportation Master Plan and 2023 Transportation Demand Management Plan. These planning documents address various elements of Complete Streets including: surrounding land-uses, the intended roadway function within the overall transportation network, traffic volumes, existing travel modes, cyclist and pedestrian demand, transit services, utilities, and right-of-way.

Complete streets are streets for all modes and users of all abilities. Focused on a higher standard of design for the common good of the public, Complete Streets have the potential to enhance the Town's quality of life by promoting transportation options, improving public health and safety, enhancing community livability and economic vitality, and promoting environmental sustainability.

There is an opportunity to operationalize the Complete Streets policy detailed in the Integrated Transportation Master Plan to provide attractive streets while simultaneously supporting improved multi-modal operations as a way of reducing dependency on cars. A Complete Streets Design Manual for the Town of Ajax can serve as a multi-modal tool for implementing the better, safer more liveable streets.

Reference: 2023 Transportation Demand Management Plan Update; 2019 Integrated Transportation Master Plan Update

Schedule: This project is anticipated to commence in 2027.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Development Appl Approval Process Update**		
Project	26000101	**Initially budgeted in**	2022
Submitted By	Steven McReelis, Manager Building Services & Chief Building Official	**Department**	Planning & Development Services
Start Year	2027	**Section**	Building Approvals

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Building Code Statute Law Amendment Act, 2002, requires municipalities to establish fees under the Act, in that: "The total amount of the fees authorized under clause 7(1)(c) must not exceed the anticipated reasonable cost of the principal authority to administer and enforce this Act in its area of jurisdiction." The user fees review also covers the front-end Planning Act mandated component of the development process and the Municipal Act mandated fee activity involving engineering development agreement processes that are initiated after draft plan sub-division and site plan approvals.

The review and analysis of Planning, Building and Engineering activities will establish baseline costs and provide recommendations whether or not fee changes are warranted. Model principles and processes are also compared with other Ontario Municipalities.

Rationale: The use of an activity based costing model will assist staff in Planning, Building Approvals, and Development Engineering in the Town's ongoing efforts to achieve compliance with the fee design provisions of the Ontario Building Code Act and reinforces customer service commitment by documenting DAAP operational processes.

The Town's model will be updated to reflect current costs, staff resources, and most recent development projections. The analysis of these inputs determines the recommended fee changes required to achieve an appropriate level of funding for the administration and enforcement of the Building Code Act in Ajax.

Reference: Building Code Statute Law Amendment Act, 2002, 2022 Development Application Approval Process Review, Section 69 of the Planning Act

Schedule: Project is anticipated to be completed every 5 years.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**GIS and Data Strategic Plan**		
Project	26000601	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2027	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Town of Ajax has had Geographic Information System (GIS) capabilities since the early 2000s and it is used by all business departments. This strategic plan will evaluate the progress made from the current GIS Strategic plan (2022) and make new recommendations through a review by a third-party. With the planned further investment in GIS resources recommended by the IT strategy and the GIS Strategy, a review and update of this strategy is necessary to help guide the GIS roadmap for the Town. The GIS strategy will:

- Identify the current state of the GIS - Perform a health check
- Recommend future state of the GIS
- Outline tangible/achievable action items as part of the strategy and a structured work plan
- Development of GIS related policies

Rationale: A GIS Strategy is necessary to raise awareness of GIS potential beyond the existing use. The process will engage staff across the Town, from decision makers to front-line customer service staff, to seek their ideas to inform the plan. The end result will be a well-rounded strategy driven by the business area requirements for new services, not by the technical people delivering them. One of the priorities for the Town of Ajax Technology and Innovation section is the GIS (Geographic Information System). It is estimated that over 80% of municipal business inquiries and work plans relates to a physical location (an address, an asset or a service point), thus the GIS should support over 80% of the Town's business.
A successful GIS service requires more than just a reliable IT solution. The Town of Ajax is responsible for planning and delivering services that touch everyone, every day. These decisions should be based on evidence to ensure that the Town is fulfilling real needs. An effective GIS will assist in the creation and maintenance of information to provide the evidence and deliver it to decision makers in an easy-to-understand format.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Comprehensive Zoning By-law Review**		
Project	27090101	**Initially budgeted in**	2022
Submitted By	Stev Andis, Manager of Planning	**Department**	Planning & Development Services
Start Year	2027	**Section**	Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Under the Planning Act, municipalities are required to amend their zoning by-laws to conform with Provincial Plans (including the Greenbelt Plan and the Growth Plan) and Official Plans. The Town of Ajax Zoning By-law 95-2003 predates the current provincial planning documents, and a comprehensive update including a review of land use permissions, densities, performance standards and implementation procedures is necessary. The Region's Municipal Comprehensive Review of the Region's Official Plan was completed in 2023; which will result in changes to the Town' land use structure. The Town has also initiated an Official Plan Review beginning in 2024, and any updates will be required to be implemented.

Rationale: It is a statutory requirement that zoning by-laws implement municipal Official Plans. The Town's Official Plan review, initiated in 2024, is targeted to be in effect by 2028. Changes to the zoning by-law are required. Changes will implement the provincially mandated intensification targets, development performance standards to implement built form policies, and may result in the implementation of zoning with conditions, technical amendments and related matters. Throughout the process, there will be a number of public meetings scheduled to keep residents informed of both study progress and draft regulations.

References: Planning Act; Town of Ajax Official Plan; 2018 DC Background Study Amendment (2020), Item 20A10.

Schedule: The Comprehensive Zoning By-Law Update will commence in 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Recreation and Parks Master Plan Addendum (Parks Plan Update)**		
Project	27090103	**Initially budgeted in**	2024
Submitted By	Stev Andis, Manager of Planning	**Department**	Planning & Development Services
Start Year	2027	**Section**	Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: In 2022, the Town completed the Recreation and Parks Master Plan. The purpose of this project is to update the parkland assessment of the Plan to evaluate the amount of parkland that the Town has acquired since 2022; assess parkland that is proposed to be conveyed to the Town in the near future; add parkland identified in secondary plans within intensification areas; and evaluate the amount and location of parkland that the Town currently has against existing and planned population and employment growth. This project will examine the planned parkland level of service and determine the Town's needs moving forward. This project is proposed to be completed as an addendum to the Recreation and Parks Master Plan.

Rationale: Under the Planning Act, the Town is required to prepare a Parks Plan to support implementation of a Parkland Dedication By-law to permit utilization of the alternative rate. As the Town is planning to complete a 5-year update of the Parkland Dedication By-law in 2028, a 5-year update of the parkland component of the Recreation and Parks Master Plan is required to be completed in advance of the parkland dedication by-law update.

Reference: Planning Act, Parkland Dedication By-law No. 60-2022, Recreation and Parks Master Plan 2022, DC Background Study, Community Benefits Charge Strategy

Schedule: This project is planned to be completed in 2027, in advance of the Parkland Dedication By-law Review in 2028

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Human Res Mgmt System (HRMS)**		
Project	23001801	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2023	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The focus of this project is to implement the Human Resource Management System (HRMS) that has been procured by the Town. This solution provides the Town with a centralized, modern, and fully integrated platform where HR and payroll data can be input, stored, tracked, managed and analyzed. The solution will be leveraged by all departments. Led by the IT Project Services Team and HR, this project has been underway since 2022. This project has involved input and participation from all departments which has been key in selecting the appropriate solution for the Town. To date staff have successfully completed all the steps required to select and award the solution. The delivery of this project will take place over two phases, with the highest priority processes being completed in Phase 1. Training and Implementation commenced in July 2024 and the project is expected to be completed in Q4 of 2025 with several milestones and deliverables to be completed throughout 2025.

Rationale: Currently, the Town has a patchwork of un-integrated systems that manage employee attendance, demographics, payroll, etc. in an inefficient manner that produces limited business value. The solution that has been selected will meet the needs by:

- Increasing productivity by automating processes
- Reducing duplication of work and manual processing errors
- Improving operational efficiency by simplifying, updating and reporting on employee data
- Allowing the Town to make informed decisions by using analytics and reporting function for budgets, forecasting labour negotiations, etc.
- Promoting better employee experience by allowing self-serve functions
- Ensuring that the Town is meeting legislative requirements
- Eliminating manual, paper-based time sheets
- Integrating with accounting and budgeting software
- Elimination of duplicate systems and applications

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Customer Relationship Mngmt**		
Project	24001101	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2024	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Customer relationship management (CRM) system aims to enhance citizen engagement and operational efficiency within the Town. By centralizing and automating interactions with citizens, businesses, and other stakeholders, the CRM system will streamline processes, improve service delivery, and facilitate data-driven decision-making. Compiling data from a range of communication channels, including website, telephone, email, live chat and social media, and better manage customer inputs (complaints, compliments, requests, work orders, etc.). Currently, all our customer feedback is managed in individual software programs in each department (e.g. AMANDA, Excel, Word, CityWorks, etc.) This request specifically captures the second half of the CRM project as it is already underway with the use of InfoTech to identify the Town' s needs through staff workshops and NRFP document creation. Thus far the Town has identified a project team, and a Customer Experience Team (CET) to facilitate implementation. Staff continue to develop current state process maps and identify systems, customer service methods, and information captured in systems through a customer service lens. The scope of work will include technology infrastructure and licencing, required contract staff, training, knowledge base development, and communications and departmental implementation and customer service channel integration.

Rationale: A CRM system was identified as the main recommendation of the Council-approved Customer Service Strategy in December 2023. The system will enable the Town to:

-Leverage the analytical capabilities to create metrics and trends (currently non-existent or clumsy)

-Identify problematic or high-needs areas using GIS integration

-Integrate with other corporate software to enhance the customer experience

-Increase transparency by providing customers a response in real time and enabling them to track their own inquiries

-Implement the software across all departments for cohesive customer experience

-Create a knowledge base of scripted answers to commonly asked questions

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Financial System Reporting Solution**		
Project	25002901	**Initially budgeted in**	2025
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2025	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is to procure a financial system reporting software that can help the Town of Ajax overcome current reporting challenges with its financial systems. The solution can connect to various data sources, such as databases, spreadsheets, and web services, and transform them into interactive and visual reports. The solution will also automate the reporting process, by scheduling, emailing, and publishing reports on a regular basis. This project will involve the procurement of a solution, technology infrastructure setup and vendor support for implementation.

Rationale: This solution can help the Town of Ajax improve its data management and decision making, by providing the following benefits:

- Increased efficiency and productivity: reduce the time and effort required to create and update reports, by eliminating manual data entry, simplifying data manipulation, and providing ready-made templates and charts. Users can also access and update reports without installing any other software or relying on IT support.
- Improved accuracy and reliability: provides accurate and reliable reports, by validating the data sources, applying consistent calculations and formulas, and updating the reports automatically. Users can also drill down into the data, filter and sort the information, and export the reports to various formats, such as PDF and Excel.
- Enhanced insight and analysis: presents the data in a clear and visual way, using charts, graphs, and maps. Users can also customize the reports, by adding parameters, indicators, and comments, and compare the data across different software applications.
- Optimized performance and planning: help the Town of Ajax optimize its performance and planning, by enabling the users to monitor the key performance indicators, identify the trends and patterns, and discover the strengths and weaknesses of their operations.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Hardware Replacement 2025**		
Project	25010305	**Initially budgeted in**	2021
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2025	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The hardware replacement program captures costs related to the Town's replacement and management of technology infrastructure which supports the daily functions of the corporation. This technology consists of over 250 pieces of infrastructure which includes but is not limited to: servers, hosts, SANs, firewalls, backup hardware, switches, access controllers and access points. Projects are driven by diligent life-cycling of the Town's technology assets, and are prioritized to ensure that the Town has secure, reliable systems in place to support the delivery of Town services.

Rationale: Infrastructure equipment is replaced on a specific cycle. These cycles are based on industry best practices and designed to mitigate downtime, maintenance costs and productivity loss. These life cycles typically range from four to five years, depending on the specific equipment and usage history. For example, servers are replaced on a controlled basis to ensure that the technology meets the current security standards and operating systems required. Of note, if a specific piece of hardware is functioning and poses no risk to the Town, it will not be replaced.

Reference: 2020 Information Technology Strategic Plan, Corporate Asset Management Plan

Schedule: Hardware replacements are scheduled throughout the year.

EXPENDITURES / FUNDING

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Ajax.ca Redesign 2025**		
Project	23010302	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2025	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Ajax.ca is the Town of Ajax's online hub, attracting two million visitors annually (Google Analytics). This project will involve developing a detailed project plan and timeline for the website redesign, including stakeholder engagement, vendor selection, content migration, quality assurance, and launch. It will include designing and developing a new website that meets the objectives and requirements of the project, using a modern and user-friendly content management system (CMS). Additionally, training and support will be provided for the website administrators and editors on how to use the new CMS and maintain the website content and evaluating the success and impact of the website redesign, using key performance indicators (KPIs) and metrics.

Rationale: As a result of modern technology advances and the pandemic, consumer expectations for municipal websites have become significant and multifaceted. The current website technology does not allow the Town to successfully adapt to these growing needs of our residents, customers, or businesses. This project will provide an opportunity to improve the online user experience and ensure an intuitive, easy to navigate customer focused website that includes offering a broader range of self-service options, e-commerce opportunities, seamless feedback for customer inquiries and modern accessibility options. This project will improve the digital offerings by integrating with corporate systems such as the future Customer Relationship Management System (CRM), Geographic Information Systems (GIS) and the Work Order Management System.

DETAIL SHEET

Amended

Project Name	**Emergency Operations Centre (EOC) Upgrades**		
Project	25010306	**Initially budgeted in**	2025
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2025	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Town's emergency operations centre (EOC) is the central hub for coordinating the response to any major incident or disaster that affects the community. The current EOC technology is outdated, unreliable, and incompatible with the latest standards and best practices for emergency management. The Town needs to upgrade its EOC technology to enhance its situational awareness, communication, collaboration, and decision-making capabilities during emergencies. The proposed upgrade will involve replacing the existing hardware and software with a modern, integrated, and user-friendly system that meets the current and future needs of the primary and secondary EOC locations.

Rationale: The upgrade will provide significant benefits for the Town:

-Improve the safety and security of the Town and its residents by enabling the EOC to respond more quickly, effectively, and comprehensively to any emergency.

-Will reduce the risk and liability of the Town and its staff by minimizing the potential for errors, delays, and failures that could result from the use of outdated, unreliable, and incompatible technology.

-Will increase the efficiency and effectiveness of the EOC by streamlining the information and communication processes, reducing the workload and stress, and improving the collaboration and coordination among the EOC staff and stakeholders.

-Will enhance the reputation and trust of the Town and its leadership by demonstrating the Town's commitment, preparedness, and professionalism in emergency management.

-Will also provide other benefits, such as: saving operational and maintenance costs, increasing customer satisfaction, attracting and retaining qualified staff, and supporting innovation and continuous improvement

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Records and Information Management Solution**		
Project	26001401	**Initially budgeted in**	2025
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2026	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Town relies on an outdated and inefficient Records and Information Management System (RIMS) that does not meet staff needs. The existing RIMS has several limitations, such as poor search functionality, lack of integration with other systems and high maintenance costs. A new RIMS will provide the Town with a modern, user-friendly, and cost-effective solution that will improve the accessibility, accuracy, and accountability of the Town's records and information. The Town will look at leveraging current technologies that it already has in place to make best use of its available technology. This project will include the hiring of a vendor to support the implementation of the solution using town-owned tools, potential procurement of third-party software add-on's to enhance the solution, vendor project management and delivering training for Town staff on the solution. This project will also include funds for an additional FTE who will support project implementation and administer the solution after the project's closure. This project will be implemented

following the completion of the Records and Information Management Strategy and approval of its recommendations.

Rationale: A new RIMS will benefit the Town in several ways: -Enhance the efficiency and productivity of staff who need to access, manage, and share records and information.

-Offer advanced search capabilities, automated workflows, and seamless integration with other systems, such as email, document management, and GIS.

-Improve the compliance and security of the Town's records and information.

-Enable the Town to adhere to the provincial and federal legislation and regulations regarding the retention, disposition, and protection of records and information.

-Provide the Town with better control and oversight over the access and use of records and information, ensuring that only authorized users can view, edit, or delete sensitive or confidential data.

-Support the Town's disaster recovery and business continuity plans by ensuring that records and information are backed up and stored in a secure and reliable location.

-Will support the Town's strategic goals and objectives by providing the Town with accurate and timely information for decision making, reporting, and performance measurement.

-Enable the Town to collect, analyze, and visualize data from various sources and generate reports and dashboards that show the progress and outcomes of the Town's programs, services, and initiatives.

-Facilitate the communication and collaboration among staff, stakeholders, and the public by allowing the Town to share records and information through different channels, such as web portals, social media, or mobile devices.

DETAIL SHEET

Project Name	**Repl. Apparatus Laptops / Tablets**		
Project	25010301	**Initially budgeted in**	2021
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2026	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the replacement of equipment required to operate the computer aided dispatch software (CAD) on the fire apparatus. These laptops / tablets allow fire suppression crews to access important pre-fire planning documents while on site at emergency scenes as well as response information, maps and details of emergency calls. This project is specific to 7 vehicle computers, as well as 11 vehicle mounting hardware. The computers are being purchased for the front line apparatus vehicles. The mounting hardware is being installed in all apparatus vehicles to ensure the computer can be relocated when going from front line to backup.

Rationale: This equipment is replaced on a 4 year cycle to ensure proper functionality and that the user needs are met. In this case, these devices are used during emergency response, making it extremely critical to keep the hardware in good working order.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Document Management System Replacement**		
Project	26010306	**Initially budgeted in**	2025
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2026	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Document Management System (DMS) is a vital corporate application that manages work instructions, policies, forms and other documents. The DMS allows access for anyone in the Town and ensures the documents utilized are the most current. The DMS also has multiple stage review and approval controls to maintain quality and consistency. Ensuring the DMS meets the needs of staff is crucial in order to ensure corporate documents are kept up to date, reviewed periodically, and audited consistently. Additional hardware, software and system storage may be required, including costs for user licencing.

Rationale: The Town's current document management system (DMS) is outdated, and inefficient:

- It is slow and unreliable and not compatible with modern technologies.
- It is not user-friendly or accessible, requiring extensive training and support for the staff
- Back end processes (e.g. updating settings, controls) is very time consuming and not intuitive for users
- Support from current vendor is unreliable

By replacing the current DMS with a new, modern, and secure system, the Town aims to achieve the following benefits:

- Improve the efficiency and productivity of staff
- Enhance the quality and availability of information, by ensuring its accuracy, completeness and consistency.
- Facilitate the compliance with relevant laws and regulations.
- Save costs and resources, by optimizing the use of current technology stack (if applicable) and reducing the need for maintenance and upgrades.
- Future-proof the information system, by adopting the best practices and standards in the industry and allowing for scalability and flexibility.

Project	26010303	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2026	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Tax software is a critical application used by the tax team in the finance department. An upgrade of the tax software to the latest version will ensure user needs are being met. This project will also include hardware technology upgrades, user training, testing and vendor project management support. The scope will also include a review of other tax software solutions.

Rationale: Upgrading the system every 5 years will allow the Town to ensure a high level of service for its users. These upgrades will also ensure any technology infrastructure used by the application are modern and secure.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Network and Security Architecture Review**		
Project	25001601	**Initially budgeted in**	2024
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2027	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Town's network is an extremely complex system of technology components. This complex system consists of several types of hardware, software, cloud systems, licences and physical connections between buildings to internal and external resources. All this technology is necessary for the Town to function daily in a secure manner. This project involves a third-party review of the current network architecture including a current state analysis, gap analysis and recommendations for improvements. This project will also include the cost of any hardware, software or licences required to remediate any findings.

Rationale: The speed at which technology changes typically happens faster than organizations can keep up with. Such a complex network requires a review on a regular basis. Although staff do monitor and control the network daily, having a third-party review the network as a "health check" is important for business continuity. Having a regular review such as this is an industry best practice and has been recommended by previous security audit and penetration tests.

DETAIL SHEET

Project Name	**Financial System Replacement**		
Project	26001101	**Initially budgeted in**	2024
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2027	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is to procure and implement a Corporate Financial system that provides the Town with a centralized, modern, and fully integrated platform where financial data can be input, stored, tracked, managed and analyzed. The solution will be a centralized, modern, and fully integrated platform that all business departments can leverage. This project will include: vendor professional services, vendor project management and business analysis, vendor training and support and participation by all departments to ensure the solution selected meets the needs of the corporation. This project budget also includes the hiring of one Senior Financial Analyst to support the implementation.

Rationale: This project will:

- Provide staff with a modern digital workplace by utilizing current and emerging modern computing platforms, Mobile, Cloud, Social, Collaboration, Web-based, device agnostic, integration-capable solutions to introduce efficiency to business processes.
- Consolidate and integrate systems to improve efficiency and data flow.
- Enhance data accuracy and visibility to provide real-time insights into financial performance
- Move from paper-based to digitized processes to reduce manual tasks and enhance productivity.
- Improve reporting and analysis to enable the generation of comprehensive financial reports

The Town currently has fragmented and disconnected financial systems across various business departments. Manual and paper-based processes hinder seamless collaboration, resulting in data challenges, delayed response times, and limited insights for decision-makers.

Project	25010302	**Initially budgeted in**	2022
Submitted By	Chris Walker, Chief Information Officer	**Department**	Corporate Services
Start Year	2027	**Section**	Technology & Innovation

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Geographic Information System (GIS) is considered a core technology at the Town of Ajax that is used by all business departments. This project will include the GIS upgrade and its infrastructure including but not limited to: databases, servers, web applications and desktop software.

This project will also require an upgrade to the Towns Work Order Management System CityWorks. CityWorks is heavily reliant upon and integrated with the GIS and requires an upgrade at the same time as the GIS to ensure integrations and functionality aren't negatively affected.

Rationale: Administered and maintained by the Technology and Innovation Division, the infrastructure it uses needs to be upgraded on a 5 year cycle to ensure it is kept in proper working order. The GIS is a corporate solution that is used by many staff and accessed by external stakeholders daily. It is important to maintain the system and infrastructure to ensure it is kept in good working order.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Main Branch - Space Revitalization Plan**		
Project	24071002	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Staff will retain a consultant to complete a space revitalization assessment and design for the layout of Main Branch. The results will provide direction, budget and rational for future refurbishment.

Rationale: The Main Branch Library was constructed in 2002 and has an approximate building area of 33,000 sq.ft. The two-storey library facility consists of a large library space, a community room and various staff areas.
The Library has grown and developed with the needs of the community. Due to increases in the variety and volume of use, the layout of the library struggles to meet the demands of customers. The Asset Management Plan and Building Condition Assessments have identified the need for updates to furniture, washroom, lighting, flooring. As such, the space planning assessment will review all aspects of the interior layout of the library amenities and propose modifications to better meet the needs of the community .

Reference : N/A

Schedule: The Town will retain a consultant to complete the study in the Spring 2026 with completion by the Fall 2026

DETAIL SHEET

Project Name	**PBS - Modular Access Platform**		
Project	25070904	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes engineering and fabrication of a new modular access platform for the Pat Bayly Square skating rink. Design will include modular sections of platform for convenient seasonal installation and removal as well as handrail for patron safety.

Rationale: The Ice Rink at Pat Bayly Square, which opened in 2018, has become a focal point for the community. There are currently two large temporary aluminum platforms that enable patrons to move from the surface level to a 16" deep ice sheet. The handrails, despite on-going repairs, are in poor condition. A more robust engineered system is required to ensure patron safety at this site.

Reference: N/A

Schedule: Detailed design will start in spring of 2026 with a completion date in Summer 2026. With fabrication work completed in Fall 2026.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Amended

Project Name	**MCC - Mezzanine Gym Storage Room**		
Project	26070404	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2028	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project entails building a mezzanine floor in the Gym storage room at the south end of the Gym, accessible via. a ladder at McLean Community Centre (MCC).

Rationale: Over the past decade, the Town has formed partnerships with organizations like YMCA, Sport Ball and Autism Home Base. The groups regularly use MCC throughout the year but face challenges transporting their equipment due to limited resources. Additionally, seasonal items like Christmas decorations, Snow Shoes and clothing for programs like March Break and Summer Camp are stored at MCC. Building related documents are also stored on site for extended periods. Previously, most items were stored in the basement, but the Town's Building Inspector advised against further storage in the basement. Hence, a need has been identified by the recreation group for additional storage.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities

Schedule: Design work to commence in spring 2028 with construction work to follow right after.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Pickering Village Redevelopm**		
Project	24004701	**Initially budgeted in**	2024
Submitted By	Dave Meredith, Director of Operations & Environmental Services	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The creation of a process to be used by the Town when proceeding with public-private partnerships for development, using the Pickering Village as a case study. This project will involve creating an internal process that identifies the Town's objectives for a particular project, opportunities and barriers, preliminary design and concept options, proponent and project evaluation criteria, agreement procedures, and other matters identified during the creation of the process.

Rationale: The Town has had limited experience with public-private partnerships (P3s), despite their ability to contribute to the Town's affordable housing objectives and other strategic redevelopment opportunities. The Town has identified a parcel of land in Pickering Village to serve as a pilot project for the development of this process. Early consultation work has been completed through the Town's Recreation and Parks Master Plan.

Reference : Action26 Strategic Plan. Recreation and Parks Master Plan. Housing Accelerator Fund grant program.

Schedule : Concept design and preliminary work to commence in Q1 2024 and with process complete in 2025.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**HQ Station 1 - Outdoor Training Shelter**		
Project	24001501	**Initially budgeted in**	2023
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2025	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The construction of a permanent 20ft x 20ft outdoor pavilion on the headquarters training grounds adjacent to the fire training tower. The pavilion would be built to similar specifications as other similar sized park pavilions found in Ajax's green spaces ie: Greenwood conservation area.

Rationale: The Ajax Fire & Emergency Services training ground is an outdoor facility that is regularly used by our fire suppression staff as well as colleges, private companies and other emergency services. Presently on-site we have a burn tower, self rescue maze, forcible entry props and roof prop. None of these provide safe shelter from weather elements. Students, fire crews and instructors should have a sheltered location that is large enough to hold their class out of the sun or rain, where they can speak and prepare or debrief with their classes. Portable shelters are currently being used. These shelters tend to be too small and often do not holdup well to winds. Generally, classes that take place on the training ground run from 8am to 4:30pm. Students and instructors spend that day out in the elements with little shelter unless they are conducting fire training (with gear on) inside the fire tower or maze under heat conditions. If the training ground is offered to other agencies as well as our own staff, facilities provided should provide an increased level of service to all internal and external stakeholders. It is recommended that a permanent shelter be built to properly accommodate classes that are being held at the training tower.

DETAIL SHEET

Project Name	**Security Upgrades - Service Counter Upgrades**		
Project	25000201	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes re-design of the main customer services counters by adding glass partitions to create a physical barrier between the public and staff to eliminate easy access to staff and workspaces behind the counter areas. These systems will be installed at the following facilities main service counters: Town Hall, Operations Centre, Ajax Community Centre, McLean Community Centre and Audley Recreation Centre.

Rationale: The Town undertook a security threat risk analysis and assessment in 2019. The assessment focused on the security of the Town Facilities along with existing policies and procedures to ensure the protection of the organization's facilities and equipment from unauthorized access. One of the recommendations identified adding glass partitions to the Town's main customer service counters to prevent unauthorized access behind the counters and to improve the safety of Town staff.

Reference: 2019 Security Threat Risk Analysis and Assessment, 2022-2026 Strategic Plan - Pillar 1: Connecting our Community (CC), CC Priority 4: Foster a safe and welcoming community 4.1 Increase a sense of safety and security for the community.

Schedule: The work will start in the spring of 2025 and be completed by summer of 2026.

DETAIL SHEET

Project Name	**ARC Phase 2 – Community Hall Blind Replacemt**		
Project	24070501	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the replacement of the automatic blinds in the Community Hall at Audley Recreation Centre (ARC).

Rationale: The material fabric of the automatic blinds located in the community hall at ARC have frayed and are no longer operational. Due to the material of the blinds fraying, they are being caught on the mechanisms to raise and lower them which has resulted in them being not operational. The blind material requires replacement with a more durable fabric suitable for the length and width of the existing blinds. The automatic mechanisms will be reused with a new fabric. Staff explored repair options and unfortunately there are no repairs possible besides replacement of the fabric.

Reference: 2023 Building Condition Assessment, 2024 Corporate Asset Management Plan.

DETAIL SHEET

Project Name	**Ajax Municipal Office – Guardrail Protection & Steel**		
Project	25010103	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for this project includes the installation of guardrail protection around roof hatch and a steel ladder that extends from the roof to the ground floor at Town Hall.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. As a result of the building condition assessment report, various deficiencies were noted including the installation of guardrail protection around roof hatch and new steel ladder as mentioned in the scope.

Guard Rail Protection: Existing hatches on the roof lack guardrail protection. Staff recommend the installation of guardrail protection around these hatches. This safety measure will help prevent accidental falls and ensure the well-being of individuals accessing the rooftop area.

Steel Ladders: There is no direct/optimal accessible route to access the hatch on the East section. Staff propose to install a steel ladder that extends from the roof to the ground floor. This ladder would serve as both an accessible pathway to the roof and a fire exit solution.

Reference: 2023 Building Condition Audits

Schedule: Detailed design will start in summer of 2025 with construction work scheduled in 2026.

Project	25070902	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes removal and upgrade of the existing lighting systems at the Ajax Memorial Pool with new high efficiency LED lighting fixtures. Staff will retain a consultant to provide detailed design and contract documents for this project.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. As a result of the building condition assessment report, various deficiencies were noted.

Building Exterior: The T5 soffit lights are in poor condition and will be replaced with LED fixtures.

Building Interior: The HID & T8 lighting throughout the interior of the building is in poor condition and will be replaced with LED fixtures in the short term.

Not completing this project as recommended by the building condition assessment will result in increased utility, maintenance and repair costs.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities, 2023 Building Condition Audits, 2024 Corporate Asset Management Plan

Schedule: Detailed design will start in summer of 2025 and construction will be completed in 2026.

DETAIL SHEET

Project Name	**Fire Station 2 Kitchen Reno**		
Project	23020002	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2023	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the replacement of the kitchen at Fire Station 2 (Monarch). Staff retained a consultant and completed the detailed design in 2023.

Rationale: Fire Station 2 was originally built in 1987 and the current kitchen was replaced in 2001. This kitchen has deteriorated whereby the cupboards and counter are in need of replacement. Staff have maintained this equipment however it is now in poor condition due to the high use at this station.

Reference: 2024 Corporate Asset Management Plan.

Schedule: The detailed design was completed in 2023. Construction will begin in Spring 2026.

EXPENDITURES / FUNDING

DETAIL SHEET

Project Name	**Town Hall-Mechanical Equip Repl**		
Project	26010103	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes replacement of the following mechanical equipment at Ajax Municipal Offices from an end-of-life perspective:

- A condenser unit installed on the North side of the roof is in poor condition. The unit is manufactured by 'Trane', Model No. SXHFC55E0767E8BD90002, serial No. C05C02067 with a capacity of 76 tons using R-22 refrigerant.
- There are a total of 4 cabinet-type exhaust fans located in the maintenance room, elevator machine rooms, and electrical closet.
- There are two mushroom-type exhaust fans installed on the South side of the roof.
- Install new exhaust fan serving the boiler room of the north basement complete with fresh air louver.

Rationale: In 2023, the Town retained a consultant to complete detailed building condition assessment reports for various Town facilities. As a result of these condition assessments, the above-mentioned mechanical equipment is recommended for replacement. The condition assessment report outlines various deficiencies related to the condition of the existing mechanical equipment in the building. If not addressed, these deficiencies may lead to malfunctioning of the equipment resulting in operational concerns with the exhaust system in the building. The existing condenser unit is past its median service life and uses R-22 refrigerant which is currently being phased out of use. The Building Maintenance team recommends replacing the equipment with a newer refrigerant that has lower global warming potential (GWP).

Reference: 2023 Building Condition Audits, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will start in spring of 2026 with a completion date in fall of 2026. Construction will follow in 2027.

Project	26072002	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for this project includes repairing the wall finish in the theatre and second floor mechanical room along with a refurbishment on the epoxy located on the slab-on-grade in the theater area and basement at the St. Francis Centre.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. As a result of these condition assessments, St Franscis Centre plaster & epoxy are recommended for repairs and replacement in 2026. The condition assessment report outlines various deficiencies including cracks, peeling, or discoloration.

If the noted conditions are not addressed, these deficiencies may lead to water infiltration that could damage the interior spaces of the facilities, potentially causing interruptions to service levels.

Reference: 2023 Building Condition Audits, 2024 Corporate Asset Management Plan.

Schedule: The plaster and epoxy replacement construction will begin in Spring of 2026 with a completion date in Summer of 2026.

Project Name	**Fire Station 2 - High Efficiency DHW Heater**		
Project	27020002	**Initially budgeted in**	2023
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the replacement of the domestic hot water tank at the Fire Station #2 (Monarch). Staff will retain a consultant to complete detailed design and contract documents.

Rationale: The Fire Station #2 was built 1987. The mechanical equipment servicing the facility consists of one DHW heater for the building.

Domestic hot water for the facility currently utilizes a 65-gallon atmospheric natural gas-fired heater tank rated at 360 MBH. It is in poor condition and is recommended to replace with a high efficiency unit. The current unit is also oversized for 4-5 people and can be downsized without an impact on operations and maintenance of the facility.

Reference: 2019 Energy Audits, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will be completed in 2027 and the construction phase will be completed in 2028.

Project Name	**Fire Station 2 - VFD in AHU Supply Fan**		
Project	27020003	**Initially budgeted in**	2023
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the installation of variable frequency drives (VFDs) on the air handling unit (AHU) supply fan at the Fire Station #2 (Monarch). This will allow for the units to run based on demand. Staff will retain a consultant to complete detailed design and contract documents.

Rationale: The Fire Station #2 was built 1987. There is one AHU unit equipped with a 10 hp supply fan. With adding the recommended VFD on the supply fan and controlling the fan speed based on the return air temperature, the fan will be able to slow down during the shoulder seasons. This retrofit will provide a reduction in energy consumption by an estimated 22,647 kWh annually and greenhouses gases (GHG) emissions by an estimated 1.1 tonnes annually.

Reference: 2019 Energy Audits

Schedule: Detailed design will be completed in 2027 and the construction phase will be completed in 2028.

Project Name	**Ajax Main Library - Curtain Walls - Sealant**		
Project	27071001	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project scope includes repairing the damaged section of the curtain and updating the curtain wall sealants.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. The condition assessment report outlines deficiencies located at Ajax Main Library North section. The curtain walls sealant ranges from 25-30 years old and has been noted to be in poor condition by the building condition assessments. As a result of these condition assessments, the Ajax Main Library Curtain Wall Sealants are recommended for replacement in 2027.

Not completing this project could potentially cause water and outside air infiltration into the Ajax Public Library.

Reference: 2023 Building Condition Audits

Schedule. Ajax Main Library - Curtain Wall Sealants is scheduled for construction in the spring of 2027 with a completion date in fall of 2027.

Project Name	**Town Hall Lighting Retrofit**		
Project	24010101	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the removal and replacement of the existing lighting system at the Town Hall facility with new high efficiency LED lighting fixtures. Staff will retain a consultant to provide detailed design and contract documents for this project.

Rationale: The Town Hall energy audit, completed in 2012, identified recommendations for reducing the energy consumption and Greenhouse Gas (GHG) emissions for the facility. One of the recommendations included a facility lighting retrofit.

The majority of existing lighting throughout the facility consists of linear fluorescent fixtures that are either 32W T8 fluorescent lamps with electronic ballasts or 54W T5 lamps with electronic ballasts. There are T12 bulbs with magnetic ballasts in the basement and compact fluorescent PL style fixtures with 32W or 26W lamps in the vestibules, corridors and service counters. There ia a small number of MR16 halogen lamps located in the meeting rooms and offices. All exit signs are of LED technology. The retrofit will include the replacement of the existing interior and exterior wall mounted fixtures with LED lighting controlled by occupancy sensors and timers.

The retrofit will improve lighting quality and provide a reduction in energy consumption and GHG emissions by an estimated 7 tonnes annually.

Reference: 2012 Energy Audit

Schedule: Detailed design will be completed in summer of 2024 and construction will begin in summer of 2025.

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes a lighting retrofit to replace all the existing fixtures in the Fire Station 1 (Headquarters) facility with new high efficiency LED fixtures. The Town will retain a consultant to complete detailed design and contract documents for this project.

Rationale: The Fire Station 1 energy audit, completed in 2019, identified recommendations for reducing the energy consumption and Greenhouse Gas (GHG) emissions for the facility. One of the recommendations included a facility and site lighting retrofit.

The majority of existing lighting throughout the facility consists of 32W T8 linear fluorescent lamps, 28W T5 linear fluorescent fixtures, 18W pin-base CFL pot lights and exterior metal halide.

The retrofit will include the replacement of the existing interior and exterior site and wall mounted fixtures with LED lighting controlled by occupancy sensors and timers. The retrofit will improve lighting quality and provide a reduction in energy consumption and GHG emissions by an estimated 4.5 tonnes annually.

Reference: 2019 Energy Audits

DETAIL SHEET

Project Name	**Bldg Automation System Rehab**		
Project	27070901	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the upgrade of the Building Automation System (BAS) throughout Town Facilities.

Rationale: The existing BAS throughout the Town operates on a 2012 Windows server and can no longer support updates. The BAS allows staff to operate the buildings to optimal energy efficiency and ensure comfort of occupied zones. The system consists of sensors throughout the mechanical equipment and the rooms being served by the equipment as well as the operational software. The rehabilitation will involve replacing the sensors and the operating system.

The Town currently spends around $300K annually to Honeywell for a closed platform BAS system exclusively serviced by Honeywell. The goal of the BAS project is to transition to an open-sourced BAS platform, enabling the Town to involve various vendors for installation, service and maintenance of BAS system across the Town facilities.

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery.

Schedule: Detail design and tendering work to be completed by 2025 and the BAS upgrade work to commence in 2026 continuing for 3 years in a phased manner.

DETAIL SHEET

Project Name	**St Andrews CC & Gym Roof Repl**		
Project	23070702	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes replacement of the two roof systems at the St Andrews Community Centre and Gym with new high performance roofing systems. Staff will retain a consultant to complete detailed design and contract documents for this project.

Rationale: The St. Andrew's Gym was built in 1955 and the Community Centre in 1983. The facilities are primarily used for seniors programming and facility rental spaces.
In 2015, the Town retained a consultant to complete a detailed roof condition assessment report for various Town facilities. As a result of these condition assessments, the St. Andrew's Community Centre & Gym Roof systems are recommended for replacement. The existing roof assemblies are over 25 years old and are reaching the end of their useful life.
The St. Andrew's Community Centre roof consists mostly of a sloped metal roof with small flat areas. The sloped metal roof is showing signs of corrosion, sealant deterioration, weakened flashing and fastener gaskets. These deficiencies will lead to further water infiltration if not addressed. The flat roof areas are showing signs of surface deterioration, sealant and flashing weakening as well as the presence of vegetation.
The St. Andrew's Gym roof consists of a two tier flat roof assembly. The existing roof assemblies are showing signs of membrane deterioration, weakened flashing and sealants and inadequate drainage. These deficiencies will lead to further water infiltration if not addressed. The scope of work will include the replacement of the flashing and the introduction of additional roof drains and parapet walls.

Reference: 2023 Building Conditions Assessment, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will be completed in summer of 2026 with construction following in summer of 2027.

DETAIL SHEET

Amended

Project Name	**ACC Rec Master Plan Renovation**		
Project	24000301	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes renovations to the Ajax Community Centre that will modernize and add/enhance recreational amenities within this facility. Facility improvements may include the following:

- Creation of a new gymnasium
- Provisions for a new warm water teaching/therapy pool
- New fitness facility and group fitness studio(s)
- New washrooms and change rooms
- Accessibility enhancements
- New and upgraded community rooms, including the HMS Ajax room
- Refreshed main entrance
- Mechanical equipment improvements
- Security upgrades and paging system

Rationale: The Ajax Community Centre was built in 1967, and has featured incremental additions in 1972, 1990 and 1999. The Recreation and Parks Master Plan has identified a substantial renovation project that will respond to the growth related pressures that will be experienced in Downtown Ajax as a result of intensification. The projected influx of new residents and employees will increase the demand for various community centre amenities. This renovation also provides an opportunity to address many of the functional challenges that currently exist within the facility. Modernizing this facility, making it accessible and enhancing the delivery of recreational services, will position the Ajax Community Centre as a facility that will respond to the needs of existing and future Ajax residents.

Reference: Ajax Recreation and Parks Master Plan (2022), Accessibility for Ontarians with Disabilities Act (AODA), Facility Condition Audits and Assessments, Security Assessment (2019)

Schedule: Conceptual Design will begin in 2025. Detailed design will take place in 2026, with construction commencing in 2027.

DETAIL SHEET

Project Name	**St. Andrew's Community Centre & Gym Revitalization**		
Project	24003101	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes the detailed design for the St. Andrews Community Centre Gymnasium, with the aim to modernize and and revitalize the building condition and the associated program capabilities for the Older Adults community.

Rationale: The St. Andrews Community Centre was built in 1983, and the gymnasium is the only remaining component of the former school and was built in 1955. The Recreation and Parks Master Plan recognizes that the existing older adult facilities are outdated and have become an investment priority that needs to be addressed in the short term. St. Andrews is an aging facility that is no longer conducive to support older adult programs. Room sizes and ceiling heights, combined with the lack of technology, are not ideal for high demand older adult activities, nor are they likely to inspire new generations of older adults. The existing, modest footprint limits program opportunities that can currently be supported. The Older Adults and Seniors Recreation Services Strategy recognizes that the 55+ population will exceed 53,500 persons by 2041, nearly double the population recorded in the 2016 census, with the majority of this projected growth to be experienced within the Downtown Centre of Ajax.

Reference: Recreation and Parks Master Plan, Accessibility for Ontarians with Disabilities Act (AODA), Facility Condition Audits and Assessments, Security Assessment (2019)

Schedule: Detailed design to take place in 2026 with a proposed construction project to be introduced in the 2026 budget.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Operations Centre - Yard Optimization Study**		
Project	24010402	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Staff will retain a consultant to complete an optimization study of the Operations Centre Yard.

Rationale: Operations Centre was constructed in 2010. The Yard is shared by Fleet, Building Maintenance, Environmental Services and Operations. As the Town has grown, the level of service we provide has grown with it. There has been a need identified to complete a review of the current yard allocation and layout. The results of the study will allow for the proper allocation of space and layout modifications to ensure the Operations Yard continues to operate efficiently while meeting the needs of the Town.

Reference: N/A

Schedule: The Town will retain a consultant to complete the study in the Spring 2025 with completion by the Fall 2025.

DETAIL SHEET

Project Name	**Fire Station 1 (HQ) Modernization**		
Project	24020002	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes completing the detailed design for renovations to the Fire Headquarters which includes the following areas:

-Converting the existing dispatch room to modern individual dorm space
-Repurposing the existing dormitory into a new fitness room
-Transforming the current fitness room into a new computer room (training area)
-Relocating the platoon chief's office including sleeping area to the ground level
-Renovating the ground level men's and women's locker rooms, showers, and changing room area into a universal washroom/changeroom style setup
-Repurposing the existing workroom near the apparatus bay into a new inventory/work room
-Reviewing the best utilization of the upper mezzanine area on the apparatus floor
-Reviewing possible storage area and racking in hose tower for consumables such as foam, haz-mat materials/supplies etc.
-Upgrading the exhaust ventilation in the Laundry Room.
-Upgrading the Emergency Operations Centre (EOC) and Training Rooms to modern day technology and furniture.
-Upgrading lighting to replace all the existing fixtures with new high efficiency LED fixtures.

-**Rationale:** The planned renovations for Fire Station 1 (Headquarters) include comprehensive upgrades to improve functionality, safety, and adaptability to meet current and future needs. With the ground floor dispatch services now amalgamated at the Regional level, the existing dispatch room will be converted into modern individual dorm spaces. The current dormitory will be repurposed into a new fitness room, while the existing fitness room will be transformed into a computer training area. Additionally, the platoon chief's office and sleeping area will be relocated to the ground level for better accessibility.
Further considerations include reviewing the best use of the upper mezzanine area on the apparatus floor and exploring the potential for storage space and racking in the hose tower for consumables like foam and hazmat supplies. These detailed design elements will modernize Fire Station 1, ensuring it meets the evolving needs of the fire services while enhancing energy efficiency, safety, and usability.

Reference: 2019 Energy Audits. 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities.

Schedule: The design stage will commence in early 2025 with completion by the end of the 2025. Construction in 2026 completing exhaust venting for the laundry room, upgrading to the Emergency Operations Centre (EOC) and Training Room, a lighting retrofit to replace all the existing fixtures with new high efficiency LED fixtures

DETAIL SHEET

Project Name	**ACC Pad 3&4 Slab & Floor Rehab**		
Project	25070301	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes consulting services to determine the existing conditions and provide detailed design on replacement of the Pad 3 & 4 arena slabs at the Ajax Community Centre (ACC) as well as the replacement of the Pad 3 & 4 rubber flooring.

Rationale: Staff complete annual infrastructure inspections, and as a result of these inspections a number of replacements have been identified at the ACC. Staff will retain a consultant in 2025 to complete the detailed design for the following work to be completed.
The existing Pad 3 & 4 concrete slab has been in service for 26 years and is reaching the end of its useful life and is in need of replacement. The slab is comprised of areas that may exhibit structural cracking and vertical displacement if not replaced. The project will include the removal and reinstatement of the dasher board system, excavation to the under slab heating and cooling system, installation of new refrigerant piping and heating floor system, structural re-enforcement within the new concrete slab and all associated components necessary to replace the entire concrete slab assembly.
The existing rubber flooring in the corridor spaces, change rooms and player benches area is reaching the end of its useful life and is in need of replacement. The rubber flooring replacement will be coordinated simultaneously with the structural slab repair to minimize interruption to the facility users.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities, 2024 Corporate Asset Management Plan.

Schedule: Consulting services will start in the spring of 2025 with recommendations and detailed design to be completed in the summer of 2025. The construction will be subsequently completed .

DETAIL SHEET

Project Name	**St. Francis Centre Lighting Retrofit**		
Project	28072001	**Initially budgeted in**	2023
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is the removal and replacement of the existing lighting at St. Francis Centre with new high efficiency LED fixtures. Staff will retain a consultant to complete detailed design and contract documents.

Rationale: The St. Francis Centre energy audit, completed in 2019, identified recommendations for reducing the energy consumption and savings for the facility. One of the recommendations included a facility and site lighting retrofit.

The lighting in the basement, mechanical and storage rooms in the building primarily consist of linear fluorescent T8 fixtures. The exterior fixtures are currently metal halide short lamp posts.

The retrofit will include the replacement of the existing interior and exterior site lamp posts with LED lighting. The retrofit will improve the quality and provide a reduction in energy consumption by 1000 kWh annually.

Reference: 2019 Energy Audits; 2023 Building Condition Audit

Schedule: Detailed design will be completed in 2025 and the construction phase will be completed in 2026.

DETAIL SHEET

Project Name	**Town Hall Replace Rooftop AHUs**		
Project	25010102	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes replacement of six rooftop units at Town Hall with new high efficiency rooftop units. Staff will retain a consultant to complete detailed design and contract documents.

Rationale: These rooftops units are original to the 2005 renovation. The mechanical equipment servicing the facility consists of boilers for heating and domestic hot water and HVAC equipment including air handling units, rooftop units and chillers.

These six rooftop units provide heating, air conditioning and ventilation to the west atrium, link corridor, north & south administration, council chamber lobby and library administration sections of the building.

The replacement rooftop units will improve heating, air conditioning and ventilation efficiency. The retrofit is expected to result in a reduction in energy consumption and GHG emissions by an estimated 7 tonnes annually.

Reference: 2022-2026 Strategic Plan Pillar 3, Modernizing our Community (MC) MC Priority 1: Lead the green transition 1.1 Take meaningful climate action, 2019 Energy Audits, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will start in the spring of 2025 and construction will be completed in 2026.

DETAIL SHEET

Project Name	**ACC - Pad 2 - Upgrading Player Benches**		
Project	25070302	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes upgrades to the player benches for Pad 2 at Ajax Community Centre (ACC).

Rationale: ACC was built in 1967, and has featured incremental additions in 1972, 1990 and 1999. Pad 2 is part of the 1967 original building. The wood frame arena creates a unique experience for users. Unfortunately, the player benches (both home and visitors) are not long enough to accommodate seating for all members of the teams. This has resulted in a decreased booking of Pad 2. This project will involve the re-design and replacement of the player benches to allow for full teams to be able to sit on the benches.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will be completed in early 2026 with construction to follow later in 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**MCC Change Room Rehab**		
Project	25070401	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work will include demolition of the entire area, revised plumbing locations, new lighting and HVAC work, new partitions and will accommodate the most recent building code compliant universal washroom. In 2020 staff retained a consultant to complete the detailed design and contract documents for the upgrades.

Rationale: The McLean Community Centre (MCC) was constructed in 1994 with a major expansion in 2000. The facility has an approximate area of 75,000 sq.ft. and consists of a large indoor swimming pool, gymnasium, fitness centre, library branch and various rental spaces.
The interior finishes and fixtures throughout the public change rooms are reaching the end of their useful life and require replacement. The proposed scope of work includes retrofitting the existing public change rooms into a single universal and gender neutral public change room. This will allow for improved facilities, functionality, layout, and modernization to allow for enhanced utilization and accommodation for various swim programs and lessons. Opening up the change room will create transparency from the pool deck and improve safety for all users. This renovation will be a pillar for universal design, diversity and inclusion. Users will be able to clearly identify where clothing is mandatory and they will utilize the private and family size change cubicles for undressing.
The change rooms will be inclusive, gender neutral and with accessible features meeting the needs of a diverse community.

Reference: Accessibility for Ontarians with Disabilities Act (AODA), 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities, 2024 Corporate Asset Management Plan.

Schedule: Detailed design for this project was completed in 2020 and construction will begin in the spring of 2026

DETAIL SHEET

Project Name	**Main Branch Library Refurbishment**		
Project	25071001	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work consists of interior upgrades to Main Branch Library including replacement of flooring including replacement of furniture (desks, tables, chairs, soft seating, shelving), and washroom renovations. The washroom renovations will involve upgrading the washroom doors and stalls to ensure they meet the current accessibility standards.

Rationale: The Main Branch Library was constructed in 2002 and has an approximate building area of 33,000 sq.ft. The two-storey library facility consists of a large library space, a community room and various staff areas. As a well-used public space the facility's amenities (carpet, washrooms, and furniture) are worn and/or damaged. These assets have reached the end of their useful life and require replacement. Additionally, furniture requirements of libraries have evolved and now seek flexibility, access to power, and accessible options in all library spaces.

Reference: Library Strategic Master Plan, 2023 Building Condition Audit , 2024 Corporate Asset Management Plan.

Schedule: Phase 1 is planned for 2026 and consists of replacement of the carpeting and washroom/staff area flooring, phase 2 is planned for 2027 and consists of replacement of the interior furniture.

DETAIL SHEET

Project Name	**Town Hall Energy Upgrades**		
Project	26010101	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work is to install variable frequency drives (VFDs) on the two large rooftop air handling units (AHUs) and heat pumps which will allow for the units to run based on demand. The VFDs will ramp down fan speeds during times of reduced heating and cooling requirements which will result in significant savings in energy consumption and life expectancy of the equipment. The VFDs will be tied into the building automation system to allow for control and monitoring. Staff will retain a consultant to complete the detailed design and contract documents.

Rationale: Town Hall was originally constructed in 1968, with two major expansions and retrofitting occurring in 2003 and 2005. The facility has an approximate area of 55,000 sq.ft. There are two air handling units (AHUs) and three heating supply pumps that currently run on schedules, as opposed to demand. This retrofit will provide a reduction in energy consumption by an estimated 80,000 kwh annually and greenhouse gas (GHG) emissions by an estimated 4 tonnes annually.

Reference : 2019 Energy Audits, 2022-2026 Strategic Plan Pillar 3, Modernizing our Community (MC) MC Priority 1: Lead the green transition 1.1 Take meaningful climate action, 2024 Corporate Asset Management Plan.

Schedule: The detailed design will start in the spring of 2026 and be completed in the summer with construction to follow in 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Rotary Park Pavilion Energy Upgrades**		
Project	26070902	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project scope includes replacement of the two rooftop air handling units and supply ducts, a lighting retrofit of the facility and the replacement of the domestic hot water tank. Staff will retain a consultant to complete the detailed design.

Rationale: The facility is serviced by two rooftop units (RTUs) that are both serving the main hall. The rooftop units were installed with the original building in 2001 and are nearing the end of their serviceable life. Staff are recommending replacing the RTUs with a single larger unit and install new ducting on both supply streams and connecting it into the building automation system.
The majority of the building is illuminated with T8 linear fluorescent lamps. The exterior lighting is comprised of metal halide 75W lamps in the lamp post fixtures. Inside the main hall, there are a number of track lighting fixtures that use PAR30 metal halide lamps. This is old lighting technology and requires replacement. All lights will be replaced with LED fixtures.
Domestic hot water for the facility is heated to 140°F in an electric heater tank with a 300W element. As the building is often not occupied, the hot water sits in the tank for long periods of time, constantly losing heat through the tank envelope. Staff are recommending installing a tankless electric water heater. This will eliminate all stand-by losses as hot water is generated on demand. All of the retrofits will improve lighting quality and reduce the energy consumption and GHG emissions by an estimated 2 tonnes annually.

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is the removal and replacement of existing lighting system at Greenwood Pavilion with new high efficiency LED fixtures. Staff will retain a consultant to complete detailed design and contract documents.

Rationale: The Greenwood Pavilion energy audit, completed in 2019, identified recommendations for reducing the energy consumption and Greenhouse Gases (GHG) emissions for the facility. One of the recommendations included a facility and site lighting retrofit.

The majority of the existing lighting throughout the facility consists of 32W linear fluorescent or 19W compact fluorescent lamps. 32W T8 fluorescent for the washrooms and mechanical rooms and 50W metal halide wall packs for exterior.

The retrofit will include the replacement of the existing interior and exterior site (wall mounted) with equivalent LED lighting. The retrofit will improve the quality and provide a reduction in energy consumption and GHG emissions by an estimated 54.6 tonnes annually.

Reference: 2019 Energy Audits, 2022-2026 Strategic Plan Pillar 3, Modernizing our Community (MC) MC Priority 1: Lead the green transition 1.1 Take meaningful climate action, 2024 Corporate Asset Management Plan.

Project	26071001	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes the replacement of the existing exterior steel doors leading to the roof on the second floor and north entrance steel doors located on the ground floor. have reached the end of their useful life and require replacement. The project will also include the installation of power door operators for the staff and family washrooms.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. As a result of the building condition assessment report, various deficiencies were noted including the replacement of the steel doors noted to be in poor condition.

Not replacing the steel doors as recommended by the building condition assessment could lead to issues with securing the building and increased operation costs caused by a decrease in building envelope efficiency.

Reference: 2023 Building Condition Audits, 2024 Corporate Asset Management Plan.

Schedule: Detailed design will start in spring of 2026 with a completion date in fall of 2026.

Project Name	**Paulynn Domestic Water Supply**		
Project	27070902	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is to provide a domestic water supply from the Region's service to the Paulynn Park Pavilion.

Rationale: Paulynn Park Pavilion was built in 1991 and has approx.1850 sq.ft. of usable space mainly for camp programs. There is currently no access to domestic water supply, as well water is being used. The Region of Durham has a watermain along Ravenscroft, which ends approx. 300 m from the Pavilion. The Region may extend watermain service north along Ravenscroft for development, if the watermain service was brought closer to the Pavilion, it would be feasible to provide a domestic water supply. The existing well would be decommissioned as part of the project. The detailed design stage would include a review of the location of the existing washrooms. They may be relocated to adjacent to the parking lot and pavilion, which would provide improved accessibility.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities

Schedule: Design to occur in 2026, construction in 2027. Review annually to determine feasibility of project and budget.

DETAIL SHEET

Project Name	**ACC Lighting Retrofit Phase III**		
Project	23070302	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is the Phase III removal and replacement of the existing lighting system at the Ajax Community Centre with new high efficiency LED lighting fixtures. Staff will retain a consultant to provide detailed design and contract documents for this project.

Rationale: The Ajax Community Centre (ACC) facility energy audits, completed in 2019, identified recommendations to reduce the energy consumption and Greenhouse Gas (GHG) emission of the facilities. Among the recommendations included a full lighting retrofit.

The existing fixtures will be replaced with energy efficient LED fixtures that will reduce the energy consumption and improve the quality of light.

It is estimated that the Phase III lighting retrofit will reduce GHG emissions by 16 tonnes annually.

Reference: 2019 Energy Audit

Schedule: Phase III design will be in 2027 with construction to follow in 2028.

DETAIL SHEET

Project Name	**Carruthers Marsh Energy Improv**		
Project	25070901	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work includes a lighting retrofit of the entire facility lighting system that would replace the existing lighting with high efficiency LED lighting fixtures. The project also includes adding occupancy sensors on the washroom exhaust fans and unoccupied setbacks on the HVAC systems. Staff would hire a consultant to provide detailed design and contract documents.

Rationale: The Carruther's Marsh Pavilion energy audit identified recommendations for reducing the energy consumption and greenhouse gas emissions for the facility by 12,283 kWh annually. The identified recommendations are detailed below.
The existing lighting consists of low efficiency incandescent and fluorescent lighting fixtures. The fixtures are over 10 years old and are reaching the end of their useful life. The retrofit will include the replacement of the existing interior fixtures and exterior site fixtures with energy efficient lighting controlled by interior occupancy sensors and exterior timers.
Implementing occupancy controls on the washroom exhaust fans to ensure that they only run during occupied periods will provide a reduction in energy consumption and GHG emissions.
Implementing setback controls on the HVAC systems in the facility to reduce energy use during unoccupied times in the facility will provide a reduction in energy consumption and reduce GHG emissions.

Reference: 2019 Energy Audits, 2022-2026 Strategic Plan Pillar 3, Modernizing our Community (MC) MC Priority 1: Lead the green transition 1.1 Take meaningful climate action. 2024 Corporate Asset Management Plan.

Schedule: Detailed design will occur in 2027 and construction to follow in 2028.

Project	27020001	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes completing exhaust venting for the laundry room at Fire Station #2 (Monarch).

Rationale: Fire Station #2 was built in 1987. The laundry facilities where fire services wash their bunker gear require improved exhaust ventilation. These upgrades have been proposed at the other Fire Station locations within the Town. The purpose of the upgrades is to improve the indoor air quality of the space as it relates to cancer prevention.

Reference: 2022-2026 Strategic Plan - Pillar 3: Growing our Community (GC), GC Priority 3: Invest in the changing recreational needs of a growing community 3.1 Initiate designs to modernize and redevelop facilities.

Schedule: Detailed design will be completed in early 2027 with construction to follow later in 2027.

Project Name	**MCC Basement - Replace 2" Copper Water Line**		
Project	27070401	**Initially budgeted in**	2024
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes the replacement of a 2" copper water line located in the crawl space of the basement at MCC.

Rationale: The McLean Community Centre (MCC) was constructed in 1994 with a major expansion in 2000. The facility has an approximate area of 75,000 sq.ft. and consists of a large indoor swimming pool, gymnasium, fitness centre, library branch and various rental spaces. The pool system equipment located in the basement underwent a major revitalization in 2023, this 2" copper water line was not replaced during the major revitalization, but the water line has reoccurring leaks and requires replacement due to age and condition.

Reference: 2023 Building Condition Assessment, 2024 Corporate Asset Management Plan.

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is the removal and replacement of existing lighting system at the Operations Centre with new high efficiency LED fixtures. Staff will retain a consultant to complete detailed design and contract documents.

Rationale: The Operations Centre energy audit, completed in 2019, identified recommendations for reducing the energy consumption and Greenhouse Gases (GHG) emissions for the facility. One of the recommendations included a facility lighting retrofit.
Interior lighting at the facility consists primarily of T5 linear florescent fixtures and compact florescent lamps in pot light fixtures.
The retrofit will include the replacement of the existing interior lighting with LED lighting with integral occupancy sensors. The retrofit will improve the lifespan of the lights and provide a reduction in energy consumption and GHG emissions by an estimated 8.2 tonnes annually.

Amended

Project Name	**Town Hall - Exterior Block Repointing and Sealing**		
Project	25010104	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Repointing exterior masonry joints and sealing exterior block at Town Hall.

Rationale: Town staff have been responding to interior water leaks in multiple areas of Town Hall. Through investigation it has been identified that these leaks are due to a breakdown in the existing pointing and sealing of the exterior blocks. A section of the exterior block has been repointed and sealed during the 2024 season. Repointing and sealing the remaining exterior block at Town hall will help mitigate water infiltration into the building as well as improve the integrity, appearance, and functionality of masonry block.

Not completing the repointing and sealing could result in interior and exterior damage to Town Hall the will require additional budget dollars for repairs.

Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes repairing cracks and repainting pool shell at Ajax Memorial Pool facility. Scope of work to include the following items:

- Waterblasting pool shell at high pressure
- Grinding and V-notching concrete cracks
- Removing loose concrete
- Cleaning and disposing of debris
- Sealing and repairing cracks
- Washing and applying epoxy paint including the delineation lines
- Recaulking all expansion joints

Rationale: Failure to complete these tasks could lead to significant damages to the outdoor pool facility, resulting in leakage, foundation issues and potential pool closures.

DETAIL SHEET

Project Name	**Greenwood Domestic Water Supply**		
Project	26070901	**Initially budgeted in**	2022
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project is to provide a domestic water supply from the Region's service to the Greenwood Pavilion.

Rationale: Greenwood Pavilion was built in 2010 and has approx. 2595 sq.ft. of usable space for events & camp programs. There is currently no access to domestic water supply, as well water is being used. The Region of Durham has a watermain along Westney Rd, which ends approx. 1 km from the Pavilion. The Region may extend watermain service west along Taunton Rd, which would be 700 m south of the Pavilion. If the watermain service was brought closer to the Pavilion there may be an opportunity to provide domestic water to the building, and any future buildings that may be built at Greenwood.

Project	25004101	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes workspace modernization at Fire Station 1 (Headquarters) and Recreation Office Space.

Rationale: In 2019, the Town undertook a Municipal Needs Accommodation Study that included an extensive review of the Town's workspace real estate in response to understanding the Town's current and future workforce needs.

Staff are proposing to modernize our existing workstation areas to a mix of dedicated workstations for staff at the office full time and hoteling workstations that are non-dedicated for staff that are working a mix of in-office and at home. In addition to modernizing the workstation areas, staff will convert some dedicated offices that are not being used full time to bookable private meeting spaces for staff to use for virtual meetings, phone calls and/or private meetings.

Technology solutions, including hardware and software, will also be purchased, and implemented to ensure the transition between working from home and in-office is as seamless as possible for staff. This will include a desk and office booking app, hardware to enable hybrid meetings in a professional way, and a standardized technology kit for staff that work from home.

Reference: Municipal Needs Accommodation Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery

Schedule: Construction will take place in Fall 2025.

Project	25070502	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes the installation of center posts and latches to the exterior doors located in the banquet/meeting rooms at the east end of Audley Recreation Centre (ARC)

Rationale: Staff have identified an issue with the doors in the banquet halls at the Audley Recreation Centre not latching properly when closed, causing an issue with securing the building. Not completing this upgrade will lead to security risks, privacy concerns, safety hazards, pest intrusion and loss of energy efficiency.

Reference: N/A

Schedule: Construction will begin in spring of 2025 with a completion date in summer of 2025.

Project	25070908	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for this project includes the replacement of manual light switches with Occupancy Sensors in various Town facilities. By installing these sensors, the Town of Ajax can not only improve energy efficiency but also enhance the overall convenience for the staff and visitors.

Rationale: This project aims to enhance energy efficiency, convenience, and sustainability by saving energy and prolonging the lifespan of the light fixtures. This project also aligns with the Town's commitment to reducing greenhouse gas emissions and helping to meet council approved targets.

Not Completing this project will result in increased utility, maintenance, and repair costs in Town facilities.

DETAIL SHEET

Project Name	**Rotary Park Pavillion - MDF Countertop Upgrades**		
Project	27070907	**Initially budgeted in**	2025
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for this project includes the replacement of the MDF Countertops at the Rotary Park Pavilion.

Rationale: In 2023, the Town retained a consultant to complete a detailed building condition assessment reports for various Town facilities. As a result of these condition assessments, the countertops at Rotary Park Pavillion are recommended for replacement. The condition assessment report outlines various deficiencies throughout the buildings located in the staff rooms, community rooms, main halls, concessions and washrooms.

Reference: 2023 Building Condition Audits, 2024 Corporate Asset Management Plan.

Schedule: Scheduled construction is to begin in the Spring of 2027 with a completion date of Summer 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Lakeside CC Parking Lot Recon**		
Project	24033001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2023	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for Lakeside Community Centre parking lot Reconstruction includes full depth parking lot reconstruction, new curb, new AODA compliant parking, conversion to LED parking lot lighting, updated line painting and signage.

Rational: The Town's municipal parking lot infrastructure is aging. With aging comes deterioration, including settlements, potholes, ponding and a breakdown of the parking surface which leads to an uneven surface. The resurfacing of municipal parking lots, including concrete sidewalk and curb repairs, is a necessary component of the Town's maintenance program, prolonging the life of the pavement structure. While resurfacing is utilized wherever possible, older parking lots may require reconstruction.

In an effort to better evaluate the condition of municipal parking lots and determine an appropriate life-cycle, staff conduct an annual conditional assessment of all municipal parking lots. As a result, this parking lot has been identified for repair.

Reference: Annual Municipal Parking Lot Inventory and Assessment; 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 3.1: Initiate designs to modernize and redevelop facilities. 2024 Corporate Asset Management Plan.

Schedule: Design: Approved in 2023 and rebudgeted in 2026; Construction: 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**MCC East & S Parking Lot Recon**		
Project	23033001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for the McLean Community Centre East and South Parking Lots includes but is not limited to:

- Detailed design
- Full depth reconstruction of the parking lots including the emergency access road off Coles Avenue
- P-Gate replacement at the end of the emergency access road
- New relocated concrete pad and enclosure for waste bins
- New parking lot and basketball court lighting
- New concrete pavers for the patio north west of the building.

Rationale: The Town's municipal parking lot infrastructure is aging. With aging comes deterioration, including settlements, potholes, ponding and a breakdown of the parking surface which leads to an uneven surface. The resurfacing of municipal parking lots, including concrete sidewalk and curb repairs, is a necessary component of the Town's maintenance program, prolonging the life of the pavement structure. While resurfacing is utilized wherever possible, older parking lots may require reconstruction. The impact of not following the recommended schedule may result in additional expenditures, risk to public safety, and unplanned service disruptions.
In an effort to better evaluate the condition of municipal parking lots and determine an appropriate life-cycle, staff conduct a condition assessment of all municipal parking lots annually. As a result, the MCC east and south parking lot has been identified for reconstruction.

Reference: Annual Municipal Parking Lot Condition Assessment; 2022-2026 Strategic Plan; 2024 Corporate Asset Management Plan.

Schedule: Design Approved: 2023, Construction: 2026

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Fire HQ Parking Lot Resurfacing & Driveway M&O**		
Project	26033002	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes resurfacing the parking lot and mill and overlay (M&O) of the fire truck driveway, structural concrete pad in front of the front bay doors, concrete curb and sidewalk repairs, interlocking repairs, AODA compliant parking with access aisles and tactile plates, updated line painting and signage, and conversion to LED parking lot lighting.

Rational: The Town's municipal parking lot infrastructure is aging. With aging comes deterioration, including settlements, potholes, ponding and a breakdown of the parking surface which leads to an uneven surface. The resurfacing of municipal parking lots, including concrete sidewalk and curb repairs, is a necessary component of the Town's maintenance program, prolonging the life of the pavement structure. While resurfacing is utilized wherever possible, older parking lots may require reconstruction.

In an effort to better evaluate the condition of municipal parking lots and determine an appropriate life-cycle, staff conduct a conditional assessment of all municipal parking lots annually. As a result, the Fire HQ parking lot and Driveway was deemed a priority. This project will include the redesign of the existing parking lot to better utilize the space. The project will include the installation of concrete aprons at the east bay doors.

Project	24033003	**Initially budgeted in**	2024
Submitted By	Rassle Solaiman	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes design and construction for full depth reconstruction of the parking lot and driveways at Firehall 2. The work includes concrete sidewalk repairs, replacement of the concrete steps to the main entrance off Monarch Avenue, new curb, new AODA compliant parking, tactile plates, new concrete pad in front of the rear fire truck bay doors with trench drain, and updated line painting and signage. Construction for this project will be coordinated with the ACC West Arena Service Lot resurfacing project.

Rational: The Town's municipal parking lot infrastructure is aging. With aging comes deterioration, including settlements, potholes, ponding and a breakdown of the parking surface which leads to an uneven surface. The resurfacing of municipal parking lots, including concrete sidewalk and curb repairs, is a necessary component of the Town's maintenance program, prolonging the life of the pavement structure. While resurfacing is utilized wherever possible, older parking lots may require reconstruction.

In an effort to better evaluate the condition of municipal parking lots and determine an appropriate life-cycle, staff conduct a condition assessment of all municipal parking lots annually. As a result, the above mentioned parking lots have been identified for repair.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Remmer Neighbourhood Park**		
Project	23090401	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This park (north of Rossland Rd., east of Church St.) will include walkways, a children's playground, open play space, LED lighting, site furniture, landscaping and a multi-use asphalt trail connecting the park and Duffins Trail with Paulynn Park.

Rationale: This park is planned to be a central recreational greenspace for the enjoyment of residents within the A9 Cougs subdivision, creating a significant recreational central focal point for the community.

References: The park component of the project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation, Parks and Culture Master Plan's goal of assuming a leadership role in providing and facilitating recreation, parks, arts, and cultural services (Goal 2).
2018 DC Background Study, Item P09.

Schedule: Design: 2024, Construction: 2025

DETAIL SHEET

Project Name	**ACC Basketball Court**		
Project	24001901	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The existing basketball court will be removed and relocated to the proposed park location east of the Centennial Rd and Kitney Dr intersection. The scope will include a full size basketball court, fencing, and seating.

Rationale: With the continuing growth from developments in the downtown core, there is a growing need for improved recreational infrastructure within the downtown community. The Ajax Community Centre will be further developed as a central recreational hub with this rehabilitated infrastructure. The impact of not following the recommended schedule may result in additional expenditures.

Reference: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation, Parks and Culture Master Plan's goal of assuming a leadership role in providing and facilitating recreation, parks, arts and cultural services (Goal 2).

Project Name	**ACC North Field Comm Park**		
Project	24090404	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This park is 1.5 hectares in size and is located within the downtown core. The existing soccer field will be replaced with various park amenities inclusive of a splashpad, playgrounds, pickleball courts, open space play areas, lighting, and seating areas. This project will be combined with ACC Basketball Court Project #24001901 and ACC Skate Park Project #24002001

Rationale: With the continuing growth from developments in the downtown core, there is a growing need for improved recreational infrastructure within the downtown community. The Ajax Community Centre will be further developed as a central recreational hub with this rehabilitated infrastructure. The impact of not following the recommended schedule may result in additional expenditures.

References: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages..

Project Name	**Fieldgate Linear Park**		
Project	23001001	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Fieldgate Homes Linear Park is located within the Fieldgate Homes subdivision at the north west corner of Salem Road and Bayly Street. The Linear Park replaces a section of Porte Road which will be stopped-up and closed. This park, as per the Subdivision Agreement, is planned to augment planned parkland in the area and will include paved pathways, landscaping, and site furniture.

Rationale: The delivery of a local central amenity space for residents of this area will be warranted by 2026. The timing of this project is aligned with the design and construction of the Fieldgate Parkette project #24090401

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users.

Project	24090402	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Eagle Woods Parkette is 0.37 hectares in size and fronts onto Denny Street. This parkette is planned to incorporate paved pathways, landscaping, site furniture, LED lighting and a junior and senior play area.

Rationale: Construction of the Eagle Woods neighborhood (south of Bayly, west of Audley) began in 2012. The delivery of a local central amenity space for residents of this area is warranted.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendation #31 by including a greater range of inclusive features in playgrounds. 2018 Background Study, Item P01.

Project	25090403	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Stafford Neighbourhood Park is located south of Hunt Street, east of Monarch Avenue. This park is planned to incorporate open space play areas, a children's playground, walkways, basketball half-court, shade structures, seating areas, site furniture and LED lighting.

Rationale: The park will be a major central greenspace for several communities in the downtown core of Ajax and will support the development in the downtown area.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendations #25 by constructing additional basketball courts, south of the 401, and #31 including a greater range of inclusive features in playgrounds. 2018 DC Background Study, Item P14.

Project	25095001	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the construction of a new splashpad within the Castlefields Neighbourhood Park inclusive of spray features, furniture, plumbing, and shade structure.

Rationale: The new splashpad will provide additional recreation for the local community and will provide additional infrastructure to existing park.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendation #29 by building new smaller scale splashpads as part of neighbourhood park development.

DETAIL SHEET

Project Name	**Carruthers Trail - Salem to Achilles**		
Project	25090304	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Design and construction of an approximately 250 metre long, 3 metre wide asphalt paved multi-use trail along east side of Salem Road, north and south of Achilles Road. The trail alignment will require Toronto Region Conservation Authority (TRCA) detailed design clearance and permits.

Rationale: This trail will form an important pedestrian link along the Carruthers Trail system that will connect to the existing recreational trail located along Salem Road, north of Bayly.

Reference: 2018 DC Background Study, Item T61. This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages.

DETAIL SHEET

Project Name	**Duffins Tr-Paulynn to Westney (Meadoway Tr)**		
Project	26090301	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This section of trail will be located from Paulynn Park at Ravenscroft Road to Westney Road. The trail will be a 3 metre wide asphalt paved recreational trail located within the hydro corridor.

Rationale: The trail will provide additional recreational value for the community and form an important link within the Town's trail system. It will also form a section of the proposed Meadoway Trail system that will further the goal of connecting adjacent communities together.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2018 DC Background Study, Item T65.

Schedule: Design: 2026, Construction: 2027

DETAIL SHEET

Project Name	**Duffins Trail - Annandale Lands**		
Project	31070009	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Construction of an approximately 1500 metre long, 3 metre wide asphalt paved multi-use trail and pedestrian bridge through the Duffins Creek Valley. A pedestrian bridge will be necessary to traverse the Duffins Creek. The trail and bridge alignment will require Toronto Region Conservation Authority (TRCA) detailed design clearance and permits. The scope will also include the consideration of a natural playground and leash-free area.

Rationale: This trail will form an important pedestrian link along the Duffins Trail system that will connect the existing trail system at Bayly Street to the existing trail system at the CN/401 overpass. As part of the development application on file, a portion of the valley lands will be conveyed to the Toronto and Region Conservation Authority. The Town of Ajax is working with the TRCA to finalize a restoration plan and detailed design for the trail system.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages.

Schedule: Design: 2023 (unbudgeted project 23004101), Construction: 2026

Project	24090304	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project involves designing and constructing a 650-meter long, 3.0 meter wide asphalt-paved multi-use trail, including lighting and a pedestrian bridge over the Carruthers Creek. The pedestrian bridge is necessary to traverse the Carruthers Creek. The alignment of the trail and bridge will require detailed design clearance and permits from the Toronto Region Conservation Authority (TRCA).

Rationale: This trail will form an important pedestrian link along the Carruthers Trail system that will connect the existing residential development at Marjoram Drive on the east side of the Carruthers Creek to Greenhalf Drive on the west side of Carruthers Creek.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2018 DC Background Study, Item T57.

Project	27070006	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Medallion Neighbourhood Park is located at the north-west corner of Hilton Gate and Styles Crescent. The park is planned to incorporate paved pathways, landscaping, site furniture, LED lighting, multi-use courts, and a junior and senior play area.

Rationale: The delivery of this local central amenity space for residents will create a community hub for existing and future residents.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation Parks Master Plan Recommendations #25 the inclusion of additional basketball courts primarily south of the 401, and #31 to include a greater range of inclusive features in playgrounds.

Project Name	**Carruthers Marsh Park**		
Project	31070008	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This park is located at the south-west corner of Audley Road and Ashbury Boulevard, adjacent to the existing Carruthers Marsh Pavilion. Proposed improvements may include the addition of tennis/pickleball courts, a basketball court, a leash-free area, shade structure, seating areas, walkways, open space (casual) play, park lighting, and additional tree planting.

Rationale: The benefits of improving park facilities in the Town include enhanced physical activity levels in residents, improved community networking opportunities and safer neighborhoods. The retrofit of this park will provide additional park infrastructure to improve site conditions, recreational value and opportunities. Improvements will increase the usability of the park. The impact of not following the recommended schedule will result in a continued lack of recreational amenities within this community.

References: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendations #24 the construction of additional racquet sports inclusive of pickleball, #25 the construction of additional basketball courts, #31 the inclusion of a greater range of inclusive features in playgrounds, and #47 the addition of new leash-free areas within parks. 2024 Corporate Asset Management Plan.

Project Name	**Duffins South Trail Reconstruction**		
Project	24070003	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project will involve reconstructing an approximately 775 meter long, 3 meter wide asphalt paved multi-use trail, located east of Duffins Creek, stretching from 14 Vale Crescent to Garnett Drive.

Rationale: In an effort to better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements. As a result, the Duffins South trail has been prioritized for 2025.

The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2024 Corporate Asset Management Plan.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Greenwood Trail Reconstruction**		
Project	25070003	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project involves reconstructing an approximately 1,800 meter long, 3.0 meter wide asphalt-paved multi-use trail within the Greenwood Conservation Area.

Rationale: In an effort to better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements. As a result, this trail has been prioritized for 2025.
This trail is an important pedestrian connection within the Conservation Area, providing safe accessibility for all users. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2024 Corporate Asset Management Plan.

Schedule: Design & Construction: 2025

DETAIL SHEET

Project Name	**ACC North Tennis Court Rehabilitation**		
Project	25070006	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes full depth reconstruction of the court surface, including new court paving, line painting, replacement of 2 out of 4 tennis courts with pickleball courts and landscaping.

Rationale: The Town's municipal tennis court sportsfields are aging. With aging comes deterioration, including settlements, ponding and a breakdown of the playing surface which leads to an uneven pavement. The reconstruction of municipal tennis court sportsfields is a necessary component of the Town's sportsfields maintenance program, prolonging the life of the pavement structure.

In an effort to better evaluate the condition of municipal sportsfields and determine an appropriate life-cycle, staff conduct a condition assessment of all municipal sportsfields annually. As a result, Staff have identified the playing surface at the ACC north tennis court is nearing the end of its useful life cycle and is in need of reconstruction.

Reference: Annual Sportsfields Condition Assessment; 2008 Recreation, Parks & Culture Master Plan; 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 3.1: Initiate designs to modernize and redevelop facilities; 2024 Corporate Asset Management Plan.

DETAIL SHEET

Project Name	**Millers Creek East Park - Park Retrofit**		
Project	27070001	**Initially budgeted in**	2021
Submitted By	Andrew Jackson	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope for this project includes the replacement of the existing senior and junior playground equipment, basketball court, landscape improvements, new site furniture, walkway improvements, and drainage.

Rationale: The Town has an existing inventory of 110 playground structures. Based on industry guidelines, staff recommend a 15 to 20 year life cycle for these structures. Replacement playgrounds are designed and engineered to ensure compliance with CSA guidelines and The Region of Durham Health Standards.

Reference: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendation #31 by including a greater range of inclusive features in playgrounds. 2024 Corporate Asset Management Plan.

DETAIL SHEET

Project Name	**Village Greenbelt Tr Recon Jacwin to Carwin**		
Project	27070003	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is phase 1 of a 3 phase project. The segment between Jacwin to Carwin is 250 metres in length which will include the removal and replacement of existing screening, drainage improvement, site furniture and landscaping as required to revitalize the area adjacent to the trails.

Rationale: The use of screenings may be appropriate for the interim due to a lower capital cost. However, gravel requires more on-going maintenance and erode in areas with slopes or near the creek. This condition is difficult to maintain during the winter and it can be challenging to ensure that they meet AODA regulations. It is recommended to replace the existing limestone pathway to asphalt pavement.

In an effort to better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements.. As a result the trail is identified for replacement.

The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Project Name	**MCC Splashpad Replacement**		
Project	27070004	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The McLean Community Centre is located on Magill Drive, east of Westney Road. This project includes the replacement and re-design of the existing splashpad. New features will include splashpad elements for junior and senior children, accessible features, site furniture, shade structures, and paving.

Rationale: The MCC splashpad is within the central area of Town adjacent to a significant community centre which includes existing supporting amenities such as parking and washrooms. The benefits of improving park facilities in the Town include enhanced physical activity levels in residents, improved community networking opportunities and safer neighborhoods. Replacement splashpads are designed with community input and engineered to ensure compliance with CSA guidelines and the Region of Durham Health Standards. The existing splashpad has exceeded its useful life and new infrastructure is warranted.

Reference: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation and Parks Master Plan Recommendation #29 building splashpads as part of neighbourhood park development. 2024 Corporate Asset Management Plan.

Project Name	**Waterfront Trail Recon Veterans Pt Pkg Lot**		
Project	31070007	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Reconstruction of an approximately 58 meter long, 3 meter wide asphalt paved multi-use trail from the Veterans Point parking lot adjacent to the public washroom to the Waterfront trail.

Rationale: This trail will replace an existing pedestrian link which will allow all users to travel and use the shared pathway safely.

In an effort to better evaluate the condition of municipal trails and determine an appropriate life-cycle, staff conduct an inventory and assessment of all municipal trails annually. As a result, this trail was deemed a priority for 2026.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2024 Corporate Asset Management Plan.

Project	24070002	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for the Audley Recreation Centre includes the removal and replacement of the Ballpark fencing.

Rationale: Staff from Environmental Services perform annual infrastructure inspections on sports fields within the Town of Ajax. During the annual sports field inspection, staff identified that the fence at ARC Ballpark is nearing the end of its useful lifecycle and should be replaced. When replaced, it will encourage the surrounding residents and sports teams to utilize the field more often.

Reference: This project is consistent with Section 2.2.6.1 of the Town of Ajax Official Plan which states that the Town of Ajax shall establish open space and parks with amenities that encourage physical activity, wellness, and informal use opportunities for a wide range of users. This project responds to the Recreation, Parks and Culture Master Plan's goal of assuming a leadership role in providing and facilitating recreation, parks, arts and cultural services (Goal 2). 2024 Corporate Asset Management Plan.

DETAIL SHEET

Project Name	**Veteran's Point Monument Repairs**		
Project	25070002	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for the Veteran's Point Monument repairs includes the hiring of a design consultant to complete the detailed design of the necessary structural reinforcement of various granite panels located at the east and west walls located at the south end of the park. The design will include structural support of the granite walls, installation of shelf angles along entire monument on both sides, and the replacement of cracked granite panels and complete a total sealant replacement to prevent water penetration. The scope of work will also include a review of the existing Obelisk to determine if any structural improvements are required.

Additional scope will include repairs and improvements to existing lighting, unit paving, and to the existing concrete paving at walkways.

Rationale: In 2017 staff commissioned a structural assessment of the Eastern and Western Monuments. Based on the current condition and signs of deterioration, the report concluded that monument panels have shifted due to weather effects and inadequate structural supports of the granite plates. The report recommended that structural reinforcement supports be installed on the monument in order to improve the load bearing capacity of the granite panels.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Town of Ajax - Drain Inspection Camera**		
Project	25002601	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Procurement of new drain inspection camera for Town's internal use. This equipment will allow staff to examine the condition of sewer and drain lines effectively.

Rationale: Currently the Operations Department out sources drain camera inspections to the Town's contracted plumbing services, resulting in significant costs to the town. Purchasing a drain inspection camera will facilitate a faster, more precise, and be less intrusive for identifying and resolving issues with plumbing systems in town facilities. Additionally, a drain inspection camera will allow staff to provide drain locations for future projects and small to large scale repairs.

Reference: 2019-2020 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Corporate Security Upgrades**		
Project	23000201	**Initially budgeted in**	2021
Submitted By	Steve Moore, Manager of Building Maintenance	**Department**	Operations & Environmental Services
Start Year	2023	**Section**	Building Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The proposed scope of work for this project includes a holistic approach to security upgrades at Town Facilities. The upgrades include the video surveillance system, access control system and intrusion prevention system. The upgrades will be phased by building and will consist of new internet-based video systems, network video recorders, un-interruptible power supplies and detailed monitoring of all systems.

2025	Town Hall	Audley Recreation Centre
2026	Ajax Community Centre	Operations Centre
2027	Fire Station 2 Fire Station 3	Fire Station 1 (HQ)
2028	Quaker Meeting House Rotary Pavilion Carruthers Marsh Pavilion	Greenwood Pavilion Pat Bayly Square St. Francis Centre

Rationale: In 2019, the Town undertook a security threat risk analysis and assessment of all of the major Town Facilities. The assessment focused on the security of the Town Facilities along with existing policies and procedures to ensure the protection of the organization's facilities and equipment. The assessment identified various recommendations to be implemented by the Town.

Reference: Security Threat Risk and Assessment (2019), 2022-2026 Strategic Plan - Pillar 1: Connecting our Community (CC), CC Priority 4: Foster a safe and welcoming community 4.1 Increase a sense of safety and security for the community.

Schedule: Detailed design (budgeted in 2023) is underway. The project site installation would begin in the spring and be completed by the fall of each year.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Special Events Trailer**		
Project	24002901	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the purchase of an enclosed trailer for the Special Events section within the Operations and Environmental Services Department.

Rationale: The purpose of this trailer will be to support special events on a year-round basis, both in parks throughout the town and at the fairgrounds. It will store and move all the special event's material: Tents, weights, cones, signage, barricades, tables, chairs, AJAX letters, etc. It will keep equipment dry, out of the weather, and available on site to service multi-day events. This equipment will increase efficiency of event setup and delivery by allowing staff to set up the event kit in advance without taking up space in other storage areas at the Operations Center. It will also prevent Special Event staff from relying on the use of larger vehicles from other grounds maintenance, horticulture, roads, sportsfield, and forestry groups that are often pulled away before and after an event to transport all the desired equipment.

It is recommended that this trailer be purchased to ensure staff are better suited to support all Town permit sites, corporate events, and the newly scheduled Fairgrounds. As the Special Events team has expanded staff and resources over the years, the storage at Operations has become limited. This trailer will be able to accommodate both storage and transportation needs

Reference: 2019-2020 Fleet Utilization Study, 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Repurposed Vehicles - 2500 series pickups**		
Project	24003901	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of six (6) 2500 series crew cab pickup trucks that were repurposed and remained in service after being replaced within the Operations, Environmental Services, and Fleet Services sections.

Rationale: Over the past number of years, the Fleet Services section has been directed to repurpose vehicles to meet the transportation needs of various business units across the entire corporation. The program originally began as a way of adding replaced vehicles in good working condition to sections with low mileage transportation needs. This program quickly evolved to a point where vehicles were being repurposed to support additional staff that were hired without additional vehicles requested or approved.

Currently the Town's inventory of repurposed licensed vehicles consists of approximately 24% of the Town's overall licensed fleet. Keeping these vehicles to support year-round operation has put an increased amount of strain on the maintenance back log for Fleet staff. This results in more out of service time for vehicles supporting service levels, a reduction in Fleet staffs' ability to conduct preventative maintenance work, and an increase in contracted services. It is recommended that the vehicles listed herein are replaced to ensure the Operations and Environmental Services Department has an adequate supply of vehicles in good working order to support the current compliment of staff and service delivery.

Reference:-2019 Fleet Utilization Study, 2022-2026 Strategic Plan Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

Unit #	Purchased	Maintenance Costs (since replaced)	Status

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Repurposed Vehicles - Grass Cutting Equipment**		
Project	24004101	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of nine (9) repurposed grounds maintenance machines, specifically four (4) front runner mowers and five (5) zero turn mowers, that remained in service after being replaced within the Environmental Service section.

Rationale: In the past, Fleet Services section has been directed to repurpose grounds maintenance equipment to meet the operational needs for Environmental Services. Grass cutting machines were repurposed to act as spares when newer units required maintenance. Due to additional staffing, expanding grass cutting operations beyond regular business hours, and transitioning contracted services in-house, the need for more reliable spare machines has increased to accommodate out of service time on newer units. Moreover, repurposed units have started being used as front run units to ensure all grounds maintenance crews have a sufficient supply of equipment for the work required.

Keeping the equipment to support the fast-paced seasonal grounds maintenance operation has put an increased strain on the maintenance back log for Fleet staff. This results in more out of service time for machines supporting service levels, a reduction in Fleet staffs' ability to conduct preventative maintenance work, and an increase in contracted services.

It is recommended that the machines listed herein are replaced to ensure the Operations and Environmental Services Department has an adequate supply of grounds maintenance mowers in good working order to support the current compliment of staff and service delivery.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan

Specifications: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

Unit#	Purchased	Maintenance Costs (since replaced)	Status
R31001	2005	$3,300.00	In-service

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Additional Pickup - Operations**		
Project	25002101	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes an additional light duty pickup to be added to the Operations group within the Operations and Environmental Services Department.

Rationale: The purpose of this vehicle is to provide transportation support for the Technical Services and Contracted Maintenance group within the Operations section. Currently, the staffing allotment for the Technical Services and Contracted Maintenance group is comprised of three (3) permanent full-time staff, two (2) full-time contract staff, and one (1) seasonal staff. The current vehicle allotment for the six (6) staff listed is made up of one (2) pickup trucks and two (2) repurposed vehicles. With respect to recommendations emphasized in the 2019-2020 Fleet Utilization Study, the Fleet section is actively searching for opportunities to reduce the size of the current repurposed fleet.

It is recommended that one (1) pickup truck is added to the Technical Services and Contracted Maintenance group to be shared with the current two (2) lifecycled vehicles among all six (6) staff. This will not only provide staff with a suitable allotment of shared vehicles to accommodate inspections, but also reduce the number of unplanned repairs and out of service time to the aging repurposed fleet

Reference: 2019-2020 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Bike Share Program**		
Project	25003901	**Initially budgeted in**	2025
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2025	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Create a Bike Library (3 sets of 10 bicycles), preferably at the libraries and other Town Facilities, as feasible. Review possible sites for bike storage and review administrative capacity for lending bicycles. Seek funding for procuring bicycles and accessories.

Rationale: To increase access to bicycles, a bike library may be a more appropriate initial step for Ajax since it can be implemented locally using existing resources and additional funding sources without additional efforts to attract bike share companies. It also reduces the risk of technical difficulties associated with docking bicycles and are more user-friendly for people who do not have a smartphone or credit card.

A Bike Library involves lending bikes, often with the use of a Library card. Bike Libraries lend bikes either for free or with a refundable deposit fee to pay for potential damage or replacement. Currently, the Ajax Public Library lends bike locks with three at each location. The bike locks are frequently being borrowed.

The bike library project is supported by 2019 Integrated Transportation Master Plan Update, 2022-2026 Strategic Plan (Action 26), 2023 Transportation Demand Management Plan Update

Reference: 2023 Transportation Demand Management Plan Update

Schedule: The Bike Library program is expected to commence in 2025

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Roll-off Truck Attachments**		
Project	25004201	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes two (2) additional roll-off truck attachments, including a salt hopper and flat bed, to be added to the Operations and Environmental Services Department.

Rationale: By mid-summer 2024, the Roads Maintenance section within Operations and Environmental Services will be taking possession of a tandem axle brine truck, equipped as a roll off unit. The roll-off design allows for the brine tank and operation to be easily removed off the vehicle by the operator for the purpose of loading a different attachment servicing a different task. This unit was purchased with the future intent of buying more roll off implements to maximize its use all year round. A salt hopper will allow this unit to be included regularly in a winter weather event. The flat bed unit will allow the Fleet section ability to transport off road equipment easier around Town to reduce the need for contracted towing service (ie Zamboni repairs, roadside breakdowns, etc.)

By not purchasing this equipment, the Town will not be maximizing the potential usefulness of the tandem axle roll-off truck. This vehicle will be limited to only accommodate a salt brining operation. By investing in more roll-off units, Operations and Environmental Services staff will maximize the use of this vehicle all year round, and will be shared amongst multiple sections across the department.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Reel Mower (ACC Complex) - pending staff approval**		
Project	25004301	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the purchase of a new Large Area Reel Mower for the ACC sportsfield facilities.

Rationale: This Reel mower will accommodate daily grass cutting requirements for multiple sportsfields, including the opening of the premium cricket field. Pending approval, additional staff have been requested to provide dedicated daily maintenance to the entire grounds of the ACC. This mower will be a crucial resource for staff to maintain premium turf maintenance across the entire ACC Complex .

It is recommended that this mower be purchased to accommodate the sufficient quantity of machines required for grounds maintenance support at the ACC within Environmental Service section. If not purchased, the daily maintenance will need to be completed by rotating other dedicated equipment to facilitate daily grounds maintenance, which may cause service interruptions for other areas within the Environmental Services section. Moreover, this may create added pressure on aging equipment that will pose a higher risk for unplanned maintenance and longer out of service time.
The purchase of this mower, coupled with the pending approval of additional staff for the ACC, will provide the grounds maintenance team with the resources required to maintain all sportsfield facilities at a premium level for the applicable user groups.

DETAIL SHEET

Project Name	**Fire Prevention SUV**		
Project	25004401	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes one (1) additional SUV to be added to the Town's Fire Prevention and Education section.

Rationale: The purpose of this vehicle is to provide transportation support for additional staffing approved by Council in Dec 2023 as part of the fire dispatch transfer to Oshawa. The additional staff will use this vehicle continuously to accommodate Fire inspections, public education events, and transport equipment where needed. This vehicle will be shared amongst the rest of the Fire Prevention, Education, and Training team.

It is recommended that one (1) SUV is added to the Fire and Emergency Service department group to accommodate sufficient transportation needs for all current Prevention and Training staff.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**By-Law Utility Vehicle**		
Project	25004501	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the purchase of a utility vehicle for the Town's By-Law enforcement section.

Rationale: The purpose of this vehicle is to provide staff with a more suitable transportation option for inspections and enforcement along the waterfront during the annual summer enforcement period (May 15 - Sept 15). Staff enforce permitted parking areas (all parking lots along the waterfront), designated side streets, and also the Parks By-law from Frisco Bay to Carruthers Creek . A more suitable transportation option for staff along the waterfront trail will expedite their ability to get from one area to another in a more direct path. Currently staff are primarily walking and can only cover so much area in a certain time frame.

It is recommended that one (1) utility vehicle be added to the By-Law section, with dedicated use for parking enforcement at the waterfront. Currently the Waterfront Parking Enforcement staff travel via pickup truck or sedan along the road way, and/or walking, which leave gaps in staffs' ability to access all inspection areas in a timely manner. This vehicle will provide staff a more efficient solution to provide thorough inspections

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**New Bunker Gear Dryer - Station #2**		
Project	25004801	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2025	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for an additional bunker gear dryer for Station #2

Rationale: Bunker gear dryers are designed to properly dry bunker and turnout gear as well as specialized rescue suits and coveralls, helmets, gloves, boots and other Personal Protective Equipment (PPE) as per their manufacturer guidelines. Gear dryers provide the ability to dry gear much quicker than air drying as it moves air through the inside of the garments while the outside of the garment air dries. Utilizing a National Fire Protection Association (NFPA) compliant bunker gear dryer is an important step in the handling and decontaminating process of bunker and turnout gear.

Due to the recent increases in suppression staffing and an additional response apparatus (now five responding apparatus compared to four in 2022), and as outlined in the May 2021 Fire Master Plan, an additional gear dryer will aid in the drying and decontamination processes at Fire Station #2.

Reference: Ajax Fire & Emergency Services May 2021 Fire Master Plan, Ministry of Labour, Training and Skills Development Firefighter's cancer prevention checklist, NFPA 1851 Selection, Care, and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, Section 21 Guidance Note 4-8 Care, Maintenance, inspection, and replacement of Structural Firefighting personal protective equipment.

Schedule: Replacement to be completed by end of 2025.

DETAIL SHEET

Project Name	**Pickup Crew Cab - pending new staff approval**		
Project	25090402	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes an additional pickup truck to be added to the Town's Environmental Services section within Operations and Environmental Services.

Rationale: Over the past five (5) years the Environmental Services section has assumed approximately five (5) hectares of park land in the north-east corridor to be maintained with no dedicated additional equipment or staff. This growth, along with the expanded grounds maintenance demands that will come with the Fairgrounds and Cricket Pitch projects, requires additional equipment that will be necessary to maintain service levels.

By not purchasing this equipment, staff will continue to service all grounds maintenance areas, including those areas newly assumed by the Town over the past few years and into next year, using existing resources. The existing resources accounted for the equipment needed to deliver sufficient grounds maintenance service to all assumed areas prior to any growth. If not purchased, meeting all grounds maintenance requirements will put a strain on the current equipment, and may result in delayed service delivery and challenges keeping up with premium service demands the newly designed Fairgrounds and Cricket Club will require.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Repurposed Vehicles - Light/Medium Duty Tractors**		
Project	25002201	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of four (4) repurposed Sportsfield Large Area Mowers that remained in service after being replaced within the Environmental Service section.

Rationale: Over the past number of years, the Fleet Services section has been directed to repurpose light/medium duty parks and winter maintenance tractors to meet the operational needs for Environmental Services. Historically, this equipment was repurposed to act as spares when newer units required maintenance. Due to additional staffing needs, expanding sportsfield and trail maintenance, and ongoing pressures associated with sidewalk snow removal the need for more reliable spare machines has increased to accommodate out of service time on newer units. Moreover, repurposed units have started being used as front run units to ensure all parks, sportsfield, and sidewalk snow removal staff have a sufficient supply of equipment for the work required. Keeping these tractors to support the fast-paced maintenance operation has put an increased amount of strain on the maintenance backlog for Fleet staff. This results in more out of service time for machines supporting service levels, a reduction in Fleet staffs' ability to conduct preventative maintenance work, and an increase in contracted services. It is recommended that the machines listed herein are replaced to ensure the Operations and Environmental Services Department has an adequate supply of light/medium duty tractors in good working order to support the current compliment of staff and service delivery.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable timeframe projected by the successful vendor.

Unit #	Purchased	Maintenance Costs (since replaced)	Status

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Repurposed Vehicles - SUVs and Light Duty Pickups**		
Project	25002301	**Initially budgeted in**	2024
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of seven (7) SUVs and two (2) pickup trucks that were repurposed and remained in service after being replaced within the Operations, Environmental Services, and Fleet Services sections.

Rationale: Over the past number of years, the Fleet Services section has been directed to repurpose vehicles to meet the transportation needs of various business units across the entire corporation. The program originally began as a way of adding replaced vehicles in good working condition to sections with low mileage transportation needs. This program quickly evolved to a point where vehicles were being repurposed to support additional staff that were hired without additional vehicles requested or approved.
Currently the Town's inventory of repurposed licensed vehicles consists of approximately 24% of the Town's overall licensed fleet. Keeping these vehicles to support year-round operation has put an increased amount of strain on the maintenance back log for Fleet staff. This results in more out of service time for vehicles supporting service levels, a reduction in Fleet staffs' ability to conduct preventative maintenance work, and an increase in contracted services. It is recommended that nine (9) vehicles, ranging from light duty pickups to SUVs, are replaced to ensure the Operations and Environmental Services Department has an adequate supply of vehicles in good working order to support the current compliment of staff and service delivery. While most of these vehicles are still in service, there are three (3) that have been decommissioned over the past year. Re-organizing the fleet and securing rental vehicles have supplemented the gap for the short term, but it is recommended that permanent replacements are secured to accommodate the required vehicle needs.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

DETAIL SHEET

Project Name	**New Fire Rescue Boat**		
Project	26001701	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2026	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the purchase of a rapid deployment inflatable boat.

Rationale: The Town of Ajax has approximately 6 kilometers of shoreline that Ajax Fire and Emergency Services may respond to in an emergency. Due to the depth of the water, our partner agency that responds with boat (PARA Marine Search and Rescue) can only get within 750 feet to shore in many areas. PARA rescuers do not leave their boat to enter the waters. This is an extensive distance that needs to be accessible by AFES responding rescue teams. Due to potential offshore winds and surf conditions at times, a rapid deployment inflatable boat with a closed bow and hull would allow teams to be able to break surf in order to reach these extended distances.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Pumper Apparatus P410 (2007)**		
Project	24020102	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of Fire Apparatus Pumper P410 within the Fire and Emergency Services section.

Rationale: Fire Apparatus Pumper P410 has been a front-line Emergency Response Apparatus since 2007. The National Fire Association and Fire Underwriters Survey both recommend replacement of front-run units after 15 years. Utilization of the asset is considered very good considering the call volume this asset is expected to respond to. Annual maintenance costs are considered high averaging $15,000 per year. Recent head gasket and diesel particulate filter maintenance issues have increased the maintenance costs drastically this past year. It is recommended that Fire Apparatus pumper P410 be replaced in order to continue to provide acceptable Fire and Emergency response to Town of Ajax residents and visitors to Ajax.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Stake Truck 13006 (2012)**		
Project	24070104	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of stake truck #13006 within the Environmental Services section.

Rationale: Stake truck #13006 has exceeded it's useful life (12 years) within the Operations section. It is recommended that the truck be replaced to provide transportation for staff and equipment for the purpose of grounds maintenance within the Environmental Services section. In accordance with the 2019 Fleet Utilization Study, a vehicle of this size and class with medium to low mileage will be better suited with a gasoline engine. Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles, but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Low mileage diesel vehicles are more prone to experience engine emission issues, which can be quite costly and time consuming to repair.

Extending the life cycle of this asset may result in significant service delivery interruptions due to unplanned repairs and long wait times to clear emission specific engine faults.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Pumper Apparatus Unit P47 (2010)**		
Project	25020101	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of Fire Apparatus Pumper P47 within the Fire and Emergency Services section.

Rationale: Fire Apparatus Pumper P47 has been a front-line Emergency Response Apparatus since 2007. The National Fire Association and Fire Underwriters Survey both recommend replacement of front-run units after 15 years. Utilization of the asset is considered very good considering the call volume this asset is expected to respond to. Annual maintenance costs are considered high averaging $15,000 per year. Recent head gasket and diesel particulate filter maintenance issues have increased the maintenance costs drastically over the past few years. It is recommended that Fire Apparatus pumper P47 be replaced in order to continue to provide acceptable Fire and Emergency response to Town of Ajax residents and visitors to Ajax.
By deferring replacement of a front run unit, there will be an increased risk of out of service time pertaining, but not limited, to engine and turbo maintenance, diesel emissions repairs, wear and tear to equipment storage compartments, etc. The age and design of this unit is also susceptible to frame rail separation, due to a build up of rust and corrosion overtime, which can lead to long out of service times, up to and including permanent removal from service.

Project Name	**Repl. SCBA Test Equipment (posi check)**		
Project	25020105	**Initially budgeted in**	2022
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2025	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the replacement of existing Posichek device and all related components and software.

Rationale: The current Posichek machine has been in service for over fifteen years and is beyond its projected life expectancy. NFPA 1852 mandates that all compliant self-contained breathing apparatus are to be tested on a calibrated breathing machine before being put into service and at least once per year thereafter. The Posichek device is the machine which completes this required testing. Elements of this testing include:

- Facepiece leak check
- Exhalation check valve opening pressure
- Static facepiece pressure
- Bypass flow rate
- Pressure gauge accuracy
- Low pressure alarm activation
- First stage regulator performance
- Breathing resistance at standard (40 LPM)
- Breathing resistance at maximum (100 LPM)

Reference: NFPA 1852 – Standard on Selection, Care, and Maintenance of Open-Circuit Self-Contained Breathing Apparatus (SCBA).

Schedule: The hardware will be purchased and put into operation in 2025.

DETAIL SHEET

Project Name	**Repl. Fire Apparatus Mobile Base Radios**		
Project	25020109	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2025	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is to arrange for the replacement of three older base radios that are on the fire apparatus.

Rationale: The Ajax Fire and Emergency Services radio communications system works in conjunction with the regional radio trunking system. It is vital that all fire service radios are maintained and operational as this communication is a direct lifeline for firefighters, command and the dispatch center. Mobile base radios are the radios located and mounted within the apparatus so that the apparatus crew can remain in contact with the regional dispatch center and additional crews responding to an incident. Some of these base radios are becoming problematic and requiring extra repair and maintenance due to the extended age of them as some of the older units were transferred and installed into the present apparatus as the older apparatus had retired. These mobile units are between 15 and 20 years old and are due for replacement.

Reference: NFPA 1561 Standard on Emergency Services Incident Management System and Command Safety, Section 21 Guidance Note 2-3 Radio Communications, Occupational Health and Safety Act

Schedule: Replacement project to be completed by end of 2025

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Street Sweeper 151701 (2015)**		
Project	25030201	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of street sweeper #151701 within the Operations Section.

Rationale: Street sweeper #151701 has reached it's useful life (12 years) within the Operations Section. It is recommended that street sweeper #151701 be replaced to provide reliable and regularly scheduled street sweeping service within the roads Operations section. Extending the life cycle of this asset may result in significant service delivery interruptions.

The unit has suffered from constant break downs and minimal product support from the dealer and manufacturer. The unit manufacturer and parts suppliers are from Europe, coupled with limited local inventory and lack of dealer support which have caused the unit to be down for more than six (6) weeks at a time, usually during peak season demand. The wait time for parts is usually measured in weeks with no delivery time confirmed due to supply chain issues. Along with long out of service times, this unit is regularly brought into the shop to replace hydraulic lines that are no longer able to support the daily operation of this unit.

During the 2023/2024 winter season, this unit was sent back to the dealer to address ongoing hydraulic leaks over the past few years, along with a list of other small repairs. The quote was received back at a cost believed to exceed the current value of the unit, thus resulting in the decision to remove the unit from service permanently and seek a more reliable solution for the 2025 budget season.

DETAIL SHEET

Project Name	**Trailer 72000 Repl**		
Project	25070104	**Initially budgeted in**	2025
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of trailer unit #72000 within the Operations Section.

Rationale: Trailer unit #72000 has exceeded its useful life (15 years) within the Operations Section. It is recommended the unit be replaced to provide safe and reliable transportation services for equipment required to support the department's line painting program. The purpose of this program is to re-paint various roadway lines, bike lanes, stop bars, trail asphalt markings, etc. in response to a list of identified areas each year.
In 2024, an internal report was developed to support a dedicated crew to carry out line painting operations in the spring, summer, fall months at all hours of the day. The safe delivery of this program requires extensive signage and pylons to ensure local traffic is aware of the operation from a distance in low-light conditions. The replacement trailer will be enclosed to house all traffic safety devices and a new paint machine approved for purchase in 2024. Currently storage for all equipment is limited to available space in the back of vehicles and a smaller trailer. If this unit is not approved, staff run the risk of not being able to transport all required equipment needed to operate this program safely and efficiently.

DETAIL SHEET

Project Name	**Repl Fitness Centre Equip - 2025**		
Project	25070201	**Initially budgeted in**	2021
Submitted By	Kevin Smith, Active Living Coordinator	**Department**	Recreation & Culture
Start Year	2025	**Section**	Recreation Facilities

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Fitness & Health Centres have a lifecycle plan for fitness equipment replacement and upgrading.

Rationale: Cardiovascular and weight equipment have a limited life expectancy. The staggered replacement of older equipment avoids all equipment having to be replaced at the same time or under emergency conditions which can be costly. This replacement plan will result in less downtime of the equipment and assist in maintaining reasonable preventative maintenance repair and service costs. Upgraded equipment will reflect current trends in the industry which supports member needs, sales and retention.

Reference: 2024 Asset Management Plan

Schedule: Tender will be issued late summer following new industry launches for fitness technology and equipment. This will ensure we are providing our members with the most updated equipment and services.

DETAIL SHEET

Project Name	**By-Law Pickup Unit #141201 (2014)**		
Project	23023001	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of pickup truck #141201 within the By-Law section.

Rationale: Pickup truck #141201 has reached its useful life (9 years) within the By-Law section. It is recommended that pickup truck #141201 be replaced to provide transportation for staff and materials within the By-Law section. This vehicle is dedicated to various staff members for the purpose of routine inspections and/or responding to resident inquiries. This vehicle is expected to be readily available 24-7, year round.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, parking enforcement, routine inspections, customer inquiries, etc.

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Stake Truck 13010 (2013)**		
Project	23070101	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of stake truck #13010 within the Environmental Services, Forestry section.

Rationale: Stake truck #13010 has reached it's useful life (12 years) within the Forestry section. It is recommended that stake truck #13010 which uses diesel be replaced by a gasoline truck, which tend to have less emissions, to provide transportation for staff and equipment for the purpose of tree removal within the Environmental Services section. In accordance with the 2019 Fleet Utilization Study, a vehicle of this size and class with medium to low mileage will be better suited with a gasoline engine. Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles, but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Low mileage diesel vehicles are more prone to experience engine emission issues, which can be quite costly and time consuming to repair.

Extending the life cycle of this asset may result in significant service delivery interruptions due to unplanned repairs and long wait times to clear emission specific engine faults.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Project Name	**Crew Cab 4X4 Sign Truck 13008 (2013)**		
Project	24030201	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of sign truck #13008 within the Operations, Roads section.

Rationale: Sign truck #13008 has exceeded it's useful life (9 years) within the Roads section. It is recommended that the sign truck be replaced to provide transportation for staff, tools, and equipment for the purpose of sign and radar board installation/removal, and repairs.
In accordance with the 2019 Fleet Utilization Study, a vehicle of this size and class with medium to low mileage will be better suited with a gasoline engine. Moreover, the industry has enhanced the power and resiliency of gas engines to support a vehicle of this size, reducing the need for an under-utilized diesel engine that can be costly to maintain throughout the useful life of the vehicle.
Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles, but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Project	24070107	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of five tandem axle ground maintenance trailers within the Operations and Environmental Services sections.

Rationale: Each of the trailers listed above have either reached or extended their projected life cycle. It is recommended that all units are replaced to maintain a safe and adequate means of transporting equipment for various crews within Operations and Environmental Services.
Continuing to extended the life cycle of these units poses an increased risk for unplanned repairs. Service delivery interruptions if not replaced may include, but not limited to, no transportation for grounds maintenance equipment, sportsfield equipment, or road construction equipment.

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Building Hybrid Car 15301 (2015)**		
Project	24080001	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of the hybrid sedan #15301 within the Building Approvals section.

Rationale: The hybrid sedan #15301 has exceeded its useful life (7 years) within the Building Approvals section.It is recommended that the hybrid sedan #15301 be replaced to with an environmentally friendly hybrid/electric SUV to provide building approvals staff with the appropriate transportation necessary to conduct inspections within construction zones.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, staffs' inability to respond to site inspections with the appropriate transportation required.
Battery degradation in hybrid vehicles occurs over the life span of the vehicle. Limited warranty on these batteries typically does not exceed eight (8) years, at which time battery replacement is more likely due to its in ability to hold a charge. Based on the type of use and risk mitigation for excessive maintenance and repair costs it is recommended for these vehicles to be replaced at a seven (7) year life cycle. The low mileage on this unit will increase the risk of battery degradation as the battery discharge has been very low over the life cycle of this vehicle.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Building Sedan 10013 (2015)**		
Project	24080003	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of the diesel sedan #10013 within the Building Approvals section.

Rationale: The diesel sedan #10013 has exceeded its anticipated life expectancy (7 years) within the Building Approvals section. It is recommended that the diesel sedan #10013 be replaced to with an environmentally friendly hybrid/electric SUV to provide building approvals staff with the appropriate transportation necessary to conduct inspections within construction zones.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, staffs' inability to respond to site inspections with the appropriate transportation required.
In accordance with recommendations provided through the 2019 Fleet Utilization Study, the ideal fuel source for a low mileage light duty sedan is gasoline or hybrid electric. Diesel engines within Town's fleet are more beneficial and cost efficient on heavy duty units, and/or units with higher mileage. By extending the life cycle of sedan #10013, there is an increased chance for out of service time to diagnose emissions related engine faults. Replacing this vehicle with a more environmentally friendly and suitable sized engine will reduce the need for future unplanned repairs.

Scope: This project includes the replacement of the hybrid sedan #17301 within the Building Approvals section.

Rationale: The hybrid sedan #17301 has reached its useful life (7 years) within the Building Approvals section. It is recommended that the hybrid sedan #17301 be replaced to with an environmentally friendly hybrid/electric SUV to provide building approvals staff with the appropriate transportation necessary to conduct inspections within construction zones.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, staffs' inability to respond to site inspections with the appropriate transportation required.
Battery degradation in hybrid vehicles occurs over the life span of the vehicle. Limited warranty on these batteries typically does not exceed eight (8) years, at which time battery replacement is more likely due to its in ability to hold a charge. Based on the type of use and risk mitigation for excessive maintenance and repair costs it is recommended for these vehicles to be replaced at a seven (7) year life cycle. The low mileage on this unit will increase the risk of battery degradation as the battery discharge has been very low over the life cycle of this vehicle.

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.
Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name **Forklift 1708 (2011)**

Project 25030207 **Initially budgeted in** 2021

Submitted By Scott Glew, Manager of Fleet Services **Department** Operations & Environmental Services

Start Year 2026 **Section** Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of forklift #1708 within the Fleet and Inventory Services section.

Rationale: Forklift #1708 has yet to reach it's useful life (15 years) within the Fleet and Inventory Services Section. It is recommended that forklift #1708 be replaced to provide Fleet and Inventory staff with an updated fully electric unit before the current battery and charging mechanism start to deteriorate. Battery degradation begins to be a point of concern on a lead acid battery after five (5) years. Once five (5) years has been reached, the battery and charging components are susceptible to more frequent repairs. A replacement unit is recommended to ensure the battery is operating at full capacity, and to properly asses the life span of the unit based on the manufacturer's recommended useful life for the type of battery installed (ie lead-acid, lithium-ion, etc.).

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**RFID Equipment Replacement**		
Project	26010203	**Initially budgeted in**	2023
Submitted By	Sarah Vaisler, Chief Librarian & Executive Officer	**Department**	Library Services
Start Year	2026	**Section**	Ajax Public Library

PROJECT DESCRIPTION / JUSTIFICATION

Scope: As part of the renewal cycle, the Ajax Public Library aims to replace or upgrade existing RFID hardware. The RFID hardware was initially deployed in 2017 and has been used daily since then. This usage has strained the hardware, resulting in increased support and maintenance calls.

Rationale: Each year, Ajax Public Library replaces and upgrades existing technology hardware based on established industry standard lifecycle timelines and needs. In the past, the Library would replace hardware when it was broken or on the verge of breaking. This led to poor performing, outdated hardware being used. This also led to increased risks of hardware failure and service costs. Life cycles on RFID is seven years which is based on both industry standard, along with the wear and tear of daily usage. All RFID equipment is due to be replaced. This includes: scanning pads, self check units and gates at each Library location.

Reference: Information Technology Strategic Plan identifies the need for the Town of Ajax to ensure its technology offerings are up to date and in best working order. The Memorandum of Understanding between the Town of Ajax and the Ajax Public Library identifying the need to upgrade hardware regularly.

Schedule: 7 year replacement cycle, due 2026 and 2033.

DETAIL SHEET

Project Name	**Repl. Fire Station Extractors**		
Project	26020103	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2026	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the replacement of the existing hard mount bunker gear extractors at Fire Headquarters Station #1 and at Fire Station #3.

Rationale: Extractors are designed and built to aid in removing deadly carcinogens and chemicals that have attached themselves to turnout and bunker gear. Eliminating these carcinogens is crucial to every fire department across the country. Routine cleaning and sanitizing of soiled PPE items is important to reduce the risk of exposure to carcinogens. Utilizing an NFPA compliant turnout gear extractor is the first step towards properly handling contaminated bunker and turnout gear. As the existing equipment has been in operation since 2008, repairs are becoming prevalent and costs to repair can be extremely high.

Reference: Ministry of Labour, Training and Skills Development Firefighter's cancer prevention checklist, NFPA 1851 Selection, Care, and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, Section 21 Guidance Note 4-8 Care, Maintenance, inspection and replacement of Structural Firefighting personal protective equipment.

Schedule: Replacement of Extractor located at 900 Salem Road (Headquarters Fire Station #1) in 2026 and replacement of extractor located at 40 Westney Road (Fire Station #3) in 2027.

DETAIL SHEET

Project Name	**Rep. Bunker Gear Dryer - Station #3**		
Project	26020104	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2026	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the replacement of bunker gear dryer for Station #3.

Rationale: Bunker gear dryers are designed to properly dry bunker and turnout gear as well as specialized rescue suits and coveralls, helmets, gloves, boots and other Personal Protective Equipment (PPE) as per their manufacturer guidelines. Gear dryers provide the ability to dry gear much quicker than air drying as it moves air through the inside of the garments while the outside of the garment air dries. Utilizing a National Fire Protection Association (NFPA) compliant bunker gear dryer is an important step in the handling and decontaminating process of bunker and turnout gear.

Reference: Ajax Fire & Emergency Services May 2021 Fire Master Plan, Ministry of Labour, Training and Skills Development Firefighter's cancer prevention checklist., NFPA 1851 Selection, Care, and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, Section 21 Guidance Note 4-8 Care, Maintenance, inspection, and replacement of Structural Firefighting personal protective equipment.

Schedule: Replacement to be completed by end of 2026.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Repl. Command Cars Mobile Base Radios**		
Project	26020105	**Initially budgeted in**	2025
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2026	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is to arrange for the replacement of two older mobile base radios that are on the fire command cars.

Rationale: The Ajax Fire & Emergency Services radio communications system works in conjunction with the regional radio trunking system. It is vital that all fire service radios are maintained and operational as this communication is a direct lifeline for firefighters, command and the dispatch center. Mobile base radios are the radios located and mounted within the command cars so that the incident commanders can maintain and have constant contact with apparatus crews while responding and while at emergency scenes. These base radios are becoming problematic and requiring extra repair and maintenance due to the extended age of them as the units that are presently in the cars were transferred from older apparatus or vehicles as the older apparatus retired. These mobile units are between 15 and 20 years old and are due for replacement.

Reference: NFPA 1561 Standard on Emergency Services Incident Management System and Command Safety, Section 21 Guidance Note 2-3 Radio Communications, Occupational Health and Safety Act.

Schedule: Replacement project to be completed by end of 2026.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Boom Truck 24007 (2014)**		
Project	26070101	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of boom truck unit #24007 within the Environmental Services, Forestry Section.

Rationale: Boom truck unit #24007 has nearly reached its anticipated life expectancy (12 years) within the Forestry Section. It is recommended that this unit be replaced to provide safe and reliable tree removal and maintenance services. This unit is the only one within the Town's fleet of its size and type. It is expected to be readily available 24-7 year round in response to emergency tree removals, as seen in recent years' storm cleanup efforts, and daily to accommodate the forestry work order backlog. It is recommended that this boom truck be replaced at the end of the scheduled life cycle year as to not risk being removed from service for unplanned repairs.
Extending the life cycle of this unit puts the forestry section at risk of experiencing longer than ordinary out of service time due to more frequent unplanned repairs. This will not only leave the forestry section without the proper equipment necessary to complete daily tasks, but may also assume larger costs for repairs, bucket inspections and repairs, and potential temporary assistance from contracted services to support seasonal work plans.

Reference: 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

Project Name	**Large Area Mower 171101 (2017)**		
Project	26070102	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of large area mower (LAM) (sports) #171101 within the Environmental Services Section.

Rationale: This LAM has reached its useful life (8 years) within the Environmental Services Section. It is recommended that this LAM be replaced to accommodate the sufficient quantity of machines required for grounds maintenance support within Environmental Service section. If not replaced, the LAM is at higher risk of being removed from service for unplanned repairs, which may cause service interruptions for the Environmental Services section. These service interruptions may cause for smaller equipment to fill the gaps where needed, posing an increased risk of unplanned repairs to smaller units not equipped for the task, or the section's inability to meet service level agreements.

Reference: 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Project 26070105 **Initially budgeted in** 2022

Submitted By Scott Glew, Manager of Fleet Services **Department** Operations & Environmental Services

Start Year 2026 **Section** Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of zero turns #18102 within the Environmental Services Section.

Rationale: This zero turn has reached the anticipated life expectancy (8 years) within the Environmental Services Section.
It is recommended that this unit be replaced to accommodate the sufficient quantity required for grounds maintenance support within Environmental Service section. If not replaced, this zero turn is at a higher risk of being removed from service for unplanned repairs, which may cause service interruptions for the Environmental Services section.

Project Name	**Repl Fitness Centre Equip - 2026-2034**		
Project	26070201	**Initially budgeted in**	2021
Submitted By	Kevin Smith, Active Living Coordinator	**Department**	Recreation & Culture
Start Year	2026	**Section**	Recreation Facilities

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Fitness & Health Centres have a lifecycle plan for fitness equipment replacement and upgrading.

Rationale: Cardiovascular and weight equipment have a limited life expectancy. The staggered replacement of older equipment avoids all equipment having to be replaced at the same time or under emergency conditions which can be costly. This replacement plan will result in less downtime of the equipment and assist in maintaining reasonable preventative maintenance repair and service costs. Upgraded equipment will reflect current trends in the industry which supports member needs, sales and retention.

Reference: 2024 Asset Management Plan

Schedule: Tender will be issued late summer following new industry launches for fitness technology and equipment. This will ensure we are providing our members with the most updated equipment and services.

Project	26070301	**Initially budgeted in**	2025
Submitted By	Recreation & Cultural Services	**Department**	Recreation & Culture
Start Year	2026	**Section**	Recreation Facilities

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Replacement of our two Auto scrubbers currently being at the Ajax Community Centre. The current machines were purchased in 2015 (Karcher B90) and 2016 (Windsor Chariot). These machines are now nearing the end of their useful life and need to be replaced.

Rationale: The auto scrubbers are currently used at minimum, 3 – 5 hours a day, Monday to Friday. On weekends, the usage can increase to 5 – 8 hours a day. The machines are used to perform cleaning and maintenance of the facility. The expected expected lifespan of the floor scrubbers is 8 - 10 years.

Failure to replace these machines will impact the cleanliness of the facility and incur additional repair costs.

Reference: Rec. Master Plan, 2024 Corporate Asset Management Plan.

Schedule: The tender will be issued late spring.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Sweeper 161701 (2016)**		
Project	28030201	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of mini sweeper #161701 within the Operations Section.

Rationale: Mini sweeper #161701 has not yet reached it's useful life (12 years) within the Operations Section. The unit has suffered from constant break downs and minimal product support from the dealer and manufacturer. The unit manufacturer and parts suppliers are from Europe, coupled with limited local inventory and lack of dealer support which have caused the unit to be down for more than six (6) weeks at a time, usually during peak season demand. The wait time for parts is usually measured in weeks with no delivery time confirmed due to supply chain issues. Along with long out of service times, this unit is regularly brought into the shop to replace hydraulic lines that are no longer able to support the daily operation of this unit.
It is recommended that unit #161701 be replaced to provide reliable and regularly scheduled easement, trails, sidewalk, and parking lot sweeping service within the roads Operations section. Forgoing replacement of this asset may result in significant service delivery interruptions.
During the 2023/2024 winter season, this unit was sent back to the dealer to address ongoing hydraulic leaks over the past few years, along with a list of other small repairs. The repair list in the off season has been getting increasing larger and more expensive. If not replaced, there is a concern that the eventual annual cost for maintenance will surpass the current value of the unit.

DETAIL SHEET

Project Name	**Ice Resurfacer 153601 (2015)**		
Project	30070201	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of ice conditioner unit #153601 within the Recreation and Culture department.

Rationale: Ice conditioner 153601 was purchased in 2015 and is recommended for replacement based on a life cycle recommendation of seven (7) years from various manufacturers and previous internal life cycle schedules.
This unit is expected to service two (2) ice surfaces on a daily basis. Based on the increasing out of service time for unplanned repairs, excessive engine hours, and environmental impact associated with emissions, extending the life expectancy any further is not advised. Moreover, the options for fully electric ice conditioners is quite advanced and will support the Town's goals of future net zero emissions targets.
The purpose of this unit is to be readily available 24-7 for ice surface maintenance, typically working simultaneously between two (2) pads. If not replaced, there is an increased risk of out of service time for this unit to address ongoing maintenance concerns. The result of this service disruption will put more strain on other ice conditioners similar in age and hours of use, increasing the likely hood for out of service time on multiple units.

DETAIL SHEET

Project Name	**Pickup Truck Unit #12516 (2014)**		
Project	23010203	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of pickup truck #12516 within the Infrastructure and Asset Management (IAM) group.

Rationale: Pickup truck #12516 has reached its useful life (9 years) within the IAM section. It is recommended that pickup truck #12516 be replaced to provide transportation for staff and materials within the IAM section. This vehicle is dedicated to various staff members for the purpose of site inspections and/or responding to contractor inquiries. This vehicle is expected to be readily available on a daily basis year round.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, limited ability for staff to conduct routine inspections and/or site meetings with contractors.

Reference: 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Hybrid Sedan 15303 (2015)**		
Project	23020105	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of the hybrid sedan #15303 within the Fire and Emergency Service (FES) section.

Rationale: The hybrid sedan #15303 has exceeded its useful life (7 years) within the FES, Fire Prevention section. It is recommended that the hybrid sedan #15303 be replaced to with an environmentally friendly hybrid/electric SUV to provide building approvals staff with the appropriate transportation necessary to conduct inspections
within construction zones. Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, staffs' inability to respond to site inspections with the appropriate transportation required.
Battery degradation in hybrid vehicles occurs over the life span of the vehicle. Limited warranty on these batteries typically does not exceed eight (8) years, at which time battery replacement is more likely due to its in ability to hold a charge. Based on the type of use and risk mitigation for excessive maintenance and repair costs it is recommended for these vehicles to be replaced at a seven (7) year life cycle. The low mileage on this unit will increase the risk of battery degradation as the battery discharge has been very low over the life cycle of this vehicle.

Reference: 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Project	24070103	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of sportsfield equipment units #15403, 44000, 44002, 44003, 44004, and 44006 within the Environmental Services Section.

Rationale: These sportsfield implements have reached its useful life (9-20 years) within the Environmental Services Section. It is recommended that these units be replaced to accommodate the high level grounds maintenance support within Environmental Service section. If not replaced, these units are at a much higher risk of being removed from service for unplanned repairs, which may cause service interruptions for the Sportsfield working group.

The equipment listed herein are speciality units to accommodate the high level of ground maintenance required for various permit sport facilities around town. Each unit has a specific purpose integral to turf management for the Sportfield group, which can pose concerns when out of service for an extended period of time. Other equipment is

not set up to maintain the speciality turf design within these facilities. More frequent repairs and out of service time are various risks associated with extended the lifecycle

of these mowers, which will limit staffs' ability to maintain premium levels of service.

This vehicle is dedicated to various staff members for the purpose of facility cleaning, transporting equipment and staff, and/or responding to customer inquiries amongst the indoor permit rental program. This vehicle is expected to be readily available on a daily basis year round, seven (7) days a week.
Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, limited ability for staff to respond to customer inquiries year around throughout the Town's indoor permit rental locations.

DETAIL SHEET

Project Name	**Repl. Fire Hazard Trailer #395-1 (2002)**		
Project	25020102	**Initially budgeted in**	2021
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2027	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The existing Fire Prevention fire safety house (unit 395-1) was purchased in 2002. This fire safety house is specifically designed to provide an interactive educational experience for children at many public education events. The replacement is recommended to help utilize new technology and incorporate changes to the fire and building codes that involve fire and life safety.

Rationale: The interactive simulation exposes children to common hazards found in a residence and is delivered in a safe and engaging environment for the children. The education focuses on burn prevention, fire escape planning and fire escape techniques. Children take home the lessons learned from their interactive experience to share with their families. This transfer of knowledge will reduce the future risk of injury and death from fire in our community.

Reference: Fire Protection and Prevention Act, 1997, S.O. 1997, c.4.

Schedule: To be complete by December 2027.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name **By-Law Hybrid Car Unit #16301 (2016)**

Project 25023002 **Initially budgeted in** 2021

Submitted By Scott Glew, Manager of Fleet Services **Department** Operations & Environmental Services

Start Year 2027 **Section** Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of the hybrid sedan #16301 within the By-Law section.

Rationale: The hybrid sedan #16301 has exceeded its useful life (7 years) within the By-Law section. It is recommended that the hybrid sedan #16301 be replaced to with an environmentally friendly hybrid/electric SUV to provide by-law staff with the appropriate transportation necessary to conduct inspections within construction zones.

Extending the life cycle of this asset may result in more frequent unplanned repairs, posing a higher chance of significant service delivery interruptions including, but not limited to, staffs' inability to respond to site inspections with the appropriate transportation required.

Battery degradation in hybrid vehicles occurs over the life span of the vehicle. Limited warranty on these batteries typically does not exceed eight (8) years, at which time battery replacement is more likely due to its in ability to hold a charge. Based on the type of use and risk mitigation for excessive maintenance and repair costs it is recommended for these vehicles to be replaced at a seven (7) year life cycle. The low mileage on this unit will increase the risk of battery degradation as the battery discharge has been very low over the life cycle of this vehicle.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Stake Truck 16501 (2016)**		
Project	25070101	**Initially budgeted in**	2021
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of stake truck #16501 within the Environmental Services section.

Rationale: Stake truck #16501 has not reached it's anticipated life expectancy (12 years) within the Operations section.

It is recommended that stake truck #16501 be replaced to provide transportation for staff and equipment for the purpose of grounds maintenance within the Environmental Services section. In accordance with the 2019 Fleet Utilization Study, a vehicle of this size and class with medium to low mileage will be better suited with a gasoline engine. Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles, but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Low mileage diesel vehicles are more prone to experience engine emission issues, which can be quite costly and time consuming to repair.

Extending the life cycle of this asset may result in significant service delivery interruptions due to unplanned repairs and long wait times to clear emission specific engine faults.

DETAIL SHEET

Project Name	**Repl. Hazmat Equipment**		
Project	27020101	**Initially budgeted in**	2022
Submitted By	Aaron Burridge, Fire Chief	**Department**	Fire & Emergency Services
Start Year	2027	**Section**	Fire Administration

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is for the replacement of our existing equipment that the Ajax Fire & Emergency Services utilizes for operations level mission specific hazmat rescue and response. These items will include but are not limited to the following: brushes, PPE, bladders, pools, barrels/drums etc. may be subject to various chemicals, known and unknown and waste water run-off caused by the decontamination processes of the firefighters or exposed civilians.

Rationale: Fire departments providing hazardous materials response should meet the requirements of NFPA 472 and NFPA 1072 while providing appropriate supervision, resources, and the equipment that corresponds to the required level of response and rescue, as determined by the municipality's establishing and regulating by-law. First responders at the mission specific level may also perform rescues and take defensive actions from a safe distance which will control the release and keep the hazardous materials from spreading. These actions are intended to protect nearby persons, property, and the environment from the effects of the release.

Reference: NFPA 472 & 1072. Section 21 Guidance Note #7-2

Schedule: To be completed by September 2027 and 2032.

Project	27020102	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of Fire and Emergency Services (FES) Deputy Chief Vehicle Car 41, Fleet Asset #21041 within the Section.

Rationale: FES Car 41 has reached its useful life (7 years) . It is currently supporting the transportation needs for one of the Deputy Chiefs for response requirements. Utilization of the asset is considered very good with an average use of 20,000 km per year. Annual maintenance costs are considered low due to the bi-annual preventative maintenance and seasonal tire change, which reduces the need to conduct unplanned repairs.
It is recommended that Car 41 be replaced to provide reliable transportation for the Deputy Chief. Extending the life cycle of this asset may result in significant service delivery interruptions.

Project	27031001	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of snow plow unit #24008 within the Operations Section.

Rationale: Snow plow unit #24008 has reached its useful life (12 years) within the Operations Section. It is recommended that snow plow unit #24008 be replaced to provide safe and reliable snow clearing services within the roads Operations section. The purpose of the Town's fleet of snow plows is to respond in a timely fashion to winter weather events to clear or reduce snow and ice build-up as per the time lines specified through legislation and the Town's service level agreements.
It is recommended that snow plows are replaced at the end of their scheduled life cycle year as to not risk being removed from service for unplanned repairs.
Snow plow unit # 24008 is deemed unfit to continue operation due to legislative requirements pertaining to frame rust corrosion and therefore extending the life cycle is not an option.

Project 27031002 **Initially budgeted in** 2022

Submitted By Scott Glew, Manager of Fleet Services **Department** Operations & Environmental Services

Start Year 2027 **Section** Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of sidewalk tractor unit #151301 with salting and plowing capabilities to accommodate the Environmental Services Section.

Rationale: This tractor has reached its useful life (12 years) within the Environmental Services Section. It is recommended that this tractor be replaced to accommodate the sufficient quantity of machines required for sidewalk snow removal, as part of the Winter Maintenance program for the Town. If not replaced, the tractor is at a higher risk of being removed from service for unplanned repairs, which may cause service interruptions for the Environmental Services section. These service interruptions may lead to delays in response time during a winter weather event, which will pose risks to the Town's ability to maintain service levels agreements.

DETAIL SHEET

Project Name	**Large Area Mower 191101 (2019)**		
Project	27070101	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of large area mower (LAM) (parks) #191101 within the Environmental Services Section.

Rationale: This LAM will reach its useful life (8 years) within the Environmental Services Section. It is recommended that this LAM be replaced to accommodate the sufficient quantity of machines required for grounds maintenance support within Environmental Service section. If not replaced, the LAM is at higher risk of being removed from service for unplanned repairs, which may cause service interruptions for the Environmental Services section. These service interruptions may cause for smaller equipment to fill the gaps where needed, posing an increased risk of unplanned repairs to smaller units not equipped for the task, or the section's inability to meet service level agreements.

Reference: 2022-2026 Strategic Plan - Pillar 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

DETAIL SHEET

Project Name	**Stake Truck 18501 (2018)**		
Project	27070102	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of stake truck #18501 within the Environmental Services section.

Rationale: Stake truck #18501 has not reached it's useful life (12 years) within the Operations section. It is recommended that stake truck #18501 be replaced to provide transportation for staff and equipment for the purpose of grounds maintenance within the Environmental Services section. In accordance with the 2019 Fleet Utilization Study, a vehicle of this size and class with medium to low mileage will be better suited with a gasoline engine. Currently, diesel engines within the medium duty vehicle class can be very timely to repair when it comes to emissions issues. The Provincial government has legislated emission control devices on all diesel engine vehicles from the early 2000's and newer. Unplanned repairs are common for these emission control devices on all class vehicles, but can be even more common on vehicles in a lower mileage roll. Commercial diesel engines, along with the emission control devices, are designed for high mileage vehicles or vehicles regularly hauling or towing material and/or equipment. Low mileage diesel vehicles are more prone to experience engine emission issues, which can be quite costly and time consuming to repair.

Extending the life cycle of this asset may result in significant service delivery interruptions due to unplanned repairs and long wait times to clear emission specific engine faults.

Reference: 2019 Fleet Utilization Study, 2022-2026 Strategic Plan - Piller 3: Modernizing our Community (MC) MC Priority 4: Ready our organization for the future 4.2: Ensure an efficient and effective service delivery, 2024 Corporate Asset Management Plan.

Schedule: Specifications will be developed upon project approval. Tender documents will be prioritized with all other approved capital projects; delivery will be expected within a reasonable time frame projected by the successful vendor.

DETAIL SHEET

Project Name	**Surface Rake 44011 (2012)**		
Project	27070106	**Initially budgeted in**	2022
Submitted By	Scott Glew, Manager of Fleet Services	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Fleet / Equipment Maintenance

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of grounds maintenance implement #44011 within the Environmental Services Section.

Rationale: Surface Rake Unit #44011 has exceeded its useful life (15 years) within the Environmental Services Section. It is recommended that this unit be replaced to accommodate the high level of service required to maintain safe user conditions to Paradise Park beach front along Lake Ontario. If not replaced, this unit is at a much higher risk of being removed from service for unplanned repairs, which may cause unforeseen delays to the seasonal beach maintenance plan.

Unit #44011 is a tow-behind tractor attachment designed to groom the beach at Paradise Park. This attachment is specifically designed to turn over sand, rocks, and other washed up natural debris on a regularly basis to circulate unwanted algae to the surface. Once turned over, UV rays from the sun will work to kill harmful components of the algae to ensure the beach conditions are suitable for public use. If this unit experiences more out of service time for unplanned repairs, staff run the risk of falling behind on the grooming schedule, which poses a threat on the Town's ability to keep the beach open and safe for public use.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Integrated Transportation Master Plan Update**		
Project	25090101	**Initially budgeted in**	2021
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2025	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project will update the 2019 Integrated Transportation Master Plan (ITMP) that will be used to inform the 2028 Development Charge Background Study. This ITMP update will apply revised growth allocations for the Town of Ajax using Regional Growth Plan projections and projected development activity. This update will apply revised infrastructure cost estimates and will inform the timing of infrastructure requirements as well as determine the need for environmental assessments. The ITMP addresses Phases 1 and 2 of the Municipal Class Environmental Assessment process.

Rationale: A review of the ITMP is recommended to be undertaken every five years in accordance with the Municipal Class Environmental Assessment process. The update will confirm the assumptions, address major changes to components of the Master Plan, identify significant new environmental effects, and evaluate major changes in proposed timing of projects in order to meet the goals and objectives of the ITMP. This will follow the Town's 2020 Revised Growth Plan conformity exercise and will reflect the updated Regional population and employment projections to the year 2051.

An update to the ITMP that reflects increased intensification requirements to 2051 will inform long term capital improvements to keep pace with projected rates of growth and intensification. These required improvements and current cost estimates will ensure that accurate figures are applied when completing the next Development Charge Background Study.

Reference: 2019 Integrated Transportation Master Plan Update; 2018 DC Background Study Amendment (2020), Item 20A18

Schedule: This project is anticipated to commence in 2025.

DETAIL SHEET

Project Name	**Retaining Wall Inspections**		
Project	26030603	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The OSIM Inspection of the retaining walls within the Town of Ajax.

Rationale: Conduct required inspections upon the retaining walls within the Town of Ajax.

Reference: This project is consistent with the Strategic Plan's third pillar, Modernizing our Community - Demonstrate sound financial management infrastructure management (Asset Management). This project responds to the Corporate Asset Management Plan Recommendation #9 by updating the condition of the retaining walls and providing more accurate future spending needs.

Schedule: Consultant Inspections 2026. As per OSIM, retaining walls should be inspected every 2 years.

DETAIL SHEET

Project Name	**Guiderail Needs & Condition Assessment**		
Project	26030604	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The needs and condition assessment of the municipal guiderails will be conducted by a professional engineer. Through detailed inspections this consultant will ensure that the deficiencies of municipal guiderails are correctly identified and the correct recommended rehabilitation and the accurate rehabilitation costs are provided to the Town of Ajax.

Rationale: Conduct a detailed assessment of the condition of the guiderails to ensure these are maintained in the most cost effective manner.

References: This project is consistent with the Strategic Plan's third pillar, Modernizing our Community - Demonstrate sound financial management Infrastructure Management (Asset Management). This project responds to the Corporate Asset Management Plan Recommendation #9 by updating the condition of the guiderails and providing more accurate future spending needs.

Schedule: Consultant Inspections 2026. This peer review should be conducted every 4 years to reduce the risk of failure of these assets.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**AcouBarrier/EntFeat Cond Update**		
Project	27030602	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project will provide an update, by a qualified engineer, to the inventory and condition of acoustic barrier and entry feature assets.

Rationale: In 2027, a consultant will be retained to conduct an inventory and condition assessment of acoustic barriers and entry features, which will provide a complete inventory owned by the Town of Ajax, along with their physical condition and rating for asset management.

The inventory of Town owned acoustic barriers and entry feature assets, with condition evaluations, forms part of the Corporate Asset Management Plan and requires periodic condition assessments to ensure that they are safe and functioning as intended. The condition of acoustic barriers and entry features must be evaluated no more than two years prior to the publishing of any asset management plan update. An updated condition assessment will be required in 2027 to meet the requirements next asset management plan update. The frequency of future acoustic barrier and entry feature condition assessments will be driven by Provincial asset management reporting requirements, for future asset management plan updates .

Reference: Ontario Regulation 588/17: Asset Management Planning for Municipal Infrastructure under the Infrastructure for Jobs and Prosperity Act 2015. S.O. 2015, c 15

Schedule: The inventory and condition assessment update will commence in the spring of 2027 and is expected to be completed by mid July 2027.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Hunt St Ext Monarch-Westney**		
Project	23090303	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2023	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Detailed design of the extension of Hunt Street from MacKenzie Ave to Westney Rd including the realignment of the CN Spur Line for an at grade crossing. The project will include the following:

- A three-lane extension of Hunt Street from MacKenzie Ave to Westney Rd
- Realignment of the existing single track CN Rail Spur Line
- Proposed construction of new track storage
- 1.8m sidewalks and 2.0m cycle tracks on both sides of the new road
- Reconstruction of the intersection at Westney Rd & O'Brien Crt including turning lanes on Westney Rd
- Reconstruction of the intersection of Hunt St & MacKenzie Ave
- Reconstruction of the intersections of Hunt St & Dowty Rd, and Hunt St & Monarch Ave to accommodate synchronized signals at the intersections

Rationale: As part of the Official Plan review, the Town of Ajax retained a consultant to conduct a Central Ajax Road Connectivity Review in 2010. The study was undertaken to examine the effects of potential land use intensification in the area to the south of the Ajax GO station. To accommodate the transportation demand of intensification and to address existing operational issues in the study area, the Town reviewed road connectivity options. The study found that the most positive impact would come from extending Hunt St to the west from MacKenzie Ave to the Westney Rd and O'Brien Crt intersection. In addition, the 2019 Integrated Transportation Master Plan also identified the extension of Hunt St to Westney Rd as a high priority.

Reference: 2016 Hunt St and Finley Ave Improvements Environmental Study Report: 2018 DC Background Study, Item T12; 2019 Integrated Transportation Master Plan; 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network.

Schedule: Detailed Design: 2024, Land Acquisition: 2026, Utilities 2027, Construction: 2028, Top Asphalt 2030

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Porte SW Infill N of Beers**		
Project	24030603	**Initially budgeted in**	2024
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes design and construction of a new 1.5m wide concrete sidewalk on the east side of Porte Road north of Beer Crescent to fill in a missing section of sidewalk. The scope of work will also include storm sewer relocation work to accommodate the new sidewalk. The new sidewalk will be aligned to the back of curb due to grading constraints.

Rationale: The existing sidewalk on Porte Road north of Beer Crescent were installed as part of the subdivision development. Currently, there are 2 properties that have not been developed which do not have a sidewalk fronting the property. Installing the new sidewalk will complete the sidewalk connection and provide a safer mode of travel for pedestrians. The impact of not following the recommended schedule will result in the Town not meeting expected service levels.

Reference: 2022-2026 Strategic Plan, Pillar 1 Connecting our Community, Priority 3.1: Support and promote active accessible transportation.

Schedule: Design 2024, Construction: 2025.

DETAIL SHEET

Project Name	**Westney Rd MUT - Kingston to Delaney**		
Project	24090306	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project involves designing and constructing a 1,020 meter long, 3.0 meter wide asphalt-paved multi-use trail along Westney Rd. N. between Kingston Rd. W. and Delaney Dr. The existing concrete sidewalk on the west side will be removed and replaced with the new multi-use trail.

Rationale: This trail will replace an existing concrete sidewalk along Westney Rd. N., and will provide a safe method of travel for pedestrians and cyclists and to promote active forms of transportation.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2018 DC Background Study, Item T47.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Crossing Upgrades 2025**		
Project	25001901	**Initially budgeted in**	2021
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2025	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: As the Active Transportation network is further developed throughout Town, the need for safe and accessible crossings as part of the pedestrian network is equally important. The implementation of crossing updates begins with an infield review and collection of the appropriate data. Once the preliminary crossing design can be prepared by Town staff, the design will be shared at a Public Information Centre so that the public has the opportunity to review the proposed designs and provide comments. Following the Public Information Centre the designs are finalized. Once finalized, the designs are issued for tender and construction.

The number of crossing upgrade projects completed annually will vary depending on the complexity of the design solutions. Whenever possible, staff will make an effort to coordinate any crossing upgrades with other Town projects such as the implementation of active transportation facilities, traffic calming measures or paving activities in order to maximize budget efficiencies.

When staff identify the need for significant crossing upgrades such as curb modifications and the implementation of flashing beacons or signals. These projects will be individually identified in future Capital detail sheets, with the proposed budget for the specific crossing improvement.

Rationale: A list of crossing improvements is established through customer service inquires, Council requests, and as part of active transportation network improvements identified in the 2019 Integrated Transportation Master Plan. The appropriate crossing improvement is intended to improve pedestrian safety and accessibility at a given crossing.

Reference: Integrated Transportation Master Plan 2019

Schedule: This project is anticipated to commence in the spring.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Traffic Calming on Town Roads 2026-2034**		
Project	25002001	**Initially budgeted in**	2021
Submitted By	Dhaval Pandya, Manager of Transportation Planning	**Department**	Planning & Development Services
Start Year	2026	**Section**	Transportation Planning

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Traffic Calming Warrant ensures that appropriate traffic calming solutions are implemented on road segments where a traffic issue has been identified. The implementation process for a project begins with Town staff preparing a preliminary design. Once the preliminary design is complete, a Public Information Centre is held so that the public has the opportunity to review the proposed designs and provide comments. Following the Public Information Centre the designs are finalized. Once finalized, the designs are issued for tender and construction .

The number of traffic calming projects completed annually will vary depending on the complexity of the design solutions. Projects will be selected from the list of road segments that have been tested and met the criteria for traffic calming. When selecting which project to complete, Town staff will consider the severity of the traffic calming problem, the potential traffic calming solutions for a given segment, and will make an effort to coordinate any traffic calming projects with other Town projects such as paving activities or the implementation of active transportation facilities in order to maximize budget efficiencies. The anticipated future traffic calming projects will be identified to Council annually in the Traffic Calming program update.

Rationale: A list of traffic calming warranted roadway sections was established through customer service inquiries together with the 2020 Traffic Calming Warrant Update. The preferred solution developed through this process is intended to safely decrease vehicular speeds.

References: 2020 Traffic Calming Warrant Update.

Schedule: Construction will occur between May and August each year.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Finley Ave & Bramwell Dr Sidewalk Infill**		
Project	26030602	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes design and construction of new concrete sidewalk at the following locations:

- Approximately 35m of new concrete sidewalk crossing CN railway tracks on the west side of Finley Avenue between 460 and 510 Finley Avenue.
- Approximately 160m of new concrete sidewalk on the south side of Bramwell Dr from Rotherglen Drive to Westney Road.

Rationale: The existing sidewalk on the west side of Finley Avenue terminates approximately 15m from the CN Railway tracks on both the north and south sides of the railway tracks. As a result, the missing section of sidewalk poses a hazard to pedestrians crossing the railway tracks without a hard surface to walk on. In addition, the current condition is not accessible and is not AODA compliant.

The proposed sidewalk on the on the south side of Bramwell Drive will provide a sidewalk connection with Rotherglen Road, Kirkham Drive and Westney Road eliminating the need for pedestrians to cross Bramwell Drive through traffic to get to the sidewalk on the north side of Bramwell as a sidewalk on the south side currently does not exist.

Reference: Town of Ajax Official Plan, Section 4.1.11 developing an interconnected system of cycling and walking routes; 2022-2026 Strategic Plan, Pillar 1: Connecting our Community, Priority 3.1: Support and promote active accessible transportation.

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work includes design and construction to install additional streetlights at intersections and road segments where lighting levels do not meet current lighting standards. Consulting services will be retained to complete an analysis of existing lighting levels and identity areas that require additional streetlights. The intersections and road segments identified for analysis include:

- Intersection at Delaney Drive and Westney Road;
- Intersection at Chapman Drive and Kingston Road;
- Elizabeth Street from Old Kingston Road to Kingston Road;
- Chapman Drive between Old Harwood Avenue and Harwood Avenue;
- Seabreeze Road between Poplar Avenue and Mayor Crescent.

Rationale: Streetlighting standards have changed over the years resulting in some intersections and road segments not meeting current illumination standards from the time they were originally installed. As intersections and various roads include turn lanes and pedestrian crossings, it is crucial to have appropriate illumination to ensure motorist and pedestrian safety.

Reference: Electrical Safety Authority Guidelines for the Design, Installation, Operation & Maintenance of Street Lighting Assets; 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 1.5: Improve Road transportation network.

Schedule: Phase Design: 2026, Construction: 2028.

Project Name	**Westney Rd MUT-401WB Off-Ramp to Bayly**		
Project	26090303	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the design and construction of a 1.27km long 3m wide multi-use trail on Westney Road from the Highway 401 west bound off-ramp to Bayly Street.

Rationale: The multi-use trail is recommended to provide a safe method of travel for pedestrians and cyclists and to promote active forms of transportation. The Westney Road multi-use trail from the Highway 401 west bound off-ramp to Bayly Street will be completed by the Region of Durham as a part of the road widening project.

Project Name	**Traffic Signal-Rossland Rd and Hilton Gate**		
Project	27095001	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Construction of traffic signals and intersection improvements at Rossland Road and Hilton Gate.

Rationale: The traffic signals at the Rossland/Hilton Gate intersection was secured through a Section 37 Community Benefits Agreement between the Town and Medallion. This agreement pertains to Medallion's development on the north side of Rossland, between Audley and the storm pond west of Rushworth. The new traffic signals will help provide a safe crossing for traffic currently accessing Rossland Road from the new Medallion Development via Hilton Gate. In addition, with the inclusion of a new community park and splashpad as part of the Medallion development, the traffic signals will provide a safe pedestrian crossing across Rossland Road. This project will be timed with 1028611 – Rossland Road Widening for design and construction.

Reference: 2018 DC Background Study, Items 18-T06 and 18-T07; 2019 Integrated Transportation Master Plan; and 2020 Rossland Road Improvements EA; 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network.

DETAIL SHEET

Project Name	**Achilles Rd Ext-Shoal Point Rd to Audley Rd**		
Project	24090301	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Detailed design and construction for the extension of Achilles Road from the temporary turning circle east of Carruthers Creek to the future Audley Road. The design is based on a 2-lane urban standard. The project will include a multi-use trail on the south side, sidewalk on the north side and LED street lighting on the north side of Achilles Road.

Rationale: The Environmental Assessment for this project was completed in 2004. Achilles Road from Salem Road east to the existing distribution warehouse was constructed in 2006. The link provides access for truck traffic emanating from Highway 401 to the facility located 1.2 km east of Salem Road. The Town's Transportation Master Plan, in conjunction with a Regional Environmental Assessment for the widening of Bayly Street from Shoal Point Road east to Seaboard Gate, has identified the need to construct a link between Bayly Street and the terminus of Achilles Road to facilitate the efficient flow of business, commuter and local traffic.

Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Detailed design and construction for the extension of Audley Road from the temporary turning circle north of Bayly to the future Achilles Road. The design is based on a 2-lane urban standard. The project will include a multi-use path, a sidewalk and LED street lighting.

Rationale: The new 2 lane urban extension of Audley Road from Bayly Street to the Achilles Road extension and the new 2-lane urban extension of Achilles Road from its current terminus to Audley Road is expected to provide relief and connectivity to Bayly Street between Salem Road and Audley Road and expected to provide an alternative route for the trucks at the Loblaws distribution centre. The Town's Transportation Master Plan, in conjunction with a Regional Environmental Assessment for the widening of Bayly Street from Shoal Point Road east to Seaboard Gate, has identified the need to construct a link between Bayly Street and the terminus of Achilles Road to facilitate the efficient flow of business, commuter and local traffic.

Project Name	**Bayly St. MUT- Westney to Harwood**		
Project	26090302	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Design and construction of an approximately 1400 metre long, 3 metre wide asphalt paved multi-use trail along Bayly St. W. between Westney Rd. S. and Harwood Ave. S. The existing concrete sidewalk along the north side will be removed and replaced with a 3.0 metre wide asphalt paved muti-use trail.

Rationale: This trail will replace an existing concrete sidewalk link along Bayly St. W. creating a safe multi-use trail for pedestrians and cyclists.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2018 DC Background Study, Item T41.

Project Name	**Retaining Wall #400 Replacement - 17 Top Street**		
Project	25030601	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The retaining wall replacement in front of 17 Top Street will include the removal and replacement of the existing retaining wall and sod restoration as required.

Rationale: In 2022, a Retaining Wall Condition Assessment Report was completed and provided a summary of retaining wall conditions for all thirty six (36) Town of Ajax owned walls. The retaining wall in front of 17 Top Street was rated to be in fair condition with outward rotation. Since the inspection was completed, the retaining wall continues to degrade and requires replacement.

The service life of the new modular block retaining walls is approximately 30 years with effective periodic maintenance to ensure the retaining walls are kept safe and in good repair.

DETAIL SHEET

Project Name	**LED Traffic Signal Replacement 2026-2034**		
Project	26030705	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of existing LED traffic signals. The installations will be completed by the Region of Durham at intersections under the jurisdiction of the Town of Ajax. Locations will be identified on an annual basis.

Rationale: Traffic control signals located where two (2) municipally owned roads intersect are under the jurisdiction of the local municipality and maintained by the Region of Durham. In order to effectively achieve and maintain the required level of LED luminance performance and reliability, the Region, as of 2018, is administering an annual LED traffic light replacement program over a 5-year cycle ensuring that all signal indications are replaced once they exceed the 5-year warranty period. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Reference: Region of Durham Traffic Signal Head Replacement Policy; 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 1.5: Improve road transportation network.

Schedule: Construction to commence annually in Spring.

DETAIL SHEET

Project Name	**Retaining Wall #30 Replacement - 610 Finley Ave**		
Project	24030601	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Retaining wall #30 is located on the north side of Clements Road West, adjacent to 610 Finley Avenue. The scope of work will include removal and replacement of the retaining wall and restoration of disturbed areas.

Rationale: In 2022, a Retaining Wall Condition Assessment Report was completed and provided a summary of retaining wall conditions for all thirty six (36) Town of Ajax owned walls. The retaining wall adjacent to 610 Finley Avenue on the north side of Clements Road West was rated to be in fair condition with outward rotation. Since the inspection was completed, the retaining wall continues to degrade and requires replacement. Staff review the retaining wall condition assessments and propose rehabilitation and replacements of infrastructure and assets based on the recommendations of the study. The impact of not following the recommended schedule may result in additional expenditures, risk to public safety, and unplanned service disruptions.

The service life of the new modular block retaining wall is approximately 30 years with effective periodic maintenance to ensure the retaining walls are kept safe and in good repair.

Project Name	**Harwood Wid.Taunton-Woodcock**		
Project	1028711	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2022	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes widening and urbanization of Harwood Avenue from Taunton Road to Woodcock including street lighting, a multi-use trail, new traffic signals at Harwood and Haskell Ave, drainage improvements, and new LED street lights.

Rationale: Population growth has resulted in higher traffic volumes prompting the need for road improvements to accommodate the traffic demand. The growth areas contributing to higher traffic volumes include the Grandview development, a Long Term Care facility, Tribute Development, Ledim Plazas, a future school block at Williamson Road and Harwood Avenue and the Mosque. An Environmental Assessment to facilitate the widening and reconstruction of Harwood Avenue from Taunton Road to Woodcock Avenue to a 4 lane urban standard was completed in 2024. The proposed road improvements will result in an improved pedestrian and bicycle network and an improved transit route to accommodate the population growth. The impact of not following the recommended schedule will result in the Town not meeting expected service levels.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Rossland Wide Salem/LakeRidge**		
Project	1029011	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2022	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes widening and urbanization of Rossland Road from Salem Road to Lake Ridge Road including street lighting, multi-use trail on the north and a sidewalk on the south side, intersection improvements, drainage improvements, and new LED street lights. The improvements to the Regional intersections will be completed by the Region of Durham.

Rationale: Population growth has resulted in higher traffic volumes prompting the need for road improvements to accommodate the traffic demand. The growth areas contributing to higher traffic volumes include the A9 Development, Medallion Development at Audley Road and Rossland Road and the industrial development at Rossland Road and Salem Road. An Environmental Assessment to facilitate the widening and reconstruction of Rossland Road from Westney Road to Lake Ridge Road to a 4-lane urban standard was completed in 2022. The proposed road improvements will result in improved pedestrian and bicycle network and an improved transit route to accommodate the population growth.

Reference: 2018 DC Background Study, Items 18-T06 and 18-T07; 2019 Integrated Transportation Master Plan; and 2020 Rossland Road Improvements EA; 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network.

Schedule: Detailed Design: Approved in 2022, Land Acquisition: 2024, Utility Relocation: 2025, Construction: 2026, Top Asphalt 2028.

Project Name	**Dowty Rd Rec-Hunt/Thompson**		
Project	1034211	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2022	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for Dowty Road from Hunt Street to Station Street includes the full depth reconstruction of the roadway, implementation of an additional sidewalk on the East boulevard, and potential storm sewer improvements. Coordination with the Region of Durham is required to accommodate watermain and sanitary sewer infrastructure improvements. Dowty Road is a two lane local roadway, and 380m in length.

Rationale: The resurfacing of municipal roads and associated repairs are a critical component of the Town's Infrastructure Maintenance Program. The roads to be resurfaced and/or reconstructed each year are prioritized based on the Town's Pavement Management System and coordinated with the Region of Durham's construction projects. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures.

Project	28090301	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Reconstruction of approximately 1.2kms of Church Street from the hydro corridor to Taunton Road. The project includes urbanization of the road, new street lighting, on street bike lanes in each direction, a sidewalk on the west side and a multi-use trail on the east side.

Rationale: A Schedule 'C' Environmental Assessment for improvements to Church Street from Taunton Road to Rossland Road was completed in 2013. The preferred solution includes urbanizing the road, providing pedestrian and cycling facilities and replacing the structure at East Duffins Creek with a longer span to improve road site lines and safety as well as improving the hydraulics of the creek at the road crossing.

Reference: 2013 Church Street Improvements Environmental Study Report; 2018 DC Background Study, Items T17; 2019 Integrated Transportation Master Plan, 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network.

Project Name	**Waterfront Trail - Audley to Hoile**		
Project	30070003	**Initially budgeted in**	2024
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope will include the reconstruction of an approximately 155 meter long, 3.0 meter wide asphalt multi-use trail from Audley Rd S to Hoile Dr.

Rationale: This trail serves as a important connection to and from the waterfront, granting safe accessibility for all users for safe travel and pathway utilization.

In an effort to better evaluate the condition of municipal trails and determine an appropriate life-cycle, staff conduct an inventory and assessment of all municipal trails annually. As a result, this trail was deemed a priority for 2025.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2024 Corporate Asset Management Plan.

DETAIL SHEET

Project Name	**Harwood S Resurf-Clements W to Bayly E**		
Project	24030001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for Harwood Avenue from Clements Road to Bayly Street includes the asphalt resurfacing and replacement of various sections of concrete curb and sidewalk. Coordination is required with the Region of Durham to accommodate watermain infrastructure improvements. Harwood Avenue is a four lane arterial type 'c' roadway, and this section is 1.1km in length.

Rationale: The resurfacing of municipal roads and associated repairs are a critical component of the Town's Infrastructure Maintenance Program. The roads to be resurfaced and/or reconstructed each year are prioritized based on the Town's Pavement Management System and coordinated with the Region of Durham's construction projects. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures.

Reference: Pavement Management System, 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network, 2024 Corporate Asset Management Plan.

Project Name	**Rossland Rd Top Asph - Church to Westney**		
Project	25090305	**Initially budgeted in**	2023
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for Rossland Road from Church Street to Westney Road includes the placement of top asphalt. Rossland Road is four lane arterial type 'b' roadway, and this section is 1.7km in length.

Rationale: In 2023, the reconstruction of Rossland Road between Church Street and Westney Road was completed up to base asphalt. Top asphalt is required within two years of major road constructions to prevent the base asphalt layer from deteriorating, which would minimize the risk for unplanned service disruptions. The top asphalt will complete the Rossland Road reconstruction project identified in the 2018 DC Background Study.

Project Name	**Retaining Walls #50, #120, #180 Rehabilitation**		
Project	26030601	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The retaining wall rehabilitation project includes repairs to the existing retaining walls at the following locations:

- Retaining Wall #50 - 49 Charleston Crescent,
- Retaining Wall #120 - 22 Rotherglen Road, and
- Retaining Wall #180 - 36 Wright Crescent.

Rationale: In 2022, a Retaining Wall Condition Assessment Report was completed and provided a summary of retaining wall conditions for all thirty (36) Town of Ajax owned walls. Retaining wall #50, 120, and 180 were identified for rehabilitation in the condition assessment report.

DETAIL SHEET

Project Name	**Lake Ridge Rd-Bayly to Ontoro Blvd**		
Project	24090302	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Detailed design and reconstruction of Lake Ridge Road from Bayly Street to Ontoro Boulevard. The design is based on a 2-lane rural standard which will include implementation of buffered bike lanes, along with associated pavement markings, wayfinding signage and regulatory signage

Rationale: The current paved rural road has reached the end of its life cycle and will require reconstruction. Furthermore, the Ontario Ministry of Transportation has constructed a new interchange for Highway 401 at Lake Ridge Road as part of the extension of Highway 407 and the West Durham Link (Highway 412). As a result, Range Road has temporarily reopened to provide a future link from the Lakeside Subdivision to Lake Ridge Road and the Highway 401 interchange. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Lake Ridge Road is also identified as a part of the preferred active transportation network in the Integrated Transportation Master Plan (2019). This project expands the active transportation network and improves network connectivity.

DETAIL SHEET

Project Name	**Waterfront Trail Recon at Rotary Pavillion**		
Project	26030101	**Initially budgeted in**	2024
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project involves reconstructing an approximately 85 metre long, 3.0 metre wide asphalt multi-use trail from south of the Rotary Pavillion.

Rationale: This trail serves as a important connection to and from the Rotary Pavillion, providing safe accessibility for all users for safe travel and pathway utilization.

In an effort to better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements. As a result, this trail has been prioritized for 2027.

The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Reference: This project satisfies Section 2.2.6.1.e of the Town of Ajax Official Plan by further developing an interconnected trail and pathway system that connects people to places within and adjacent to Ajax. This project is in keeping with the policies of The Ajax Pedestrian and Bicycle Master Plan 2010 and responds to the Integrated Transportation Master Plan recommendation (4.2.4) to plan, design, and implement active transportation infrastructure that accommodate a range of user abilities and ages. 2024 Corporate Asset Management Plan.

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project involves reconstructing an approximately 60-meter long, 3.0-meter wide asphalt multi-use trail along the south side of Lake Driveway W, spanning from Garnett Dr to Simmonds Dr.

Rationale: This trail serves as a important connection of the Trans Canada Trail system at the waterfront, granting safe accessibility for all users for safe travel and pathway utilization.

To better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements.

The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Retaining Wall #190, #340, #350 Rehabilitation**		
Project	27030601	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The retaining wall rehabilitation project includes repairs to the existing retaining walls at the following locations:

- Retaining Wall #190 - 44 Knapton Avenue
- Retaining Wall #340 - 140 Kearny Drive
- Retaining Wall #350 - 91 Kearny Drive

Rationale: In 2022, a Retaining Wall Condition Assessment Report was completed and provided a summary of retaining wall conditions for all thirty (36) Town of Ajax owned walls. Retaining wall #190, 340, and 350 were identified for rehabilitation in the condition assessment report.

Reference: Ontario Reg 350/06: Building Code; Designated Structure; 2022-2026 Strategic Plan, Pillar 3: Modernizing our Community, Priority 5.2: Anticipate and respond to risk and opportunities; 2024 Corporate Asset Management Plan.

Schedule: Design: 2027; Construction: 2028.

DETAIL SHEET

Project Name	**Village Greenbelt Tr Recon Carwin-Rotherglen**		
Project	27070007	**Initially budgeted in**	2024
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project is phase 2 of a 3 phase project. The segment between Carwin to Rotherglen is 395 metres in length which will include the removal and replacement of existing asphalt, drainage improvement, site furniture and landscaping as required to revitalize the area adjacent to the trails.

Rationale: In an effort to better evaluate the condition of municipal trails and determine their appropriate life cycle, staff review the trails proposed for resurfacing or reconstruction each year based on asset management condition assessments. This ensures a cohesive and cost-effective approach to asset replacements. As a result the trail is identified for replacement.

The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

DETAIL SHEET

Project Name	**Church St Widening-Kingston to Delaney**		
Project	29090303	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Reconstruction of approximately 1.2 km of Church Street from Kingston Road to Delaney Drive. The project includes urbanization of the road, new street lighting, on street bike lanes in each direction, a sidewalk on the west side and a multi-use trail on the east side.

Rationale: The 2019 Integrated Transportation Master indicates the need to widen Church Street from Rossland Road to Kingston Road. The widening would provide congestion relief along this section of Church Street and improve transit services. The widening will also provide the opportunity for an enhanced and continuous cycling facility along church street connecting to the existing cycling facility north of Rossland Road.

Reference: 2013 Church Street Improvements Environmental Study Report; 2018 DC Background Study, Items T20; 2019 Integrated Transportation Master Plan, 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network.

DETAIL SHEET

Project Name	**Traf Sig Ped Cndwn-2024-2025**		
Project	24030707	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Traffic Signal Pedestrian Countdowns project will replace the existing pedestrian signals with the latest traffic control technology. This project will be completed by the Region of Durham. The installation of pedestrian countdown heads will be coordinated with the installation of accessible pedestrian signals at the following locations:

- Location 1: Harwood Avenue and Kerrison Drive,
- Location 2: Harwood Avenue and Mandrake Avenue/Gardiner Drive,
- Location 3: Harwood Avenue and Doric Street, and
- Location 4: Church Street and Delaney Drive.

Rationale: Traffic control signals located where two municipally owned roads intersect are under the jurisdiction of the local municipality and maintained by the Region of Durham. In 2019, the Region changed the method used to calculate and display pedestrian signal timings to improve operations for pedestrians. This change also allows them to display the pedestrian countdown times for all crossings, which will allow pedestrians to better judge their walking pace and the time they have remaining to cross a road. In order to implement the new pedestrian timing completely, those intersections with existing countdown indications will need to be replaced as they are currently not compatible with the new methodology. The impact of not following the recommended schedule will result in the Town not meeting expected service levels.

Reference: Region of Durham Traffic Signal Policy; 2022-2026 Strategic Plan, Pillar 1: Connecting our Community, Priority 3.1: Support and promote active and accessible transportation.

Schedule: Locations 1-3: Design 2024. Location 4: Design 2025. Construction to be coordinated with the Region of Durham.

Project	25030001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for Harwood Avenue from Kerrison Drive to Rossland Road includes the mill and overlay (M&O) of the existing asphalt, and replacement of various sections of concrete curb and sidewalk. Harwood Avenue is a four lane arterial type 'c' roadway, and this section is 1.1km in length.

Rationale: The resurfacing of municipal roads and associated repairs are a critical component of the Town's Infrastructure Maintenance Program. The roads to be resurfaced and/or reconstructed each year are prioritized based on the Town's Pavement Management System and coordinated with the Region of Durham's construction projects. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures.

Project Name	**LED Traf Signal Replacement**		
Project	25030701	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes the replacement of existing LED traffic signals. The installations will be completed by the Region of Durham at intersections under the jurisdiction of the Town of Ajax. Locations will be identified on an annual basis.

Rationale: Traffic control signals located where two (2) municipally owned roads intersect are under the jurisdiction of the local municipality and maintained by the Region of Durham. In order to effectively achieve and maintain the required level of LED luminance performance and reliability, the Region, as of 2018, is administering an annual LED traffic light replacement program over a 5-year cycle ensuring that all signal indications are replaced once they exceed the 5-year warranty period. The impact of not following the recommended schedule may result in accelerated deterioration and additional expenditures, risk to public safety, and unplanned service disruptions.

Project	25034001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project will remove and replace existing streetlight poles which are in poor condition and replace with new concrete streetlight poles.

Rationale: In 2013, the Town undertook a Streetlight Condition Assessment which provided an overall condition assessment of streetlight poles, identified deficiencies and established priorities for pole replacements. Pole conditions are assessed and updated on a rotational basis. Pole replacements occur at various locations in town, and are replaced on a priority basis.

DETAIL SHEET

Project Name	**Rossland Wide. Westney-Salem**		
Project	1028611	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2022	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The project includes widening and urbanization of Rossland Road from Westney Road to Salem Road including street lighting, multi-use trail on the north and south side, intersection improvements, drainage improvements, and new LED street lights. The improvements to the Regional intersections will be completed by the Region of Durham.

Rationale: Population growth has resulted in higher traffic volumes prompting the need for road improvements to accommodate the traffic demand. The growth areas contributing to higher traffic volumes include the A9 Development, Medallion Development at Audley Road and Rossland Road and the industrial development at Rossland Road and Salem Road. An Environmental Assessment to facilitate the widening and reconstruction of Rossland Road from Westney Road to Lake Ridge Road to a 4-lane urban standard was completed in 2022. The proposed road improvements will result in improved pedestrian and bicycle network and an improved transit route to accommodate the population growth.

DETAIL SHEET

Project Name	**Midtown Neigh SL Improv Ph 1**		
Project	24034001	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2024	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes design and construction for the replacement of existing HPS streetlights to new LED lights including pole replacements as required in the Midtown Neighbourhood.

Rationale: It has been identified that areas within the Town, generally built prior to 1980, are susceptible to frequent streetlight maintenance. Due to the age of concrete and wooden poles, breakdown of underground cabling, and the use of older luminaire technology, staff have identified the Midtown Neighbourhood as the primary location for the Streetlight Neighbourhood Improvement Program. The impact of not following the recommended schedule may result in additional expenditures, risk to public safety, unplanned service disruptions, and the Town not meeting expected service levels.

DETAIL SHEET

Project Name	**Traf Sig UPS-Harwood & Kerrison Dr.**		
Project	25030703	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Traffic Signal UPS Battery Backup project will see the installation of uninterruptible power supply (UPS) / battery backup systems in traffic control cabinets to maintain traffic signal operation during power failures. Traffic control signals located where two (2) municipally owned roads intersect are under the jurisdiction of the local municipality and maintained by the Region of Durham. This project will be completed by the Region of Durham.

Rationale: UPS provides improved field infrastructure reliability leading to effective signal operation, reduced traffic congestion, reduced traffic signal controller maintenance and increased public safety. A UPS is integrated into the circuitry of the traffic control signal that seamlessly provides alternate power when power outages occur. In the event of a power outage, the UPS system will provide backup power to ensure normal uninterruptible traffic control signal operation for a four (4) hour period for normal, fully functioning traffic signal operation and seven (7) hours of an all-direction red flash operation. In most cases, local hydro authorities typically have power restored within the initial four hour period of full traffic signal operation. Existing signalized intersection characteristics and data has been assessed, evaluated and ranked for all traffic control signals under the Town's jurisdiction.

Reference: 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 1.5: Improve road transportation network.

Schedule: Timing of installations will be coordinated with the Region of Durham.

DETAIL SHEET

Project Name	**Traf Sig UPS-Harwood&Station/Achilles**		
Project	25030704	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Traffic Signal UPS Battery Backup project will see the installation of uninterruptible power supply (UPS) / battery backup systems in traffic control cabinets to maintain traffic signal operation during power failures. Traffic control signals located where two (2) municipally owned roads intersect are under the jurisdiction of the local municipality and maintained by the Region of Durham. This project will be completed by the Region of Durham.

Rationale: UPS provides improved field infrastructure reliability leading to effective signal operation, reduced traffic congestion, reduced traffic signal controller maintenance and increased public safety. A UPS is integrated into the circuitry of the traffic control signal that seamlessly provides alternate power when power outages occur. In the event of a power outage, the UPS system will provide backup power to ensure normal uninterruptible traffic control signal operation for a four (4) hour period for normal, fully functioning traffic signal operation and seven (7) hours of an all-direction red flash operation. In most cases, local hydro authorities typically have power restored within the initial four hour period of full traffic signal operation. Existing signalized intersection characteristics and data has been assessed, evaluated and ranked for all traffic control signals under the Town's jurisdiction.

Reference: 2022-2026 Strategic Plan, Pillar 2: Growing our Community, Priority 1.5: Improve road transportation network.

Schedule: Timing of installations will be coordinated with the Region of Durham.

Project	26034001	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2027	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for this project includes design and construction for the replacement of existing HPS streetlights to new LED streetlights.

Rationale: Due to the age of concrete and wooden poles, breakdown of underground cabling, and the use of older luminaire technology, staff have identified the Midtown Neighbourhood as the primary locations for the Streetlight Neighbourhood Improvement Program. It has been identified that areas within the Town, generally built prior to 1980, are susceptible to frequent streetlighting maintenance. Due to the age of concrete and wooden poles, breakdown of underground cabling, and the use of older luminaire technology, staff have identified the Midtown Neighbourhood as the primary location for the Streetlight Neighbourhood Improvement Program.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Municipal Bridge Inspections**		
Project	25030401	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The Town of Ajax Municipal Structure Inventory and Inspection Study provides a summary of structure condition ratings and contains a comprehensive list of both the long-term and short-term maintenance, repair and/or replacement requirements for the Town's bridge and culvert structures. Data collection and structure ratings are completed in accordance with the Municipal Bridge Appraisal and Municipal Culvert Appraisals Manuals and the Ontario Structure Inspection Manual.

Rationale: In 1997, The Province of Ontario passed amendments to existing legislation in the Highway Traffic Act, the Bridge Act and the Public Transportation and Highway Improvements Act that required all bridges, culverts and retaining wall structures with a span greater than 3.0 metres to be inspected under the direction of a Professional Engineer every two years.

Reference: Municipal Bridge Appraisal and Municipal Culvert Appraisals Manuals and the Ontario Structure Inspection Manual; Ontario Regulation 588/17: Asset Management Planning for Municipal Infrastructure under the Infrastructure for Jobs and Prosperity Act 2015. S.O. 2015, c 15.

Schedule: Municipal structure inspections will commence following the spring freshet (annual spring runoff of melted snow and rain in waterways) and will vary dependent on the severity of the winter and amount of precipitation. The final report is expected by the end of July of the inspection year.

Project Name	**Bridge and Structural Culvert Peer Review**		
Project	26030402	**Initially budgeted in**	2025
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The peer review of the 5 worst bridges and structural culverts will be conducted by a structural engineer. Through detailed inspections this consultant will ensure that the deficiencies of bridges and structural culverts noted in past OSIM inspections have been correctly identified and the correct recommended rehabilitation and the accurate rehabilitation costs are provided to the Town of Ajax.

Rationale: Conduct a more detailed assessment of the condition of the worst 5 bridges and structural culverts to ensure these are maintained in the most cost effective manner.

References: This project is consistent with the Strategic Plan's third pillar, Modernizing our Community - Demonstrate sound financial management Infrastructure Management (Asset Management). This project responds to the Corporate Asset Management Plan Recommendation #9 by updating the condition of the bridges and structural culverts and providing more accurate future spending needs.

Schedule: Consultant Inspections 2026. This peer review should be conducted every 4 years to reduce the risk of failure of these assets.

Schedule: Municipal structure inspections will commence following the spring freshet (annual spring runoff of melted snow and rain in waterways) and will vary dependent on the severity of the winter and amount of precipitation. The final report is expected by the end of July of the inspection year.

DETAIL SHEET

Project Name	**Church St Bridge Repairs - Con**		
Project	23030401	**Initially budgeted in**	2021
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2025	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: The scope of work for the Church Street Road Bridge, South of Mill Street and North of Highway 401 includes but is not limited to:

- Waterproofing, removal and replacement of existing asphalt on bridge deck
- Excavation and placement of rock protection to rectify severe erosions at the South Pier
- Partial depth concrete removal and repairs of the abutments, piers and girders
- Jacking of superstructure
- Implementation of work area and scaffolding
- 5 year post construction environmental monitoring

Rationale: The Town of Ajax 2023 Municipal Structure Inventory and Inspection Study provided a summary of structure condition ratings and contains a comprehensive list of both the short-term and long-term maintenance, repair and/or replacement requirements for the Town's 77 bridge and culvert structures. Staff review Municipal Structure Inventory and Inspection Studies to propose rehabilitation and replacements of infrastructure and assets, based on the recommendations of the study. The impact of not following the recommended schedule may result in additional expenditures, risk to public safety, and unplanned service disruptions.

Reference: The Town of Ajax 2023 Municipal Structure Inventory and Inspection Study. 2022-2026 Strategic Plan, Pillar 2: Growing Our Community, Priority 1.5: Improve road transportation network, 2024 Corporate Asset Management Plan.

Project Name	**Annie Ped Bridge 1003 Long Term Repair**		
Project	23075001	**Initially budgeted in**	2022
Submitted By	Ranil Fernando, Manager of Infrastructure & Asset Management	**Department**	Operations & Environmental Services
Start Year	2026	**Section**	Infrastructure Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: This project includes design and construction to provide a long term solution to address the erosion hazard for Annie Crescent pedestrian bridge (#1003) which is part of the Trans Canada Trail (TCT). The project scope includes geotechnical and fluvial geomorphology studies and additional erosion protection requirements that would be identified during the design process.

Rationale: Annie Crescent pedestrian bridge was closed on January 2020 due to severe erosion and safety hazards caused from a storm event. The bridge was temporarily repaired in 2021 to reopen the bridge for public use. The scope of work for the temporary repair included a short-term solution until a permanent solution can be determined through studies and detailed design.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**Stormwater Pond Condition Assessment**		
Project	25041001	**Initially budgeted in**	2021
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2025	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Complete Stormwater Management Pond Condition Assessments for all stormwater management ponds. Detailed bathymetric surveys of large stormwater ponds to determine the current volumes of sediment, structural inspection of inlet and outlet sewers, manholes and catchbasins, and, sediment contaminant analysis.

Rationale: To improve the quality and quantity of stormwater being discharged to Ajax creeks. This project will assess the condition of stormwater management facilities and identify deficiencies and establish priorities for general maintenance and full pond rehabilitation. The bathymetric surveys will help inform capital project costs for stormwater management pond rehabilitation projects. The sediment volume present in a pond significantly factors into the cost for rehabilitation.

Reference: The Town of Ajax's stormwater network is considered a core infrastructure asset according to Ontario Regulation 588/17: Asset Management Planning for Municipal Infrastructure. Town of Ajax 2022-2026 Strategic Plan, Pillar 3: Modernizing Our Community, Priority 1: Preserve and enhance green spaces and water quality;

Schedule: The Stormwater Pond Condition Assessment will be completed in the spring and summer of 2025.

Project Name	**Shoal Point SWM Water Quality Control Retro**		
Project	25000801	**Initially budgeted in**	2021
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2026	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: Installation of a stormwater management water quality control device to improve the quality of stormwater effluent discharging to Carruthers Creek from the Town's storm sewer system.

Rationale: The existing storm sewer outlet from Shoal Point Road and Range Line Road discharges directly to Carruthers Creek and does not provide adequate stormwater treatment. Installation of a water quality control device will improve water quality discharging into this SWM facility and into Carruthers Creek. The risks of delaying the project include continued, uncontrolled stormwater runoff into Carruthers Creek. This project represents an opportunity to install quality treatment in an area of Town where there currently is none.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Project Name	**SWM Pond 25 Rehab (Pickering Beach)**		
Project	25041003	**Initially budgeted in**	2023
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2025	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: To clean out and remove accumulated sediment within Stormwater Management Pond 25 and repair the outlet structure.

Rationale: This stormwater management facility is designed as a dry pond, meant to provide quantity control for stormwater runoff to Carruthers Creek. The outlet structure is not operating correctly and is causing the pond to not drain property. It has been plugged with accumulated sediment. These deficiencies were noticed during inspections of the facility. The pond requires a sediment clean-out to optimize its treatment potential. Risks of delaying the project include increased future maintenance costs, impacts to water quality and potential downstream flooding.

Reference: Town of Ajax 2022-2026 Strategic Plan, Pillar 3: Modernizing Our Community, Priority 1: Preserve and enhance green spaces and water quality; Town's Official Plan Sections 2.2.4 and 4.2.4.of improving the quality of stormwater discharged to Lake Ontario, our primary source for drinking water; Stormwater Quality Retrofit Study 2011; and Shoreline Improvement Strategy 2011. Ministry of the Environment Stormwater Management Planning and Design Manual, 2003.

Schedule: The rehabilitation of the pond is proposed in 2025.

Project Name	**SWM Pond 28 Rehab (Shivitz)**		
Project	25041004	**Initially budgeted in**	2023
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2026	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: To clean out and remove accumulated sediment within Stormwater Management Pond 28.

Rationale: The Town undertook a multiple Stormwater Pond Condition Assessments encompassing many of older stormwater ponds in Ajax. Upon completion, the study provided an overall condition assessment of the selected ponds, identified deficiencies and established priorities for general maintenance and full pond rehabilitation.

SWM Pond 28 has been assumed by the Town and has not undergone any maintenance since its installation. The Stormwater Pond Condition Assessment notes that the pond is in need of rehabilitation. The pond requires a sediment clean-out to optimize its treatment potential.
Risks of delaying the project include increased future maintenance costs, impacts to water quality and potential downstream flooding.

Reference: Town of Ajax 2022-2026 Strategic Plan, Pillar 3: Modernizing Our Community, Priority 1: Preserve and enhance green spaces and water quality; Town's Official Plan Sections 2.2.4 and 4.2.4.of improving the quality of stormwater discharged to Lake Ontario, our primary source for drinking water; Stormwater Quality Retrofit Study 2011; and Shoreline Improvement Strategy 2011. Project	26041001	**Initially budgeted in**	2022
Submitted By	Stephen Ruddy, Manager of Development Engineering	**Department**	Planning & Development Services
Start Year	2026	**Section**	Development Engineering

PROJECT DESCRIPTION / JUSTIFICATION

Scope: To clean out and remove accumulated sediment within Stormwater Management Pond 30.

Rationale: In 2017, the Town undertook a Stormwater Pond Condition Assessment encompassing 6 of the 51 stormwater ponds in Ajax. Upon completion, the study provided an overall condition assessment of the selected ponds, identified deficiencies and established priorities for general maintenance and full pond rehabilitation.

SWM Pond 30 has been assumed by the Town and has not undergone any maintenance since its installation in 2002. The 2017 Stormwater Pond Condition Assessment notes that the pond does not meet the intended quality control provision and does not conform to current standards and SWM practises. The pond requires a sediment clean-out to optimize its treatment potential. Risks of delaying the project include increased future maintenance costs, impacts to water quality and potential downstream flooding.

DETAIL SHEET

Program Name **Community Benefit Charges** **Program Number** CB095000

Program Description

Section 37 of the Planning Act authorizes the Town to collect a Community Benefits Charge (CBC) to pay for the capital costs of facilities, services and matters that are required to serve development and redevelopment.

CBCs are collected on developments and redevelopments that are at least five storeys in height and that add at least ten residential units. The projects identified are directly related to a specific development through the planning process.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Development - Studies** **Program Number** DC090100

Program Description

A number of growth-related studies must be undertaken to facilitate the completion of the Town's long range capital program and to prepare the Development Charge Background Studies every 5 years.

Over the 10 year growth forecast period (2018-2027) identified in the 2018 Development Charge background study, the Town will prepare a number of studies to inform future capital infrastructure needs and related long term asset maintenance and replacement needs. These studies will include an Integrated Transportation Master Plan, planning and intensification studies, master plans/servicing studies for other eligible services, and studies related to the growth-related costs of asset management.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Development - Fire & Emergency Services** **Program Number** DC090200

Program Description

The Town currently has 54,409 sq.ft. of floor space contained within three fire stations. The Town also maintains 92 sets of personal fire fighting equipment , 22 vehicles and one trailer used for education on fire prevention and public safety .

Over the 14 year forecast period (2018-2031) identified in the 2018 Development Charge Background Study for Fire Services, the Town will experience growth in population and employment which will require additional investments in Fire related services. The Town anticipates acquiring additional vehicles, as well as equipment and facility modifications to accommodate additional staff and new vehicles.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Development - Transportation Services** **Program Number** DC090300

Program Description

Transportation Services provided by the Town include the provision of roads, bridges and culverts, sidewalks and active transportation assets, traffic signals and streetlights, and related operations facilities and vehicles.

Over the 14 year forecast period (2018-2031) identified in the 2018 Development Charge Background Study for Transportation Services, the Town will experience growth in population and employment which will require additional investments to address transportation needs. The capital needs include:

- road network improvements - including new construction, road widening, rural reconstructions, bridges, stormwater network infrastructure and sidewalks
- street lights (SL)
- traffic signals (Traf Sig)
- active transportation network of on-road and off-road trails required to facilitate transportation of people throughout the Town including additional bike lanes, cycle tracks, and paved shoulders
- multi-use trails (MUT) and sidewalks on Regional and Town roads
- vehicles and equipment related to transportation operations

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Development - Parks & Recreation** **Program Number** DC090400

Program Description

The Town currently maintains approximately 346 hectares of parkland, approximately 33,000 metres of recreational trails, 105 parks and a fleet of vehicles providing maintenance services within these parks. In addition, the Town utilizes approximately 429,000 sq.ft. of recreation facilities and 45,000 sq.ft. of operations facilities in the provision of parks and recreations services.

Over the 10 year forecast period (2018-2027) identified in the 2018 Development Charge Background Study, the Town will experience growth in population and employment which will require additional investments in Parks and Recreation Services. These capital needs are comprised of future parkland and recreation trail development, additional indoor recreation spaces, and additional vehicles related to parks and recreation services. Such services were identified in the recent Recreation and Parks Master Plan (RPMP).

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Amended

Program Name **Facility Rehabilitation Program - Town Hall** **Program Number** LC010100

Program Description

This project captures asset-management related projects that have benefits to extend across all departments and are located on the Town Hall campus at 65 Harwood Ave. South.

Town Hall is approximately 59,000 sq. ft. and home to Council Chambers, Council offices, public information counter, service counters, internet kiosks, public meeting rooms and several departments (Office of the CAO, Legislative Services, Finance and Planning & Development).

The Corporate Facility Maintenance program evaluates building envelope, electrical and mechanical systems at the facility and plans for regular maintenance, repair and replacement of components as they near the end of their useful life in order to maintain a state of good repair and uninterrupted service delivery.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Town Hall / Other** **Program Number** LC010200

Program Description

The Corporate Fleet & Equipment Replacement program captures costs related to the Town vehicles and equipment replacement required to support the operation of Town Hall and/or projects that are shared by all departments' service delivery.

Projects may include replacements of the vehicles, trailer, and equipment used for the purposes of general Town-wide building maintenance. Projects also include replacement of public furniture in common areas inside and outside of Town Hall, office furniture, or equipment that has reached the end of their useful life.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the current service levels each asset supports and prevent unplanned service interruptions.

Program Name **Hardware and Software Replacement Program** **Program Number** LC010300

Program Description

The Hardware & Software Replacement program captures costs related to the Town's replacement and management of technology infrastructure which supports the daily functions of the corporation, enables the use of 70 software applications and supports the Town's cyber security program. This technology consists of over 250 pieces of infrastructure which includes but is not limited to: servers, hosts, SANs, switches, access controllers and access points.

Projects may include replacements of equipment and technologies that have reached their end of life, upgrades driven by increased usage demands, enhancements / changes to the network security, and projects that address the need for additional functionality in existing systems and software.

Projects are driven by diligent life-cycling of the Town's technology assets, and are prioritized to ensure that the Town has secure, reliable systems in place to support the delivery of Town services.

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Facility Maintenance Program - Operations Centre** **Program Number** LC010400

Program Description

The Operations Centre located at 800 Salem Road North, is the hub for the Town's Operations and Environmental Services staff and equipment.

Numerous services are located in this building including:

- Public Works staff and equipment used to maintain roads, bridges, sidewalks, walkways, storm sewers, street lights and boulevards throughout the Town of Ajax.
- Environmental services staff and equipment used to manage approximately 800 hectares of parks, trails, sportsfields and open spaces
- Infrastructure, building maintenance and capital planning staff who are responsible for the planning, budgeting, coordination and implementation of road, bridge, trail, sidewalk and park related infrastructure projects
- Fleet services, an internal group that maintains the Town's fleet of vehicles and equipment

The Operations Centre Facility Maintenance Program evaluates building envelope, electrical and mechanical systems at the facility and plans for regular maintenance, repair and replacement of components as they near the end of their useful life in order to maintain a state of good repair and uninterrupted service delivery.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Facility Maintenance Program - Fire Halls** **Program Number** LC020000

Program Description

The Town of Ajax provides Fire & Emergency services from 3 locations:

- Station 1 - Fire Headquarters, located at 900 Salem Road North
- Station 2, located at 435 Monarch Avenue
- Station 3, located at 40 Westney Road North

These locations include workspace and quarters for the Town's firefighting and dispatch staff, garage and storage space for the fire apparatus and firefighting and rescue equipment, administrative workspaces, parking and specialized training areas including the fire training tower.

The Fire Hall Facility Maintenance Program evaluates building envelope, electrical and mechanical systems at the facility and plans for regular maintenance, repair and replacement of components as they near the end of their useful life in order to maintain a state of good repair and uninterrupted service delivery.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Fire** **Program Number** LC020100

Program Description

The Fire Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement in the Fire & Emergency Services department. Currently the Town maintains 10 Fire Trucks (Pumper Rescues, Pumper Tanker, Aerial Ladders and Heavy Rescue), 12 vehicles and 1 trailer used for education on fire prevention and public safety.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the current service levels each asset supports. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Bylaw Services** **Program Number** LC023000

Program Description

The By-Law Services Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement. The By-law services fleet contains 11 vehicles, including a courier vehicle regularly used by the Legislative and Information services department.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the current service levels each asset supports. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Amended

Program Name **Road Resurfacing Program** **Program Number** LC030000

Program Description

The Road Resurfacing program includes projects related to resurfacing of the Town's urban and rural roadways. Resurfacing projects include the removal of the existing surface layer and repaving with new asphalt to restore the road surface back to an excellent condition. Mill and Overlay (M&O) projects include grinding the existing surface and applying new asphalt to restore the road surface back to an excellent condition.

The scope of the projects may also include sidewalk replacement, curb and gutter replacement, storm sewer repairs, and minor road improvements. Minor road maintenance such as patching and crack sealing is also done through this program.

The ongoing monitoring of road conditions through the annual pavement management systems updates is also included within the scope of this program.

Timely road resurfacing and maintenance of the Town's road network, consisting of 757 lane kms, ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

DETAIL SHEET

Program Name **Road Rehabilitation Program** **Program Number** LC030100

Program Description

The Roads Rehabilitation program includes road maintenance and rehabilitation projects of the Town's paved roadways. Rehabilitation projects involve the full reconstruction and/or urbanization (installation of curb, gutter and storm sewers) of existing roads. Capital works may also include full depth granular replacement, sidewalk reconstruction that are within the Town's right of ways. The road network is the core of the Town's integrated transport system and its performance is essential to the quality of life, economic competitiveness and sustainable development of the Town. Regular investments improve community safety and maintain the functional capacity of the network.

Certain projects may include sanitary and watermain installation / replacement to be completed in partnership with the Region of Durham.

Timely rehabilitation of the Town's road network consisting of 757 lane kms ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Roads Maintenance** **Program Number** LC030200

Program Description

The Roads Maintenance Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement that are used in roads maintenance activities.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the current service levels each asset supports. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

DETAIL SHEET

Program Name **Bridges & Culverts Lifecycle Maintenance Program** **Program Number** LC030400

Program Description

The Bridges & Culverts Lifecycle Maintenance program includes projects associated with the Town's transportation structures (13 roadway bridges and 33 major culverts). These projects will extend the service life of the structures while ensuring they remain in a safe condition for public use.

Project scope may include design, construction, structural investigation, and inspection services.

Structural investigations and inspections are also included in this program as such work is necessary to monitor conditions and identify structures that require maintenance, rehabilitation, or replacement.

Timely repair, rehabilitation or replacement of assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Roadside Assets Lifecycle Maintenance Program** **Program Number** LC030600

Program Description

The Roadside Assets Lifecycle Maintenance program includes projects related to roadside assets not maintained through other roads resurfacing/rehabilitation programs, including 4,833 metres of guiderails, 86 acoustic barriers, 36 retaining walls, and over 13,500 road signs.

Projects in this program may also include sidewalk or multi-use path replacements or rehabilitation and active transportation facilities including on-road bike lanes not maintained through other road related programs or through traffic calming initiatives.

Timely repair, rehabilitation or replacement of assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Traffic Signal Lifecycle Maintenance Program** **Program Number** LC030700

Program Description

The Traffic Signal Assets Lifecycle Maintenance program includes projects related to traffic control equipment including 39 traffic signals, a number of pedestrian signals, and other devices that assist in safe traffic crossing. This program is coordinated with the Region of Durham.

- The Traffic Signal UPS Battery Backup projects will see the installation of uninterruptible power supply (UPS) / battery backup systems in traffic control cabinets to maintain traffic signal operation during power failures.
- The Accessible Pedestrian Signal projects will include the design and installation of accessible pedestrian signal controls at intersections under the jurisdiction of the Town of Ajax.
- The LED Traffic Signal Replacement project includes the replacement of existing LED traffic signal heads and the installation of a double point mounting system.

Timely repair, rehabilitation or replacement of assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service outages.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Snow Removal** **Program Number** LC031000

Program Description

The Snow Removal Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement in the delivery of snow removal services.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain service levels. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

DETAIL SHEET

Program Name **Stormwater Lifecycle Maintenance Program** **Program Number** LC041000

Program Description

Stormwater Management (SWM) ponds are responsible for holding water, removing pollutants, flood prevention, erosion control and spill management. The clean out program of the Town's 50 SWM ponds and 22 Oil and Grit Separators is needed to remove sediments and ensure optimal performance .

The Stormwater Lifecycle Maintenance program includes projects such as: SWM pond clean out, construction of new SWM facilities (existing area) to meet water quality standards, identifying creek erosion sites, and assessment of existing ponds, culverts and storm sewers for retrofitting or up sizing to meet the regulatory requirements and to minimize flooding issues.

Timely repair, rehabilitation or replacement of stormwater assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risks of flooding and unplanned service disruptions.

DETAIL SHEET

Amended

Program Name **Parks Lifecycle Maintenance Program** **Program Number** LC070000

Program Description

The Parks Lifecycle Maintenance program includes projects related to the renewal and rehabilitation of existing parks, 98 playgrounds, 111 sportsfields/courts and trails within the Town's parks and open space areas, including off-road trail used for the active transportation network. Projects may address the renewal of existing playground areas to address safety, accessibility and asset management priorities such as lighting and park infrastructure, as well as management of trees in woodlots and open spaces.

The principles of the Town's Asset Management policy are used to identify maintenance and repair priorities.

Timely repair, rehabilitation or replacement of assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Parks Maintenance** **Program Number** LC070100

Program Description

The Parks Maintenance Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement in parks maintenance.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the service levels each asset supports. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement - Recreation Facilities** **Program Number** LC070200

Program Description

The Recreation Facilities Fleet & Equipment Replacement program identifies vehicles and equipment used to service recreation facilities that are at the end of their expected life cycle and due for replacement.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the service levels each asset supports. Extending the life cycle of vehicles or equipment may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Facility Rehabilitation Program - ACC** **Program Number** LC070300

Program Description

The Ajax Community Centre (ACC), constructed in 1967, with expansions and major renovations in 1972, 1990 and 1999, provides a variety of services to residents of the Town of Ajax. The ACC is approximately 217,000 sq. ft. and is one of the most diverse facilities in Town, featuring a variety of rooms ideal for meetings, special events or celebrations and rental space, including:

- Community Hall
- Fitness & Health Centre and Wellness Studio
- Squash courts
- Indoor pool with family change rooms
- Arena Ice Pads
- Youth Space
- Administrative offices

Outside amenities include a skateboard park, basketball court, an artificial turf field, soccer fields, tennis courts, Ajax Soccer Club Clubhouse and the Ajax Cricket Club pitch and pavilion.

Building envelope, electrical and mechanical systems at the facility require regular maintenance, repair and replacement as they near the end of their useful life in order to maintain a state of good repair.

Program Name **Facility Rehabilitation Program - MCC** **Program Number** LC070400

Program Description

The McLean Community Centre (MCC) was constructed in 1994 with a major expansion in 2000. The facility has an approximate area of 75,000 sq.ft. and provides a variety of services to residents of the Town of Ajax and features the following amenities:

- Community Hall and community rooms
- Fitness & Health Centre
- Gymnasium
- 25-metre indoor leisure pool with tot pool and water slide
- Sauna, Hot Tub and change rooms
- Preschool Room
- Youth Space

MCC is also the home to the Community Art Exhibition, the Ajax McLean Library Branch, and North Ajax Rehab - Physiotherapy Clinic. Outside amenities include a skateboard park, splash pad and baseball diamonds.

Building envelope, electrical and mechanical systems at the facility require regular maintenance, repair and replacement as they near the end of their useful life in order to maintain a state of good repair.

DETAIL SHEET

Program Name **Facility Rehabilitation Program - ARC** **Program Number** LC070500

Program Description

The Audley Recreation Centre (ARC) is the Town's newest, modern state-of-the-art community centre located in the northeast part of Town. The facility was originally constructed in 2013 with an expansion completed in 2019. The facility has an approximate area of 100,000 sq.ft. and is also home to the ARC Library Branch. ARC features:

- Community room and studio rentals
- 6-lane, 25-metre indoor lap pool, leisure pool with therapy jets and change rooms
- Fitness classes
- Gymnasium
- Preschool room
- Youth Space

Outdoor amenities include a skateboard park, splash pad, inclusive playground, basketball courts, tennis courts, baseball diamonds and walking paths.

Building envelope, electrical and mechanical systems at the facility require regular maintenance, repair and replacement as they near the end of their useful life in order to maintain a state of good repair.

DETAIL SHEET

Program Name **Facility Rehabilitation Program - Libraries** **Program Number** LC071000

Program Description

The Ajax Public Library operates from 3 branch locations:

- Main Branch - this includes the main building and administrative offices that are co-located at Town Hall
- Audley Branch
- McLean Branch

The spaces include the library collection of physical and electronic materials, quiet study spaces , public computer workstations, reference and local history research and community room rentals.

The building envelope, electrical and mechanical systems at all locations require regular maintenance, repair and replacement as they near the end of their useful life in order to maintain a state of good repair.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Facility Rehabilitation Program - St. Francis** **Program Number** LC072000

Program Description

The St. Francis Centre is a 7,800 sq. ft. centre for arts, culture and heritage featuring reception area, theatre and meeting spaces, dressing rooms, catering kitchen, professional theatre lighting and sound and audio-visual capabilities. The facility was originally built in 1871 and retrofitted in 2011.

Building envelope, electrical and mechanical systems at the facility require regular maintenance, repair and replacement as they near the end of their useful life in order to maintain a state of good repair. Regular investment in facility maintenance ensures that the facility is available for the enjoyment of all.

Program Name **Pedestrian Bridges Lifecycle Maintenance Program** **Program Number** LC075000

Program Description

The Pedestrian Bridges Lifecycle Maintenance Program includes projects related to the renewal and rehabilitation of 31 existing pedestrian bridges within the Town's parks and open space areas.

The principles of the Town's Asset Management policy are used to identify rehabilitation and repair priorities.

Timely repair, rehabilitation or replacement of assets ensures public safety, reduces the lifecycle cost of operation and minimizes the risk of unplanned service disruptions.

TOWN OF AJAX

2025 CAPITAL BUDGET / 2026-2034 LONG RANGE CAPITAL FORECAST

DETAIL SHEET

Program Name **Fleet & Equipment Replacement Program - Planning and Development** **Program Number** LC080000

Program Description

The Planning and Development Services Fleet & Equipment Replacement program identifies vehicles and equipment at the end of their expected life cycle due for replacement in the Planning and Development department. The Planning and Development Services fleet contains 7 vehicles used by Building and Engineering services staff to carry out their duties.

Vehicles and equipment at the end of their expected life cycle require replacement in order to maintain the current service levels each asset supports. Extending the life cycle of vehicles may increase maintenance and repair budgets and could result in significant service delivery interruptions caused by unplanned mechanical failures.
